PRICE TEN CENTS

DR. FOSTER AT VESPERS

Gives Talk on Science and Religion

At the Vesper service in the College chapel Sunday afternoon, Dr. Foster gave a very forceful sermon on Science and Religion in which he brought out the fact that spiritual truths are as intrinsically real as the so-called facts of material science.

"Religion and science have three things in common," said Dr. Foster—"First, Mystery; second, Theory, and third, Fact." In a masterful way he then proceeded to clear up various misconceptions of religion. "We are daily learning to see that God's world is the Universe," he said. "Once science thought that the brain was all, but Bergson in his latest book tells us that 'Consciousness overflows the brain,' and most thinking men are coming to be of this opinion." Dr. Foster emphasized the worth of practical Christianity. He closed his talk with a forceful poem.

IN CHAPEL SERVICE

President Gray certainly spoke the truth when, in Chapel last Saturday morning, he characterized Dr. Foster as "a live wire" and one who would succeed in making us "sit up and take notice."

In his Monday morning address Dr. Foster spoke in part as follows. "The world today is in a more broken state than ever before and because this is so today is a most fascinating time to plan a human life. Our civilization must be rebuilt from the ground up. Diplomacy has fallen flat. The so-called Christian diplomacy of Europe was built upon lies and even murder and since the armistice the same ungodly, brutal, dollar mark diplomacy has been in the saddle.

"It is time that the spirit of fair play, exemplified by Jesus Christ be injected into the affairs of the world. America's ideals must save the situation. Jesus Christ is calling for men to stop the present state of things. We, as a nation, have got to do our share in rebuilding civilization across the seas. Unless we do this a revolution will sweep over the world that will make the French Revolution look like a kindergarten pillow fight. We've got to stop crying 'America first' for if we don't God will sink us in the depths of the sea. I ask you college men and women, 'What are you going to do about it?'"

On Tuesday morning Dr. Foster emphasized the need of caring for the body, mind, and soul. "God Almighty," he said, "has put into the hands of all a machine—mind, soul and body—and you are at the wheel. You can drive it where you will, along the road of morality or that of immorality. It's up to you. The gospel of health has its 'thou shalt not's' and its 'thou shalt's.' Unless these commandments are obeyed we cannot do the work God has assigned us to do. Every impression that is conveyed to the mind by the eyes or ears is a lasting one and therefore it is a matter of vast importance what kind of mind pictures we paint for ourselves. Let them be good and pure. I ask you college men and women that if God gives you a chance to influence the life of any of your fellows along better lines take that chance. Be a tower of strength in your college community. Stand for spiritual things and always bear in mind the example of Jesus the Christ, that red-blooded battler, that peace-loving Jesus of Nazareth."

Wednesday morning Dr. Foster gave his third lecture at Chapel services. He pointed out that there are two distinct messages of Christianity. (1) to the in-

dividual, and (2) to society as a whole. If we do not listen to these messages then we have forgotten the lessons taught by the great war. The whole world is today engaged in cheap politics. The spirit of Jesus Christ must be injected into business affairs.

The speaker then read a set of resolutions drawn up by the labor unions of Wheeling, West Virginia, in which the laborers call upon the employers to apply the teachings of Jesus to the labor problem of today. He also told several interesting stories concerning his work as a chaplain in one of New England's largest prisons and closed his talk with this emphatic appeal: "I commend to you the Christian Gospel. I ask you to carry it out here and now!"

SOPHOMORE PRIZE DEBATERS GET START

Some few afternoons ago the preliminary trials for choosing the Sophomore Prize Debating Teams were held in Hathorn Hall. This year there was an unusually large number of contestants. A preliminary trial was arranged, after the fashion of choosing the varsity debaters.

Very soon (the date has not yet been definitely decided yet) the men chosen will enter into competition again, and the teams will be chosen.

From those trying out, the following men were chosen: Burden, Carroll, Hall, Hathaway, Minter, Pinekney, and Robinson. Especially noteworthy was Mr. Pinekney's performance. In him there is quite evidently, future varsity material.

Mr. Starbird, '21 and Mr. Watts, '22 aided Prof. Baird in the choosing of this list.

OH JOY!

Next week the STUDENT will present a guaranteed remedy for the Mid-Year Blues. Watch for the Joy Number!

OUTING CLUB CARNIVAL COMING

This year's Outing Club Carnival is to be a real event. On Feb. 26 the entire day and evening will be given over to winter sports. Contests on snowshoes, skis, and skates have been arranged. Novelty features of every sort are included in the day's program. There will be features of interest to every one of the 425 members of the Outing Club and their friends.

