BATES DROPS GAME TO HARVARD

Crimson Scored 6-2 Win in Baseball Opener

Rain prevented a "lucky seventh" or a "ninth inning rally" last Saturday at Soldier's Field, Cambridge, when Bates lost the first game of the baseball season to Harvard. For five innings and a half the result was doubtful for each team had scored twice. In the latter part of the sixth, however, the heavens opened, and dropped a lake onto the field. The half inning was completed, despite the downpour, and it proved disastrous for Bates for four Crimson runners crossed the plate when the ump called the game.

Wiggin's homer was acknowledged by all to be the outstanding feature of the day. Joe Cogan and Kennelly were the first two men to face Goods, the star Crimson twirler. Joe flied out and Bill was thrown out at first. Then the Garnet's captain gave the ball a ticket for a long ride during which he tore around the boys for the first home run of the season. "Wig" also crossed home again in the sixth when he and Moulton pulled off a clever piece of baseball strategy.

Cusick was on the mound for Bates and although somewhat inclined to wildness at times, his work was on the whole very commendable. When the flood broke loose, John found the pill unruly because of its moist condition, but prior to this event the big boy kept Harvard guessing.

The veteran outfield played a class of ball that speaks for another State pennant. The infield, though an entirely new combination, bids fair to equal the "million dollar" infield of last year.

The backstop position has been a source of some anxiety, but the manner in which Partridge played the receiving end dispels all lack of hope.

Conlon and Blair were the feature men for the Crimson. Owen, Harvard's first baseman, also smashed out a pretty triple.

The Summary:

BATES		HARVARD	
	AB R BH PO A E		AB R BH PO A E
Cogan, 2b	3 0 0 2 1 0	Conlon, ss	2 2 2 2 2 0
Kennelly, 3b	3 0 0 0 0 0	Thayer, lf	2 0 0 3 0 0
Wiggin, cf	3 2 2 2 0 0	Emons, cf	3 0 0 1 2 0
Langley, rf	3 0 2 3 0 0	Owen, 1b	4 0 1 4 1 0
Moulton, 1b	3 0 0 5 0 1	Buell, 3b	3 0 0 0 1 0
Finnegan, ss	3 0 0 1 1 0	Crocker, 2b	2 0 1 1 0 0
Ebner, lf	2 0 0 2 0 0	Janin, rf	3 1 0 1 0 0
Partridge, c	2 0 1 3 1 0	Blair, c	3 2 2 7 1 0
Cusick, p	2 0 1 0 4 0	Goode, p	3 1 1 0 1 0
Total	24 2 6 18 7 1	Total	26 6 7 18 8 0

Innings:
 Bates 1 0 0 0 0 1-2
 Harvard 1 0 0 1 0 4-6

Two base hits, Blair. Three base hits, Blair, Owen. Home run, Wiggin. Stolen bases, Conlon, Buell, Thayer. Base on balls, off Cusick 7. Struck out, by Goode 5. Time, 1 hour, 20 minutes. Umpire, McLaughlin.

Do you know that one fourth of the human race lives in China, the largest single homogeneous mass of humanity in the world?

BATES DANCE COMING

Bates people are looking forward to a student dance, Saturday evening.

The committee in charge of the arrangements is Mr. Hall, Edward Canter and Howard True.

The April Amble, as the dance has been named, is to be held in Beacon Hall. The committee are planning distinctive decorations. The orders they issued recently are very novel.

As formerly, a caterer will have charge of the refreshments for the evening.

A specialty is to be introduced at intermission. An unusual feature is to be presented.

The music will be furnished by Meleur's orchestra.

The patron and patronesses of the dance are Mr. and Mrs. H. A. Coffin, Mr. and Mrs. Earl Record, Mr. J. J. Butler, Miss Mary Murphy and Mrs. Fred McCarty.

TENNIS SEASON OPENS

VARSITY PREPARING FOR STIFF SCHEDULE

Everyone who owns a tennis racket and knows a tennis court from a baseball diamond, should get out their rubber-soled shoes and answer Capt. Woodard's call for tennis candidates on the college courts.

