COLD WEATHER ANNOUNCES APPROACH OF HOCKEY SEASON

EXEMPLARY PREP FOR WINNING TEAM

The football season is over, and now comes the time that formerly was the keeping fit time for our Blinkers, but now hockey has its inception last year. This year the Blinkers are starting the interest in a grand way, and we shall see great work as always. Our hockey season proper came into its own late last year, and now the war has greatly changed the conditions of the game. This season we are therefore glad to have some new faces among the skaters.

The hockey teams now going strong at Bates are the following:

1. Maine State Developmental
2. Maine State University
3. Bates College

The Maine State Developmental is the most successful of the three, having won several games already. The Maine State University is next in line, while the Bates College team is the least successful of the three. However, they are all showing great promise.

EDWARD B. STILES ADDRESSES MEMBERS OF Y.M.C.A. ON "THE LIQUOR PROBLEM"

Mark L. Shaw, addresses members of the United Committee on War Temperance Activities in the Army and Navy, at a meeting held recently at Bates College, Maine, before the Bates College bequest room of Science Hall.

He spoke briefly of the fact that the nation has two enemies to face: Germany and the liquor problem. He said that the men who are working for the liquor problem are the men who are fighting for peace. He urged all men to join the movement and work for the abolition of liquor.

The movement is being carried on through the United Committee on War Temperance, which is working for the abolition of liquor in all parts of the country.

The meeting was well attended and was a great success. The men who are working for the liquor problem are the men who are fighting for peace.

PHIL-HELLIC CLUB
CONCERNESES ACTIVITIES
Election New Members

The first regular meeting of the Phil-hellenic Club for the year was held last Thursday evening. A business session was held at 7:20, followed by a social meeting.

Miss Milledor Turner gave a review of "The Days of Polybius," a book which has recently been added to the library. She characterized the book as something rather novel in the way of biography, calling it as close to the life of that most interesting of Athenians with the picture of Greek life as a whole. She observed that the portrait of the author of that book is interesting, as viewed by the author of this particular piece. She summed up the consideration of Greek ideals with a story of a strange experience, and the various points brought out by Mr. Potter.

Miss Gladys Logan played a piano solo, after which the members gathered to sing songs in appreciation of the authors of Greek. Mr. Page sang the "ode" which has been a most enthusiastic favorite of the club, and has contributed to the success of many of the meetings on topics more than once since the organization of the society. He always receives a cordial welcome at the Phil-Hellenic Club. Mr. Page is a novice of three, and home of having sat on the throne of Misses, a recommendation which is surely ample enough to suit anyone to a Greek society.

The meeting closed with the address of the Alma Mater and the Star Spangled Banner. The meeting was adjourned with feelings of vast satisfaction, some new ideas of the future, and some of them with the consciousness of having accomplished something worth while in the way of public service.

CHERRY KEY MEETS

The following report of a recent meeting of the Cherry Key, Thursday evening, will be of particular interest to Bates alumni and friends.

LAW SCHOOL

11 Ashburton Place, Boston

The purpose of the school is to give the student such training in Law as will qualify him for the profession as well as for the career. The law school offers the L.L.B. degree upon fulfillment of full school years. To those who have received this degree from this or any other college or school, a late application for a LL.M. may be received on the condition that the student attend under the direction of Mr. M. R. Maguire, and pay the regular school fees and a late application fee of $25.

CHEMISTRY BECOMING POPULAR SUBJECT AT BATES

Students Exceed Expectations

Chemistry is becoming one of the most popular subjects in the college curricula. The advantages afforded the skilled chemist are too numerous to mention. It is evident beyond a doubt that the value of chemistry is rapidly increasing. All industries of any significance require efficient chemists and a position in industry is no longer only a man skilled in this branch of science.

Due to the earnest efforts of Dr. Jos- H. and Mr. Sprague, the chemistry course at Bates has been raised on a par with that of any other institution of its size in the country. Mr. Higgins has been especially active in systemizing the laboratories and laboratory courses. One of his latest achievements has been the remodelling of the laboratories by Mr. Swenson, which is devoted to general chemistry.

This has been as small task as the operation of the laboratory before and after will bear out the truth of this statement. The classrooms in general chemical laboratory are well equipped in the history of the institution and it has been a source of satisfaction to provide accommodations for all.

The writer wishes to appre- ciate the many improvements made by Mr. Higgins, who is ever striving for excellence. He has been instrumental in obtaining the large apparatus for the industrial students. The department is of the opinion that chemistry is one of the most promising of all the sciences.

The thoroughness of Dr. Jordan's treatment of the subject of chemistry is one of the greatest contributions to the laboratory. For this reason graduates of Bates have always been provided efficient chemists and there are always openings for technologists. Mr. Jordan receives many letters every year offering positions to those that he might recommend. At present there is an opening for a me in Maine.

LISBON STREET
BATES STUDENTS
Maine Pupils' Largest Quote

A tabulation of the students at Bates and the places from which they come shows some very interesting facts.

In nine different States, the District of Columbia and two foreign countries are represented, of the 455 students, 200 come from Maine, Massachusetts, North Carolina, New Hampshire and Connecticut with 114 respectively are third and fourth.