In the morning there will be inter-class contests. In the afternoon the individual skii and snow-shoe stars will perform, and the probability is that the best hockey game of the season will come this afternoon. In the evening there is to be a costume party on the ice. The ice will be well lighted. There will be a band to furnish music and it is hoped the entire college will be on skates and in costume.

Finally, there will be the biggest and best bonfire in many a day, along with "dogs" and refreshments of other kinds served "al fresco."

Further announcements of other features will be made later.

BATES LOSES TO SPEED OF BOSTON COLLEGE

Garnet Puts up Good Fight Against Superior Aggregation

Bates lost one of the fastest games of basketball ever witnessed here when she was defeated by Boston College 38 to 28. Although the Garnet showed superior work in every department of the game in the first half, they lacked the endurance to stand up under the attack of the Boston men in the second period. No alibi whatever is offered by any member of the Bates quintet for the loss of the game, but the large audience that witnessed the wonderful fight they put up with a team that had never been beaten, knows that if Bates had a real gymnasium to practice in, the result would have been different. Our present gym is small and the contrast of the floor in it with the one in City Hall is very great. The team is greatly handicapped because of this fact and we hope the day is not far distant when President Gray presents to the college that splendid gift of the Royce D. Purinton Gymnasium.

Captain Spratt and his men were in the lead at the end of the first half. During this twenty minutes of time they were invincible and even if every man on the Boston team were an Urban, the score would have read in favor of the Garnet. They gave all they had and out-generated the visitors. But the story reversed in the second half and Boston College, by means of more weight and endurance, edged the necessary baskets that defeated Bates. The members of the Garnet fought, however, until the end though tired and winded.

For the home team Spratt, Davis, and Wilson performed in an excellent manner. The tall captain retained his eye for shooting foul goals dropping 10 through the hoop out of 12 chances. Wilson surprised the crowd with spectacular passes and clever guarding. Little Kempton was also a thorn in the flesh to the big Boston boys and his two difficult baskets were well earned. Urban, Hickey and Morley starred for Boston College.

The summary:

BATES COMES FROM BEHIND

Rhode Island Basketeers Defeated 29-27

With the score a tie and less than four minutes to play, Capt. "Jack" Spratt, the old reliable, dropped in two baskets from the foul line and thus appropriately brought victory to one of the fastest, most exciting basketball games of the season. From the beginning of the contest, when Jack "sunk" his first basket until the end when Capt. Spratt tossed in the last point, there was absolutely no lack of interest. Starting with a dash the Rhode Island aggregation built up quite a substantial lead, but by reason of clever shooting both from the floor and the foul line the Bates quintet tied the score just at the end of the first period. During this period, Trebolet, the elongated right forward, of the visitors reached up over the edge of the hoop and nonchalantly deposited the ball inside of the basket no less than six times. This player was very clever and has developed a style of play quite out of the ordinary.

After the intermission Rhode Island again went to the fore, but a long shot by Davis tied the game into another knot and Spratt's two shots from the foul line decided the contest.

Both teams showed some fine passing at times, though the slippery condition of the floor often did as much toward breaking up an attack as did the defensive play of the rival aggregations. Spratt and Davis stood out pre-eminently as the stars of the game. Capt. "Jack" on the offense and "Dave" as the backbone of the defense. The entire attack is centered about Spratt and when he is working right the scoring power of the team is at its maximum. "Mike" Wilson and Gormley did some good defensive work and Kempton, Coronios, and Reinhardsen showed the fight that is essential to victory. The diminutive Kempton deserves a lot of credit for his persistent aggressiveness. This lad more than holds his own with men twice his size and weight.

The Rhode Island State five is under the direction of Coach Frank W. Keaney, one of the finest athletes that Bates has ever graduated. Mr. Keaney, while in college, starred as a baseball and football player, being a captain in both branches of sport. He has successfully coached both preparatory and college athletic teams in Massachusetts, Connecticut and Rhode Island. The Rhode Island team shows the result of careful coaching and should be commended for the fine spirit of fair play and fight shown during their visit to Bates.

	11	5	27	

In a preliminary game the Bates Freshmen defeated the Algonquin Club of Auburn 26-5. Partridge and Johnson played well for 1924 while Healey excelled for the boys from across the river.