Of last year's team which entered the intercollegiate Capt. Woodard, Roberts, Purington and Lesieur are back. These men last season lost the dual meet with Bowdoin, 5 matches to 1, and tied with Colby at three matches each. In the intercollegiate the doubles proved to be Bates' strongest forte, Roberts and Lesieur getting into the finals, only to lose to Partridge and Bishop of Bowdoin.

Besides the men above mentioned, Elwood Ireland, a former letter man in tennis, has returned and will make a strong bid for a place on the team this spring. Thompson '22, is another excellent player, and Stanley, the freshman who lost but five games in the class tournament last fall, will be a promising team candidate if baseball does not interfere with his tennis practice.

Roberts, judging by the tennis he played at Squirrel Island last summer with Edward Purington '19, four times Maine Intercollegiate champion, looks good to hold down No. 1 on the tennis team, with the others evenly matched. The schedule calls for several home matches, which should be of interest to the student body. Bowdoin with Fisher, the former Hebron star, eligible to the team, looks to be as strong, if not stronger than last year.

This spring's schedule as arranged by Manager Avery is as follows:

- May 11—Bowdoin at Lewiston.
- May 16-17—State tournament, Lewiston.
- May 21—Colby at Waterville.
- May 23-24—New England meet at Longwood.
- May 27—Boston University at Lewiston.

Do you realize that one Bates man, Wayne Jordan '06 is giving his life to China? When the Bates-In-China drive takes place, show that you appreciate this fact.

CHAMPIONSHIP DEBATES TODAY

PREP SCHOOLS CONTENDING FOR STATE TITLE IN BATES LEAGUE

All the preparatory schools represented in the Bates Interscholastic Debating League are meeting today in the grand contest of the debating year. The schools included are: Portland High School, Deering High School, Waterville High School, Buckfield High School, Livermore Falls High School, Houlton High School, Maine Central Institute, Leavitt Institute, Foxcroft Academy, Eastern High School.

Each of these schools has sent to Bates two teams which arrived at 10 o'clock this morning. The debaters have been arranged in duals or if any of the teams have failed to arrive, in tri-angles. The semi finals were held this morning simultaneously in Libby Forum, Hathorn, Chase, Roger Williams, and the Chapel. The finals will be held this evening. A school in order to be eligible for the finals, must win both debates. In case three schools win, there will be two debates in the afternoon, one at 2:30 and one at 4:00 p. m. In such event, the final will be held in the evening as planned.

In the evening the winner will be announced, and the cup, now at Deering, will be re-awarded. Following the debate, there will be an informal "hot air" reception in Chase Hall, and all the debaters will be initiated into The Gavel Club, a new Bates organization for the Interscholastic Leaguers. All Bates men are invited to the contest, and it is hoped that they will unanimously support these future possible platform giants for Bates.

BATES MEN ATTEND HARVARD CONFERENCE

On Friday, Saturday, and Sunday last, one hundred and fifty men from the eastern colleges met at Harvard University for the purpose of discussing the advisability of entering the Christian ministry. To this conference Bates sent Steady, Mitchell, and Littlefield.

Such men as President Lowell of Harvard, John Moore, Dean Rousmaniere, George Horr, Prof. W. H. Hatch, and Prof. Daniel Evans, men who mean much in Christian circles, presented the case for the ministry. They showed the men the comparison of the ministry with the other professions in opportunities for service, freedom of action, need of workers, and individual satisfaction.

They satisfied the delegates that the Christian ministry offered to men the greatest chance for effective life service. They did not fail to emphasize that it was the work of a real man, demanding all that a man could give. The Bates delegates returned well satisfied at a most profitable period of conference.

CONFIDENCE

"100 PER CENT. LOYALTY TO BATES IN CHINA"

This is the slogan for the Bates-In-China drive, which comes next week. Upperclassmen will remember vividly the enthusiasm and success with which the project went over the top a year ago last December. A total of more than \$1200 was raised at that time for the Bates-In-China fund and the Des Moines Conference. The amount to be raised this year is \$1,000.

While Bates started in on the Bates-In-China project last year only, yet the idea itself is not an untried one. Yale, Princeton, Dartmouth, Brown, Oberlin, and other colleges in the country are carrying on work in foreign countries.

