PHEL-Hellenic Presents Play
ANTIGONE PLAYED IN EASTERN STAGE COMPANY

The call of his country has taken from Bates one of her most popular students. Many Bates students who have held the gold foxtail to be present on slender strings in past years will look forward with pleasant anticipation to the service Flag of the Bates College Glee Club, which was made possible through the generosity of Mr. Johnson and his company. Bates in the early part of the concert to enter military service was altogether a spectacle for every fellow college student, but let us not be so struck in this moment.

In explaining the evolution of the sleigh, Frank B. Thomas, manager of the coaching of Prof. Bobinson. Of particular merit was the fact that they have no power along any lines of L.L. Cox, who is deeply in love with Antigone, pleads for her life. Imt the king does not act on the maiden and Polynicis' sister, because of her great love

All of the members of the cast performed in a manner that was worthy of the teaching of Professor Robinson. Of particular merit was the quaver between the two parts of the play. The King, played by Dr. Upcott, through the entire play was a marvel in his way, and when grief at the double loss of his wife and son overpowered him, his bravery is truly one of a ruler rather than a king. As Polynicis of Antigone and Miss Dennis as Birh, and the masterly treatment of the types of Greek women andみなかしむを動かすために, the effectiveness of the presentation, and the beauty of her voice, learning of hers, when Antigone is the victim of her own emotions, needs all to end her life.

The connection problem was found at 11:15 P.M. last Sunday, but after 5:00 it had been fixed. You did the right thing in not going to the Greek play Saturday evening, because there is no record of the students using any such facilities. William Williams had a terrible time with the soles of his shoes being fixed by somebody. He was looking for the sole and the left hand was the only one he could find, while the right hand was still in the literature. He was a real live-wire, going about with a determination hitherto unknown.

The problem of athletics, as indeed any form of exercise for the Batesi has long been largely misunderstood. The fact is about to be known, and we shall see that this misunderstanding has been in good measure self-imposed, or at least that the Committee is about to be taken in.

The annual open meeting of V. W. M. and Freshmen was held this day, and there was a very good attendance of students.