FIRST ENKUKLIOS PARTY

GIRLS ENTERTAIN AT RAND—WILD NELL FEATURES

The Enkuklios entertained the student body Saturday evening at Rand Hall. A large group of men and women were present to enjoy the fun, which consisted of games by all and a program for all.

At first, those present gathered in the gymnasium, stood in three long lines, boy and girl alternating. Each was given a corn cake, told to eat and whistle America as soon as possible. The prize went to one of the Freshman boys.

Then a relay suitcase race amused the crowd, as the young ladies struggled into a vest and endeavored to put on a collar and tie, while the boys attempted to show their ability at getting into and out of skirt and middy.

Next followed a newspaper race, and then a darky chorus entertained with a few Negro melodies. But the chief event of the evening was the presentation of a movie pantomime, "Wild Nell, the Pet of the Prairie or Her Final Sacrifice," by an all star cast.

The work of each of the dramatists deserves mention, but particularly that of the two Indians, who kidnapped Lady Vere de Vere and carried her off on their horse. Those witnessing the scene could almost feel the thrills of horseback riding themselves. Mention must also be made of the work of Wild Nell and Handsome Harry in rescuing Lady Vere de Vere from death at the hands of the Indians. After a perilous journey, and the upsetting of their canoe, they arrived at the camp in time for Handsome Harry to kill the three Indians with one shot from his revolver. Then, as the lovers were reunited, the audience watched breathlessly, while Wild Nell, who secretly loved Handsome Harry, drew from her bosom her dagger and made her final sacrifice.

A few more games were then played, after which all went up to Fiske Room, where dainty hostesses, presiding over little tables set about in various parts of the room, served Welsh Rarebit, Creamed Crabmeat, sandwiches and coffee.

A quiet social time was enjoyed followed by the singing of the Alma Mater, which brought to an end the pleasant evening.

SPOFFORD INVESTIGATES MAGAZINE SUSPENSION

Spoftford Club held its regular Tuesday evening meeting in Libby Forum, this week. The chief business was the consideration of the suspension of the college literary publication. The committee appointed last week to investigate the proposition made a lengthy report, but the members of the club decided it not advisable to take any action on the matter for the time being. A Spofford publicity committee was appointed consisting of Dwight E. Libby, '22, chairman; Eleanor Bradford, '22; and J. William Ashton, '22.

The business session usurped so much time that it was impossible to enjoy the whole literary program. However, Mr. Maunter, '22, read an excellent dramatic production: "You Tell Us, Ouija."

THINK IT OVER

For many years there has been in vogue a most taking custom, the dictates of which have caused a mad search to be carried on for posters with which to adorn the rooms of undergraduates on our smiling campus. All very well. Posters do make striking wall ornaments, especially if chosen with an eye to being as little like other ornaments as possible.

Some time ago a new policy was instituted here at Bates, whereby no notices are given in chapel. That meant that the student body is forced to rely, for news and announcement, on bulletin boards centrally located.

Lately, the poster hunt has become so vigorous and ambitious that posters are removed from the bulletin boards days before the event which they announce are to occur. This means that the posters must be replaced, often at great inconvenience, both to the student body in general and to those managing the event.

We are sure that there is no intention on the part of anyone to cause others labor and expense through this poster seizing—the practice has been carried on thoughtlessly. The point is that the practice is totally unnecessary and should be abandoned. Posters may be secured down street after athletic contests are over, and special posters may be rushed for after the event to which they call attention is over. But it should not be considered either clever or honorable to remove posters, as has been done, within a few hours or even minutes after they are put up.

As a matter of common decency, we ask you to think twice before you seize that next poster!

DOCTOR FOSTER

Bates has had the good fortune to hear many a speaker of national and international reputation, one of the greatest of which has been Doctor Foster. Introduced to the College without special interest apparent among the student body, the genial Doctor soon made his way into the whole-hearted friendship of the entire campus.

We have listened with pleasure to the keen analyses of present day issues, we have enjoyed the peerless humor of the man, and we have marveled at the broad-mindedness of the doctrine laid before us. In short, we have been actively and positively impressed with the message which the speaker held before us.

But that is not enough. Action must follow conviction if any good is to result. It is the duty of every man and woman among us to ask ourselves whether or not we shall accept the plea of the Doctor and make of ourselves better leaders of men. A start on the campus, a translating into Bates ideals of the broad-mindedness of the hour, a pat on the back for the pal that is discouraged—these are the ways in which we can grow.

Truly, we owe to the good Doctor more than we know!