Bates may, however, claim to be one of the pioneers in the movement. We have especial reason for pride in the fact that one of our own men, Wayne C. Jordan, '06, is secretary of the Y. M. C. A. in Wuchang, where our money goes. Wayne Jordan is the son of Professor L. G. Jordan, whose death we mourned so recently. The Bates-In-China idea was especially pleasing to Professor Jordan, and it would delight him to know that we are going over the top again this year.

What Is Bates-In-China?

Bates-In-China is a share in the work of the Young Men's Christian Association in Wuchang, China. Our money goes directly to the support of Mr. Jordan. Wuchang is a city of more than a million people. In this city there are twenty-five different colleges and institutions of learning, with a student enrollment of 7,000. These students are the men who in the immediate future will be the leaders and directors of the most populous nation in the world. The stand which China is to take toward democracy and Christianity will depend largely upon the support given to such work as carried on in the Wuchang Y. M. C. A.

A Glimpse at Bates-In-China

As a result of the recent membership campaign in the Y. M. C. A. in which we are interested, the membership was increased by 200%, making a total membership at the present time of nearly four and one-half thousand members. The spring Bible study enrollment was equal to one-third of the membership, or nearly two thousand. Nearly as many as were in the Bible classes were reached by educational classes in and out of the building. As many more were touched in the recreational program.

The program of work carried on at the Wuchang Y. M. C. A. is thoroughly up-to-date and adapted to the needs of its members. It includes religious work, such as Bible Study classes, weekly religious meetings, etc. Educational work brings in lectures in schools, teaching of music and singing, teaching of the phonetic Chinese language. The physical department runs tournaments in various branches of athletics, conducts hygiene lectures, and trains leaders among the Chinese themselves. Social work and social service are an important part of the "Y" program, with trips to factories, promotion of better living conditions, etc. In every respect the Y. M. C. A. at Wuchang and such cities in China is thoroughly modern, similar to the work of large American Associations, such as those at Boston and New York.

Bates men and women should realize the fact that we have an opportunity to take part in a great work. The channels into which the strength and energy of a nation of 400,000,000 are to be turned will count heavily in the future of the world. What do you say? Let's put this Bates drive for a Bates man in Bates-In-China across!

MILITARY SCIENCE HOLDS OPEN MEETING

FIRST OF SERIES OF LECTURES ON WORLD WAR

Dr. Tubbs delivered the first of his series of five lectures on the World War before the Military Science Club last Thursday evening. He began with the first attack made by the Germans, August 5, 1914, resulting in the capture of Liege, which was surrounded by steel forts, pronounced safe from destruction for at least six months, by the best French military engineers. In spite of their seemingly impregnability, the Germans, by means of their powerful Skoda guns, utterly destroyed all the forts in three days and their way was practically clear into the heart of France. This battle was a glaring example of how the "element of surprise" often necessitates an abrupt change of plans and often causes disastrous confusion.

Dr. Tubbs paid special tribute to General Joffre, who at that time was placed in command, saying that "no where in history can a general be found who could so successfully keep the morale and the fighting spirit of men in time of retreat."

During the lecture a map of the war zone was used and the cities where the German and Allied troops were stationed, were pointed out. This showed the importance of the city of Verdun, the "Key to the situation," which served as a hinge for the entire line of combat. The significance of the Battle of the Marne was also noted. Dr. Tubbs also clearly explained the meaning of a "classic battle."

The Eastern front was also reviewed and again the "element of surprise" was quoted to show the celerity in which a large Russian army was mobilized, much sooner than the Germans believed possible.

In closing the speaker suggested several positions which the Germans might have attacked at the beginning of the war in preference to Liege, with greater military advantage. He criticized the Germans severely for entering France by the way of Belgium and their harsh treatment of the inhabitants which condemned them in the eyes of the world.

In summing up his remarks Dr. Tubbs said, "I bring these possibilities before you because by thinking of what might have been done, we learn most about Military Science."

At an adjourned meeting the Club unanimously voted to hold open meetings for the rest of the semester. All who are interested are cordially invited to attend.

1924 PARTY

Friday evening, March 28, the long delayed Freshman Class Party was held in Chase Hall. Many of the 1924 men and women were on hand. Games were played and refreshments served. Walter Garigan entertained with a dancing act, while "Huck" Finnegan offered a solo or two.

