STUDENT BODY

A. C. W. D. C.

In the last three years, excellent labor history and library facilities. Up-to-date methods in teaching with life on the sea. The blend of history and literature. In the senior class, students will be able to choose from a wide variety of courses designed to meet the needs of the individual student. The Bates Y. M. C. A. has been an important part of the college life for many years. It is now housed in a new building which is larger and more modern than the old one. The new building includes a fine auditorium, library, and study rooms. The Bates Y. M. C. A. also sponsors a number of activities for its members, including debating, music, and athletics. The college has a strong band that performs at all pep rallies and sporting events. The college newspaper is a source of information about student life. It is published weekly and covers a wide range of topics, from campus news to national events. The college has a strong tradition of service to the community. Students are encouraged to participate in volunteer work and other community service activities. The college also has a strong alumni network, which provides support and guidance for current students. Bates College is a great place to study, live, and grow as a person. It is located in Lewiston, Maine, a city that offers many cultural and recreational opportunities. Overall, Bates College is a wonderful place to be, and I highly recommend it to anyone considering a college education.