A PRESCRIPTION

For the first time in their collegiate experience, the Freshmen are experiencing the torments which precede formal examinations. Upperclassmen, who have passed through the ordeal many times, are also but little immune to the worryings and wonderings.

In the midst of all bustle of final preparation, therefore, we remind you of the great truth contained in the injunction "Don't

worry!" Review if you will, but never carry the process to the extreme. All night sessions of "cramping" are worse than nothing; and continual worrying with its attendant nervous strain is almost sure to keep you from doing your best. Once having gone thoroughly over each subject, stop that everlasting feverishness of last minute preparation and forget, yes, literally forget "exams". Plenty of sleep, along with plenty of exercise, will bring far better returns than can be secured with a fagged out brain driven by a deadened nervous system.

Try it for yourself, and you will discover the great truth—that the best way to meet those "mid-years" is by sleep, exercise, and no worry.

OUR GRADUATES

The next meeting of the Boston Alumni will be held at the Boston City Club at one o'clock on Saturday, February 5th. The speaker will be Dr. Howard A. Bridgeman, D.L., editor of the Congregationalist and Advance. Dr. Bridgeman graduated from Amherst in the class of '83, Yale Divinity School, '87. Oberlin gave him the degree of Doctor of Divinity. He is a member of the Authors Club and the Twentieth Century Club. He is the author of several books, among which are "Real Religion," and his latest work, "New England in the Life of the World." The subject of the address of the afternoon will be "From a Newspaper Man's Watch Tower."

The meeting on March 5th will be addressed by Governor Channing Cox of Massachusetts; while the meeting of April 2nd will be featured by the presence of Brigadier General Mark L. Hersey.

1867—Dr. George S. Ricker is treasurer of Fairmount College, at Wichita, Kansas.

Four Bates men in Maine are presidents of their respective county teachers' associations—Raymond W. Blaisdell, '19, Androscoggin; Howard R. Houston, '13, Franklin; Shirley J. Rawson, '14, Oxford; W. M. Bottomley, '07, Piscataquis.

1919—The following clipping was taken from the October Maine State School Bulletin:

Superintendent Blaisdell (Bates, 1919) of the Turner-Greene-Leeds Union, in planning for a meeting to boost the centralized school idea for the town of Greene, secured a large attendance of parents through a plan of competition. Pupils from all of the six one-teacher schools took part in a program of songs. While parents were naturally interested in the meeting for this reason, a competition for attendance increased the numbers. This competition provided for the awarding of a prize in the form of a drinking fountain to the school which should be represented by the largest number of parents or neighbors in proportion to the enrollment of the school. Persons were registered as they came to the hall as representing one or the other school community and the figures of attendance were worked out at the close of the meeting. A well attended meeting of interested citizens was the result.

The annual meeting of the Alumni Association of Boston will take place on the evening of March 12, with a dinner at the Vendome. This meeting is usually a large one, with one hundred to two hundred in attendance. It is expected that President Gray will be present.

1902—Miss Georgiana Lunt, who is Librarian of the Auburn Public Library, has recently presented an interesting report of a successful year's work. The children's room, which has been established but a short time, has proved very valuable already.

1920—The engagement of Arthur Lucas and Agnes Page, '20, has just been announced. Mr. Lucas is a graduate student and instructor in Economics at Princeton University, and Miss Page is taking a secretarial course at Simmons College.

1901—Dr. Josephine B. Neal, of New York City, spent a few days in Lewiston last week with her father, Mr. Alton J. Neal.

1875—Dr. J. Raymond Brackett is preparing a collection of views of Greece for the University of Colorado. This collection will be similar to the beautiful one that he gave to Bates last year.

WHAT IS WHEN

Friday, Feb. 4
Hockey, Berlin, on the rink at 4 o'clock
Stanton Club
Choir rehearsal 7.30
Saturday, Feb. 5
B. A. A. Indoor Meet at Boston
Movies at Chase Hall
Monday, Feb. 7
Basketball practice at 8.00
Tuesday, Feb. 8
Masonic Banquet
Wednesday, Feb. 9
Midyears begin, 8.00 A. M.
Thursday, Feb. 10
Basketball practice, 4.00 P. M.
Friday, Feb. 11
Round Table at Chase Hall
Saturday, Feb. 12
Hockey, Bowdoin, on the rink at 3.30. (Exams Saturday afternoon 1.00-3.00)
Basketball, N. H. State at City Hall.
February 15—Phil-Hellenic reception to Lewiston Greeks.
February 17—Second semester begins.
February 18—George Colby Chase Lecturer, Dr. Roselli.
February 22—Enkaklios Reception.
February 26—Outing Club Masquerade Carnival.
March 23—4.30 P. M. to April 7, 7.40 A. M., Easter Recess.