Coach and Mrs. Johnson, and Mr. and Mrs. Sawyer were present.

An old lady after waiting in a confectionery store for about ten minutes, grew grossly impatient at the lack of service. Finally she rapped sharply on the counter.

"Here, young lady," she called, "who waits on the nuts?"—Everybody's Magazine.

EDITORIALS

WELCOME TO BATES, FRIENDS!

To all the debating representatives of preparatory schools which are to-day contending for the state championship, Bates offers her most hearty welcome. We are glad to have the opportunity of extending the courtesies of our campus to these friends of Bates, and we sincerely wish them to feel that "the latchstring is out" wherever they may desire to go.

The presence of these various teams is in itself an indication of success and achievement on their part, for every one of them has emerged a victor from the preliminary contests. To-day, by further processes of elimination, will be selected the champions of Maine, to whom Delta Sigma Rho will award a suitable trophy in the form of a cup. But to each and every debater, alternate, and coach, Bates offers her congratulations for tedious work well done and adds to this her best wishes for further success next year.

It is our greatest hope that our visitors may have so enjoyed their brief stay on our campus that they will return and keep alive the many new friendships which we are sure they have formed. Bates has appreciated their presence, and awaits with pleasure their early return.

THE GOVERNOR'S VETO

By vetoing the act providing for funds to be used in the work of Bates, Governor Baxter has severed a bond between this institution and the state which has long endured.

The relationship between the State of Maine and Bates first came into being with the granting of a college charter to this institution in 1864. From that time on, these parties have done much for mutual betterment.

Bates has rendered no mean service to the state during her comparatively short life. With a student body of which approximately seventy per cent. are Maine residents, Bates has provided teachers in practically every secondary school in Maine. Leading the country in providing the first opportunities for women's higher education, Bates has maintained steadily her ideals of offering culture to those of slender means. Her graduates have been honored and useful members of the commonwealth, and her students have brought fame and distinction to the state.

Recognizing these merits, the state has proved its satisfaction by financial aid in the past, notably in the case of the heating plant now in operation. The whole history of Bates' relations with the state has been one of generous co-operation on the part of both organizations. Hence it is that those conditions of the present which forbid a continuance of this relationship are much to be deplored.

In no way do we censure the Governor for his action, taken as it was in the face of the need of retrenchment. Our sole regret is that the excellent partnership between our college and the state must for the present, at least, be inoperative.

But the needs of the college must be met, and while the alumni can do much to alleviate conditions, there will still be a void. Cannot the municipalities about us lend some aid, as has been suggested in the local press? Perhaps they might furnish the needed assistance to this college which has surely worked to their advantage. Whatever the solution of Bates' problems, it well behooves her friends to take heed and see that that solution is speedily found.

OUR GRADUATES

With quiet faith, and patient, brave endurance

With love that fears not either pain or death.

In the death of Mrs. Ruby Estelle (Hopkins) Wiggin, the Class of 1907 has lost a dearly loved member. Always cheerful, even-tempered, sweet-spirited, she won and held the friendship of all who knew her. She was a sincere Christian and quietly and unassumingly she made her influence felt. Cheerfully and uncomplainingly she worked her way through College, for the first two years living outside the campus to earn her board and room. I remember how happy she was when she was able to live at Cheney House and have more time for the college life and the atmosphere she loved.

She taught with success after graduation, and later married Mr. Howard A. Wiggin '06. She made her home a quiet pleasantness and cheer and was a rarely beautiful and wise mother to her four little children. It was the writer's privilege to see her on a day last summer, and the impression of graciousness and loving kindness which she left will always be a beautiful memory and inspiration.

She passed away Feb. 23, in the hospital at Forrest Hills, Mass., leaving an infant daughter five days old.

1902—Mrs. Edna Gosline Wilson, formerly of '02, is critic of Freshman themes and house-mother at Arcadia University.

1908—In the Journal of Education for March 3, there is an interesting article by the editor, A. E. Winship, on Valparaiso University, of which Daniel R. Hodgdon, Bates '08, is president. "The aim and purpose of the new Valparaiso University is to make responsible citizens who are of immediate practical value in economic life. Its keynote is 'loyalty and industry.' It aims to Americanize home industry and thus acts to check disrupting radical forces in economic and social life. Its students are practical, producing economic features in industry from the day they enter the course."

