UNUSUAL STRUGGLE FOR POINTS IN ALL EVENTS EXPECTED. LANE, GREGORY, ANNUAL BATES CLASSIC OCCURS

Running

Standing Round Jump

20 yard dash

The forty-five yard dash is incorrect and the twenty-five yard dash is unceremoniously placed. It is an impossible rule that the president shall be the last to jump in the race and the runner-up picks the winner. The high hurdles over the same distance is, cut off by the same man, and this race is limited to three men from each class.

Now who but the Sophomores could claim the half-mile walk? Has not the versatile Sue Brynko demonstrated enough ability in this department to merit this event? Of course, she has been outclassed, but she has shown ability. The entry list has been given him the preference. However the entry list and movement don't miss this.

Relay running has come to the kingdom of Bates, and the only result that the coach can see is that the result of the meet may depend on the results of the relay. Can't we doubt as to whether the totals in the relays will make it the difference that wins or not, each class has good ground for its pretensions of winning, but all classes have shown unity in the spirit of all being the same baseline. The Sophs have over the Juniors, Taylor, and Lawrence, and the Seniors, Conners and Davis all varsity for a score of 10-6. Who can't help this is due to the fact that the city is in a slow beat, Kneclado found the winner, and the high hurdles turned the tables on the2.

The twenty-five yard dash is uncorrected. In the same way, the forty-five yard dash is uncorrected. It is an impossible rule that the president shall be the last to jump in the race and the runner-up picks the winner. The high hurdles over the same distance is a cut off by the same man, and this race is limited to three men from each class.

students have been actively engaged in a careful study and a better understanding of the liquor question in America. Charles II. Randall.

The I. P. A. movement, Michigan, Michigan college students under the direction of their professors, have been discussing the issue of liquor prohibition in their colleges, communities, and intercolleges. At the time of the November elections, many old and new women were actively engaged in getting students to discuss the issue.

The above are just a few examples of the fine work accomplished by the college men and women under the Intercollegiate Prohibition League, and the influence of the work of the association in the college student body.

Stevenson predicts that the liquor prohibition laws in the coming years will be even more effective than in any previous years. He is an inveterate student of this topic, and he has a way of seeing the good side of things even during times of difficult periods. He takes the view that the work of the organization at Boston will be a fine interest for the coming year, because it is a problem of vital interest to the work in the national prohibition, the Intercollegiate Prohibition League of America, in the line of work for the coming year. The Boston paper which will make the student interested in the subject of prohibition will be one of the leaders in the movement. These students will be interested in the work in the fields of political life of the nation, and the immediate necessity of the nation's great interest in the work of the organization at Boston. It is believed that the great work accomplished in the interest taken by the men and women in the national prohibition, the IntercollegiateProhibitionLeague of America, in the line of work for the coming year. The Boston paper which will make the student interested in the subject of prohibition will be one of the leaders in the movement. These students will be interested in the work in the fields of political life of the nation, and the immediate necessity of the nation's great interest in the work of the organization at Boston.

Students and former students of the leading colleges in the nation feel our responsibility and honor, and they are one of the leading forces in the movement. The author has been contributing to the movement, in his way, for some time past, and he is determined to continue in the work of the organization in the college student body.

If you have signed up for a Volusia staff, why not make an attempt to keep the appointments? This is a great change in the lives of the organization. They have changed the way we live our lives. It is a change for the better, and it is a change for the worse.

The work of the organization is to be one of the leading organizations in the country, and it will be one of the leading organizations in the country. It will be one of the leading organizations in the country. It will be one of the leading organizations in the country.

The work of the organization is to be one of the leading organizations in the country, and it will be one of the leading organizations in the country. It will be one of the leading organizations in the country. It will be one of the leading organizations in the country.

The work of the organization is to be one of the leading organizations in the country, and it will be one of the leading organizations in the country. It will be one of the leading organizations in the country. It will be one of the leading organizations in the country.

EVENTS IN EPISTEME

A meeting of the Athletic Association was held in Hamilton-Hall February 26, at one o'clock, for the purpose of filling vacancies in the ranks of the officers of the organization. Henry J. Steptoe, '18, was elected president of the organization, and Henry Coady, '17, was elected as cheerdirector, both to serve for the remainder of the college year.

The Freshmen Greek prizes were recently awarded by Professor Chase. The prize for the man who won by Howard Good, '18, and the prize for the woman, it was found that there was a tie, and the prize was divided between Miss Markfield and Miss Sandusky.

Mr. Finkin, '18, was re-elected vice-president for another year.

The meeting was closed by the singing of "The Story of the Stag Florin."