The purpose of this department, to give service, can not be adequately realized without the co-operation of those served by it. Contributions or suggestions may be given to any member of the Board, or may be dropped into the STUDENT Office, Hathorn Hall, not later than Tuesday before publication. If your organization is planning something of interest, bring in the glad news.

IN SCHOLAM REDEO

Prof. Knapp Talks on Letter-Writing

A meeting of the Bates Round Table was held Friday evening, January 28th, at the home of Dr. and Mrs. H. H. Britan. About fifty members were present. The speaker of the evening was Professor F. A. Knapp, who spoke interestingly on "In Scholam Redeo." Professor Knapp presented the development of the art of letter writing, and for the benefit of those present he passed out copies in Latin of some of the letters considered. Letters of such ancient Romans as Cicero, Seneca, Pliny the Younger were presented, both as examples of the art of letter writing and as models for such English writers as Walpole, Cowper, and Gray.

The next meeting of the Round Table will be held in Chase Hall with Dr. Britan as the speaker.

THE POPULAR PROFESSOR

That Doctor Tubbs holds a dear place in the heart of every man here at Bates was clearly demonstrated at the Commons last Tuesday evening. Head-writer Wiggin announced that the kind-hearted professor was present and wished to say a few words. A slight pause followed as Doctor Tubbs arose. Then three rousing cheers led by Watts were given to the welcome visitor that surpassed in volume any demonstration accorded a visiting alumnus or athletic team. But the men were not satisfied with organized cheering and their real reception was in the outbursts of enthusiasm that followed and lasted several minutes. The Doctor's message was very short, an invitation to hear Dr. Foster in Hathorn Hall after dinner. When the meal was finished and the men were leaving the Commons, many were overheard saying: "I'd do anything for Doc Tubbs, even if I have to let something go." The attendance at the lecture proved the fact.

GOVERNOR PARKHURST

PASSES AWAY

The death of Governor Frederic Hale Parkhurst in Augusta last Monday was a distinct shock to the people of Maine. It was known that the Governor was ill, but his recovery had seemed certain as he was feeling very much better and in high spirits up until a few hours of his death. The funeral took place Thursday morning at the South Parish Congregational Church of Augusta. Governor Parkhurst was automatically succeeded by Percival P. Baxter, who will complete the term of two years.

Governor Parkhurst was born in Bangor in 1864. He graduated from Columbian (now George Washington) University Law School in 1887 and was admitted to the bar at Bangor but never practised to any extent. Instead he engaged in the manufacture of trunks, a business established by Johnathan F. Parkhurst, his father. Governor Parkhurst had served as president of the Bangor city council, in both branches of the legislature and as chairman of the republican state committee. He was commissary general of Maine on the staff of the late Governor John F. Hill. He was a delegate to the republican national convention in 1900. After serving two years as chairman of the republican state committee he entered the primaries in June, 1916, when Governor Carl E. Milliken was nominated. He was given the republican gubernatorial nomination last June in a contest with three others including Governor Milliken.

Governor Parkhurst was inaugurated as the 46th governor of Maine on January 6, 1921, serving less than one month up to the time of his death.

Percival P. Baxter, who succeeds Governor Parkhurst, was born in Augusta in 1876. He graduated from Bowdoin College in the class of 1898, and from Harvard Law School three years later. He was admitted to the bar, but never practised. He has been active in politics a score of years, and has been a leader in the fight for water power conservation.

BATES VARSITY HOCKEY TEAM

Photo by Woodcock

The first picture of the fast ice artists; an exclusive STUDENT feature. Left to right, the players are: Stanley, '24; Gross, '21, Manager; Cogan, '24; Roberts, '23; Cutler, '21, Captain; Delaney, '24; Wiggin, '21; Smith, '21; and Belmore, '21.

BATES LOSES TO SPEED OF BOSTON COLLEGE

(Continued from Page One)

Score, Boston College 38, Bates 28. Referee, Saunders. Timer, Cutler. Time, two 20 minute periods. Westbrook Sem., 21; Bates '24, 16.

The preliminary game played between Bates Freshmen and Westbrook Seminary proved to be rather uninteresting and free from thrills. The men of '24 apparently forgot their coaching and played a game of their own style, and were defeated 21 to 16. "Cy" Tarbell showed wonderful determination and fight on the floor and this freshman lad made up in pep what he lacked in science.