1886—Fred H. Nickerson of Medford, Mass., has been elected superintendent of schools at Quincy, Mass., at a salary of \$5,500.

1919—John H. Powers, third Rhode Scholar from Bates, has been admitted to Senior standing at Trinity College, Oxford.

1903—Dr. Lester Trufant is now located in Oberlin, Ohio.

Rev. C. N. Eliopoulos, who is engaged in Americanization work in Maine, under the auspices of the Congregational Society, will go to Waterville and Augusta in addition to the places he already visits, namely, Lewiston and Auburn, Portland, Biddeford, Saco and Bath.

The Mississippi Valley Bates Alumni Association will hold a meeting at the Hamilton Club, Chicago, on March 18. President Gray will be the guest of the Association.

1893—Professor George M. Chase attended last week a celebration of the 100th Anniversary of Greek Independence, under the direction of the Greek Brotherhood of Portsmouth, N. H. The Mayors of Portsmouth and Newburyport and Bishop Parker of New Hampshire were present.

1913—Mr. and Mrs. Walter Curtis (Ruby Whitehouse, '13) have a little daughter, Mary Esther, born April 7.

1896—Professor Fred A. Knapp represented Bates at the annual meeting of the association of Colleges and Secondary Schools at Exeter, N. H., April 1 and 2.

1888—Henry Wilder Hopkins died at his home in Hallowell, Maine, on March 31, after a long suffering with ill health. After his graduation from Bates he entered the teaching profession and later the employment of the Lothrop Publishing Company of Boston and A. Q. Adams and Co., Boston. Because of illness he was obliged to give up the work that he enjoyed. He was always a most loyal alumnus, exceedingly interested in the welfare of his college. He was an earnest Christian and of the stuff of which heroes are made. He has left his college a bequest of \$5,000 and has made it his residuary legatee.

SOME — — — —

I sat by my desk at midnight,
Outdoors it was drizzling fine
But there in that quiet and silence
A thought stole into my mind.

A new president has come to Bates College.

A man by the name of Gray
Now boys, the good old muse is with me
So listen to my lay.

He lives just off the campus
But at night he is prone to roam
We think perhaps 'twould be better
If at night he stayed at home.

He fusses and fumes and bellows
He walks in a way debonair
He has several funny expressions
But believe me boys he's there.

He is different, very different
From the man we used to love
But time, you know, changes every-thing
We must trust in the God above.

He doesn't lead us, he drives us
He is businesslike I vow
But when is it best to be driven
When we're alone in the world, or Now?

When is it best to learn business
When perhaps our chance is done
Or to learn it here and now
And at the same time have some fun.

I think 'twould be better for all of us
To get in the game and work
And not mark time and wonder
If perhaps the new system will work.

We had best do our part and wait
For that grand and glorious day
When Bates College will lead them all
Under Clifton Daggett Gray.

—Ezra Dusenberry.

DYNAMITE

Chase Hall movies marked the calendar again the first Saturday night after vacation. The picture that attracted the most interest was the two reel comedy "Dynamite." After following the thrilling(!) adventures depicted in the picture, tracing the history of Benzene and Magazine, everybody at the movies had had a good laugh. Bessie Love was the actress of the main picture, while an educational film on the care of the teeth was shown.

YOU HAVE WRITTEN POEMS!

Do you care to have them revised or constructively criticised by successful authors? If you do, then send us your manuscript (stories, articles or poems). We will criticise, and place them should they prove to be acceptable for publication.

There is no actual charge for our services. If, however, you have not previously enrolled with the advisory department of this association, we request that you enclose the initial fee of two dollars, which we must ask of each new contributor. There is no additional expense, no future obligation.

It must be realized that we can only be of aid to those of serious intent. If you do mean to strive for literary success, we can help you in many ways. Our services are yours until we have actually succeeded in marketing at least one of your manuscripts. Send something today!

Please enclose return postage with your communications.

LAW

THE BOSTON UNIVERSITY LAW SCHOOL

Trains students in the principles of the law and in the technique of the profession so as to best prepare them for active practice wherever the English system of law prevails.

America's new place in international politics and commerce challenges the young American.

He must equip himself for new world conditions with a knowledge of legal fundamentals. LAW—its principles and application to all business is almost as necessary to the coming business man as it is indispensable to the lawyer.

Special scholarships (\$75 per year) are awarded to college graduates.

Course for L.L.B. requires 3 school years. Those who have received this degree from this or any other approved school of law may receive L.L.M. on the completion of one year's resident attendance under the direction of Dr. Melville M. Bigelow. Several \$25 and \$50 scholarships open in this course.

THE POPULAR PROFESSOR

WHAT DR. TUBBS OFFERS IN GEOLOGY

An article dealing with the geology department at Bates would be far from complete without some extended reference to its head, Dr. F. D. Tubbs. No one can remain long on the campus without coming in some direct or indirect way into touch with the wonderful and kindly personality that is his. Since his connection with the college began some fourteen years ago, over a thousand graduates have come into intimate contact with him in classroom and study. In 1912 Dr. Tubbs introduced into Bates for the first time in an American college, the study of human geography, a study now taken by over seventy of the present senior class. Respected for his vast store of cultural and practical knowledge, a man whom one can consult on personal matters with the knowledge that he

Doctor Frank G. Tubbs

talks with a friend, it is not to be wondered that his classes are full and that year after year finds him voted the most popular professor.

Dr. Tubbs makes it a point in his geology classes to emphasize the cultural side and, above all, the human interest, the real connection of his subject with human life.

Students in his classes who for the first time are grappling with infinite subjects, are made to feel that the aim in life is mental growth, the power of receptivity, and careless indeed is he who leaves his courses without having gained unconsciously in mental power and moral depth. Through the mazes of topics dealing with millions of years, ones of time, limitless space, we gain a conception from the teachings of Dr. Tubbs of the greatness of man rather than his atom like smallness in physical comparison with the universe.

Not the least interesting phase of this department is the geology walk or trip. Under the tutelage of the instructor, trips to stone quarries, local rock prominences, and various physical adds much to enjoyment in travel to land features within the radius of a few miles from Lewiston are taken. It adds much to enjoyment in travel to be able to glance casually at a boulder and discover from its lined surface that thousands of years ago an enormous mile-high sheet of ice left its signature here in its powerful passage southward. "Sermons in stones", takes on a new meaning after one has systematically studied the rocks and outstanding characteristics of a country side.

It is planned to have, as part of the annual Jordan Scientific Exhibition, a display of geologic specimens; this will consist of the varied laboratory work of the department, and will be supervised by the genial Mr. William Hodgman.

From the students viewpoint, a course which fails to touch his own life and personal thought is a grind, to be approached with midnight study, green-shaded eyes, and a feeling of rebellion. At the furthest extreme lies the whole idea behind the geology teachings of Dr. Tubbs, the idea of self-growth, of life-study of the subject because one's interest is awarded, of that most elusive of things, the "human touch," as applied to a college curriculum course. That explains the crowded classroom and close attention present in every study-group under the most popular prof. Dr. Tubbs.

GEORGETOWN DEBATE STILL UNSETTLED

Difficulty in Reaching Suitable Terms
Judging by present indications, the proposed debate with Georgetown University will not occur, because of the difficulty of finding suitable terms for the debate.

As will be remembered, some time ago a challenge was received from Georgetown for a debate with Bates. Bates being the party challenged submitted terms, as is the custom in all duels. Georgetown, however, sensing the honor that she was doing Bates in challenging her, evidently desired to fix the terms herself. In reply to the proposition that the debate be held in Lewiston, the University desired that it should be held in Washington. They most generously offered to pay \$75 of the expenses of the Bates team, however. Inasmuch as this amount would nearly pay half the expenses of one man, the Council was overcome with gratitude—and other emotions.

In regard to Bates' stand that only undergraduates should take part Georgetown reported that she must use her law school men; otherwise, we suppose, she would have less chance to win. That was to be her handicap, as it were.

Finally, the Southern university wanted some other college to submit a question, instead of having one of the interested schools choose the question and the other the side, as is the custom. On the whole, Georgetown was willing to carry out their challenge, provided they could have the terms made to suit themselves.