King, Westbrook's left forward was the individual star for the visitors.

The summary:

Bates			
	G.	F.G.	Pts.
Herrick, lf	2	5	9
Dinsmore, rf	0	1	1
Partridge, c	1	0	2
Tarbell, lg	0	0	0
Gates, rg	2	0	4
	5	6	16

Westbrook			
	G.	F.G.	Pts.
King, lf	2	5	9
Balfour, rf	2	0	4
Flaherty	1	0	2
Kenney, c	2	0	4
Harney, lg	1	0	2
Gaughan, rg	0	0	0
	8	5	21

Score: Bates 16, Westbrook 21. Referee, Saunders. Timer, Cutler. Time, two 20 minute periods.

HOCKEY

Portland C. C. 10; Bates, 3

The Bates hockey seven had an off day when they faced the Portland Country Club team at Portland last Saturday afternoon. Poor officiating and an unsportsmanlike style of roughhouse hockey by the home team aided in the downfall of the college aggregation.

The Portlanders, however, did not win an easy victory for the Bates men proved worthy opponents at times and the large number of goals scored against them were hard earned. Roberts, Cogan and Smith starred for Bates.

The original hard luck kid of the college, Carl Rounds, accompanied the squad to Portland. Not fully recovered from his serious fall on the ice some few weeks ago, but full of enthusiastic anticipation of meeting Portland in the afternoon, Carl accidentally cut an artery in his hand a few minutes before the time of leaving for the big city. Nothing daunts this splendid youth. With a discernible limp and a bandaged hand, (hidden from the sight of Coach Smith) Carl's indomitable spirit was unshaken. He made the trip and played for a few minutes at cover point.

The summary:

Bates		Portland C. C.	
Roberts, lw		lw, Boyd	
Cogan, c		c, Hall	
Stanley, r		Curry, r	
Delaney, r			
Belmore, ep		rw, Gunn,	
Rounds, ep		ep, Kennedy	
Cutler, p		p, Eaton	
Wiggin, g		g, Snow	

Score: Portland C. C., 10; Bates, 3. Goals: Gunn 5, Hall 4, Kennedy, Cutler,

Stanley, Cogan. Referee, Morrell, (Bowdoin College).

Bates, 10; St. Dominique's, 0.

The Association St. Dominique hockey team was defeated by the Bates team 10 to 0 last Wednesday in a practice contest. The town boys put up a good fight but were unable to cope with their fast opponents who took things easy and sent the puck into the cage at will. Captain Cutler led his men with his usual ability. Eddie Roberts sent thrills of pleasure along the spinal columns of the spectators by the manner in which he handled his stick and netted the puck. His checking also was a feature of the game. Cogan and Smith also did good work for the Garnet.

The Bates line up was as follows: Roberts, lw; Stanley, r; Cogan, c; Smith, rw; Cutler, ep; Rounds, p; Wiggin, g. Substitution: Wiggin and Belmore for Smith; Scott for Cutler; Smith and Delaney for Rounds; Batten for Wiggin.

Score: Bates 10. Goals, Roberts 4; Cogan, 4; Smith, Wiggin. Referee, Proffitt. Timer, Carroll. Time, three 15-minute periods.

RHODES SCHOLARSHIP INCREASED

Fifty Pounds Added to Present Amount
 The General Secretary of the Rhodes Scholarship, through Dean Nixon of Bowdoin, who is the State Secretary, announces that there will be a temporary increase in the value of the scholarship. Until further notice, each holder of a Rhodes Scholarship will receive 350 pounds instead of 300 for each year.

A Bates man, John Powers of '19, will be among those men who will benefit by this latest ruling.

JORDAN SCIENTIFIC SOCIETY

The Jordan Scientific Society held its last meeting of the semester Wednesday evening. Mr. Buote presented a paper on the "Analysis of Rock," a practical and interesting topic not extensively dealt with in many text books. The second speaker, Mr. M. S. Johnson, dealt with the subject, "Applied Eugenics." The science of eugenics and the proposition of its application were very efficiently and vividly presented.

MONASTIC CHANGES

Another change has been made on the Campus. The large assembly room on the first floor of Roger Williams Hall has been transformed into a Faculty Room. Here the Faculty and committees of the Faculty meet from time to time to discuss matters affecting the students and the college in general.