The council authorized Professor Baird to reply to Georgetown that the terms which we had submitted as the party challenged were the terms by which we would debate. As yet no reply has been received from Georgetown, but it seems doubtful if terms that will be satisfactory to both sides can be arranged.

ATHLETIC ELECTIONS

The elections for the athletic board for 1921-1922 resulted as follows:
President—Beatrice Clark '22
Vice President—Helen Hoit '23
Secretary—Vivian Milliken '24
Hockey Manager—Alice Crossland '23
Volley Ball Manager—Alice Jessamine '23
Basket Ball Manager—Ruth Cullens '22
Soccer Manager—Wilhelmina Fiene-man '22
Track Manager—Muriel Wills '22
Tennis Manager—Nellie Milliken '23
Senior Member—Vivian Wills '22
Junior Member—Alison Laing '23
Sophomore Member—Mildred Stevens '24

A SPRING COGITATION

If a pair of red lips were turned to your own
With no one to gossip about it,
Would you pray for endurance to leave them alone?
Well, maybe you would, but I doubt it.

If a shy little hand you're permitted to seize
With a velvety softness about it,
Do you think you would drop it with never a squeeze?
Well, maybe you would, but I doubt it.

If a trim little waist were in reach of your arm
With a wonderful plumpness about it,
Would you argue the point about the good and the bad?
Well, maybe you would, but I doubt it.

And if by these tricks you should capture her heart
With a wonderful sweetness about it,
Would you guard it and keep it and play a good part?
Well, maybe you would, but I doubt it.

Selected.

Mixed Relations.

Two microbes sat on a pantry shelf,
And spoke in accents pained,
As they watched the milkman filter the milk,
"Our relations are getting strained."
—Exchange.

"Really, it's rotten. Fawther says I cawn't have a new caw this year. Well, Sherman was right!"
"I suppose you are referring to the Anti-Trust-Law."
—Exchange.

A young lady from far Nicaragua
Went out to ride on a jagau.
Her mamma in alarm
Said "pray don't come to harm,"
But she said, "Oh mamma, what a wag you are."

PHIL-HELLENIC ELECTS

At a meeting of the Phil-Hellenic Club held before the Easter vacation, the following officers were elected for 1921-1922.
President: Clarence Forbes, '22.
Vice President: Marion Earle, '23.
Sec'y and Treas: Izetta Lidstone, '22.
Chairman of program committee: Carl Purinton, '23.

Disgusted Professor—What did you come to college for, anyway? You are not studying.
Bobby Rahrah—Well, mother says it's to fit me for the Presidency; Uncle Jim, to sow my wild oats; sister Helen, to get a chum for her to marry; and dad, to bankrupt the family.
—Boston Transcript.

Statement of the Ownership, Management, Circulation, etc., required by the Act of Congress of August 24, 1912.
Of The Bates Student published weekly at Lewiston, Maine for April 1, 1921.
State of Maine, County of Androscoggin, ss.

Before me a Notary Public in and for the State and County aforesaid, personally appeared B. Waldo Avery who, having been duly sworn according to law, deposes and says that he is the Business Manager of the Bates Student and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc. of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:
Publisher: Merrill & Webber Co., Auburn Maine.
Editor: Robert B. Watts, Lewiston, Maine.
Managing Editor: Lawrence D. Kimball, Lewiston, Maine.
Business Manager: B. Waldo Avery, Lewiston Maine.

B. WALDO AVERY,
Business Manager.
Sworn to and subscribed before me this 24th day of March, 1921.
HARRY W. ROWE,
Notary Public.
My commission expires Sept. 8, 1927.

Who Was Moseley?

HE was a young Oxford man, only twenty-seven when he was killed at Gallipoli. Up to his time, man had never seen the inside of an atom. He turned the X-rays on matter—not figuratively but literally—and made them disclose the skeleton of an atom just as certainly as a surgeon makes them reveal the positions of the bones of the body. Moseley proved that all atoms are built up of the same kind of matter. He saw, too, just why an atom of copper is different from an atom of gold.

Atoms are built up of electrons. Each atom consists of a nucleus, a kind of sun, with a certain number of electrons grouped about it, like planets. Moseley actually counted the number of electrons of all the metals from aluminum to gold.

When you discover what gold is made of or a new fact about electricity, you open up new possibilities for the use of gold or electricity. For that reason the Research Laboratories of the General Electric Company are as much concerned with the "how" of things—atoms and electrons, for instance—as they are with mere applications of the electric current.

Hence Moseley's work has been continued in the Research Laboratories, with the result that more has been learned about matter. How does water freeze? What is lead? Why are lead, iron, gold and tungsten malleable? Such questions can be answered more definitely now than ten years ago. And because they can be answered it is possible to make more rapid progress in illumination, in X-ray photography, in wireless telegraphy, and in electrical engineering as a whole.

There would have been no coal-tar industry without the vast amount of research conducted in organic chemistry, and no electro-chemical industry without such work as Sir Humphrey Davy's purely scientific study of an electric current's effect on caustic potash and caustic soda. Sooner or later research in pure science always enriches the world with discoveries that can be practically applied. For these reasons the Research Laboratories of the General Electric Company devote so much time to the study of purely scientific problems.

**LOVE ANALYZED
DISSECTED, LABELED
AND CANNED**

FAMOUS PHILOSOPHER HANDS
OUT HOT STUFF!

Hoboken, N. J., April 18

When the Olympic doeked today, crowds of reporters swarmed aboard to interview Dr. Josef Musterole, who occupies the E. Z. Chair of Philosophy at Munich. The doctor was backed into a corner by the writer, and when asked to spill a little dope on his favorite topic, Love, delivered the following:

My dear sir, love in the hands of a philosopher becomes a mere mess of sensations, associations, Romance? Raus mit it! Well do I remember my first love affair. I was about twelve, and was on my way to school, when Sophy Goldslaw looked me straight in the eye and said, "My, what a monkey-faced runt!" My attention was immediately drawn to Sophy, and felt a warm glow suffice my face. I was in love. Thus you see how little things start the mighty potent force of love.

Love to some is like Crackerjack—the more you eat the more you want. Love never comes to some, because, like Postum, there's a reason. Beauty and good looks are not essential to awaken love in the heart of a fool—but it will be noticed that the lady with the in-crowling nose or the chap with the un-south teeth draws a blank in the lottery of love.

Symptoms of which to know when Love has knocked? Well, if your backroll diminishes rapidly, if your left auricle stutters when She or He is near, if you can see her in the kitchen in the early morning with eyes still full of devotion, or hear him when the necktie sticks in the collar and still respect him,—then you are in very deep.

My dear sir, love is simply a reaction. Some little thing draws the attention a smile, a wink or possibly a mole, and around this, one starts building associations until one takes the ultimate drop and proposes. How true, my dear sir, that man proposes and women disposes! I have studied my own experience in the interests of science, and know whereof I speak.

Sensation and love are closely linked, my dear sir. You yourself are probably aware of creating a sensation when osculating, if I may use a scientific term. Osculation to the thief of time, as you must have observed if you have ever heard the fall clock strike one A. M. and so forth. I would suggest that in connection with this topic you consult that philosophic book, "Arms and the Man", which embraces a good deal of er-material.

Here the writer observed a lady of dreadnaught draught bearing down on the professor, evidently under a full head of steam. With a hurried nod Professor Musterole introduced his wife to the reporter, then walked off meekly in the shadow of his philosophical experiment.

OUTING CLUB PROGRAM

AN INDUCEMENT TO POSSIBLE
NEW STUDENTS

The past year the Outing Club has advanced by leaps and bounds. And this in spite of a Florida winter. When you go home this vacation and are talking to prospective students don't fail to mention the fact that Bates has something other Colleges do not have—a real live Outing Club. Many who are possible prospects like to hike on snowshoes or skis. Why not remind them that the Bates Outing Club promotes just those things which they like. Other colleges don't do this. How many institutions have any such prospects as we have for fine gala carnivals year after year? Then there is the annual spring hike to Mount Washington. This year it will come the latter part of May. d the prospects are fine for a big crowd to go up the Mountain. You like to get out in the open, why not suggest the possibilities of such things to possible future students.

Next year the entire program of the Club will be enlarged. Already new equipment has been purchased for next year's use. The Club will go big next year, and it will make Bates go big—tell the youngsters!