Several long tables, arranged end to end, occupy the middle of the room. The inmates of Roger Williams Hall are allowed the use of one corner of the room for a reading room. Here is placed the furniture and piano belonging to the Hall Association. On the walls are hung pictures that should be of interest to all Bates men and women and to visitors on the Campus. Notable among these pictures are the two, one on each side of the fireplace, of the two presidents of Bates. On the left is the picture of President Chase and on the right the picture of President Cheney. Other pictures of former professors and benefactors of Bates are hung about the room. The room is large and well lighted and should make a very pleasant Faculty Room.

A SPORTING PROPOSITION

A Cornell Sun editorial in reference to the "cribbing" scandal at the university, says:

"The issue of cribbing and fraud in examinations has been usually argued from a purely moral standpoint. That, essentially, is the vital point of the issue. And yet, there is one phase of the whole question which many students have never considered. It is a direct appeal to good sportsmanship, which is itself a little code of honor.

"Look at it in this way. A professor maintains a certain standard in his course. If there is cribbing going on, all he sees is that certain poor students are passing his examinations. He immediately takes it for granted that his standards are not high enough, and proceeds to make his examinations more difficult. Then the result is that the hard-working, mediocre student—the plugging type—does not stand a chance of making the grade. That is the greatest of the purely physical evils of cribbing—it makes a goat out of the plodder who is playing a straight hand. Any man who is a party to a game like that is just a sporting tyro, regardless of whether or not he is rated as a gentleman and a scholar. That particular brand of rottenness works more injustice than is commonly believed. Any one who has seen a toiler handed a bust notice while a slippery-fingered gentleman receives a B in his work knows what cribbing really amounts to.

"Cribbing will exist here until it is banished by the undergraduate body. The introduction of a so-called Honor System will avail nothing where there is no honor to be systematized. But let the undergraduate sentiment become strong against unsportsmanlike procedure such as that which ended in the grand finale last June, and the word cribbing will become obsolete in Ithaca."

WE HAVE WITH US AGAIN

Tomorrow night Chase Hall movies begin again after a lapse of several weeks. The chief attraction will be "The Great Air Robbery" with Locklear in the leading part. It will be remembered that this daring actor lost his life shortly after making this picture. In this picture will be seen plenty of thrills. There will also be shown pictures of the Bates Commencement, pictures taken when Pershing was in Lewiston and at Bates, and two other reels besides. In addition to this group of pictures, the manager of our movie shows promises a novelty attraction, something that has never been done before at our movie shows. All out to the movies Saturday night!

REGISTRATION TABS

The Registrar's office reports a total registration of 506 students for the second semester. Of this number 227 are young women and 279 are men. James Young, who entered college last Fall will return for the second semester. A Japanese student, Kohe Nagakura, has registered also. Mr. Nagakura was an honor student at Westbrook Seminary, class of 1920, and comes here from Northeastern College.

THE STANTON ELM

Miles Greenwood, '91, has recently given the college an enlargement of the picture "The Stanton Elm." It was prepared by Mr. Greenwood from a smaller picture he took several months ago. In the foreground is the tall elm tree dedicated to "Uncle Johnny" while in the background can be seen the Bates Chapel. It is an excellent enlargement and shows great photographic skill on the part of Mr. Greenwood.

At present the picture is hanging in the reference room of Coram Library.

A CHALLENGE

THE STUDENT has received a communication from the Italy America Society which should be of exceeding interest to all of Bates possessing the least literary bent. The Society offers a trip to Italy during the summer vacation of 1921 as a prize for the best essay submitted by an undergraduate student of an American College or University on the subject, "Italy's Contributions to Modern Culture." This is a prize to struggle for, while the subject is such that the very task of composition should be a joy. Owing to lack of space we are unable to publish the full conditions, but these may be seen at any time by consulting the library bulletin board.

How is a Wireless Message Received?

EVERY incandescent lamp has a filament. Mount a metal plate on a wire in the lamp near the filament. A current leaps the space between the filament and the plate when the filament glows.

Edison first observed this phenomenon in 1883. Hence it was called the "Edison effect."

Scientists long studied the "effect" but they could not explain it satisfactorily. Now, after years of experimenting with Crookes tubes, X-ray tubes and radium, it is known that the current that leaps across is a stream of "electrons"—exceedingly minute particles negatively charged with electricity.

These electrons play an important part in wireless communication. When a wire grid is interposed between the filament and the plate and charged positively, the plate is aided in drawing electrons across; but when the grid is charged negatively it drives back the electrons. A very small charge applied to the grid, as small as that received from a feeble wireless wave, is enough to vary the electron stream.

So the grid in the tube enables a faint wireless impulse to control the very much greater amount of energy in the flow of electrons, and so radio signals too weak to be perceived by other means become perceptible by the effects that they produce. Just as the movement of a throttle controls a great locomotive in motion, so a wireless wave, by means of the grid, affects the powerful electron stream.

All this followed from studying the mysterious "Edison effect"—a purely scientific discovery.

No one can foresee what results will follow from research in pure science. Sooner or later the world must benefit practically from the discovery of new facts.

For this reason the Research Laboratories of the General Electric Company are concerned as much with investigations in pure science as they are with the improvement of industrial processes and products. They, too, have studied the "Edison effect" scientifically. The result has been a new form of electron tube, known as the "diotron", a type of X-ray tube free from the vagaries of the old tube; and the "kenotron", which is called by electrical engineers a "rectifier" because it has the property of changing an alternating into a direct current.

All these improvements followed because the Research Laboratories try to discover the "how" of things. Pure science always justifies itself.

THREE MINUTES FROM THE CAMPUS

FORTY-LOVE

THE YOUNG LADY ACROSS THE CAMPUS SAYS:

"I think it is so patriotic of the faculty to wear those garnet ties."

HOW MANY students noticed the Hathorn Hall weather vane one morning recently? It was after an abortive snowstorm and the snow had beaten against the southern side of the letters W and E, where it had frozen on and made them stand out clear white in marked contrast to the other points of the vane.

UNDER THE attractive heading: "The Dead Comes Back to Life," last week's issue of the Student printed a lengthy discourse on the Greek Department. Somehow we always suspected that Aristotle had nine lives.

ON ACCOUNT of the "Go-to-Church Movement," which was recently inaugurated we understand that several students have become so unselfish that they have conceived the idea of staying at home Sundays so that there would be more room for the new recruits.

WE RECENTLY noticed an advertisement of a "Cold-weather Starting Device," in one of the local newspapers. We venture to suggest that such a contrivance is hardly necessary in this climate.

RECKLESS SPECULATION is already in evidence concerning the results of Mid-year Examinations.

ISN'T THE war over yet? Well, that is was until Carl Rounds became our new Gym Instructor. Now we are convinced that war is H—, well you know, pretty bad!

WE ARE glad to know that there are some institutions worse off than Bates. A gentleman friend of ours recently sent up this interesting clipping: "Bethany College Girls Forbidden to Dance Even Among Themselves."

Bethany, W. Va.—Dancing at Bethany College is forbidden under a rule made public today by officials of the institution. Another rule informs coeds that they must be in the dormitory by 7 p. m. each night. The new dancing prohibition, or addition to reinforcing dancing between girls and boys, also prohibits girl students from dancing together, as well as boys.

Bethany college was founded in 1840 and has 500 students."

FROM A copy of the World's Almanac we extract this interesting computation of "How Life is Spent:" (It is an estimate of the account of an average man whose allotted span is three score and ten years).

Sleeping	23 yrs.	4 mos.
Work	19 "	8 "
Recreation and Religious devotion	10 "	2 "
Eating and drinking	6 "	10 "
Traveling	6 "	
Illness	4 "	
Dressing	2 "	
Total	72 yrs.	

THE AUDIENT STUDENT:

"Modern girls are very stupid."—Dr. Finnie.

"Just because a young man goes to college is no sign that he has received an education."—"Monie" Hartshorn.

"Milton was stupid in the classics."—Chamberlain, '22.

"Love is blind."—"Mex" Mansour, '22.

"I am in the class with Miss Hanscom and Miss Little."—Perkins, '22.

"The Slavs are a race of people."—Miss Hanscom, '22.

"I won't do it again."—Prof. Harms.

"Forty-Love column is not dignified enough for a college paper."—Prof. P.S.—Be sure you are right; but don't be too sure that everybody else is wrong.

MASS MEETING REVIVES ATHLETIC SPIRIT

Last Friday noon a monster mass meeting was held in Hathorn Hall to cheer the basketball team which was to meet Boston College that evening.

This was the first chance afforded the students to get together and cheer a Bates team since the close of the football season and the entire college turned out. After several cheers led by Robert Watts '22, Captain "Jack" Spratt of the basketball team was introduced and gave a short speech, in which he asked the support of every individual in college not only for this Boston College game but all others following it.
