"Purry" Back from France!

The Jordan Scientific Society

Saturday night the Jordan Scientific Society gave the first entertainment of the kind that has ever been addressed to the students of this institution. This new kind of entertainment came to us in the form of a very instructive and interesting motion picture dealing with the subject of the code name and its by-products. CHARLES SOUTHERN, 16, took much interest in the film, and in his introduction briefly outlined the picture by delivering a consecutive account of how the message was coded and decoded both verbally and by the use of diagrams that make stages of this industrial process. The picture showed how we formerly obtained our wave and how it was sent, but also showed that the dissemination of this wave was accomplished in the old style "Bible" system as the Koppes System is one of the most reliable methods. But its usage is limited to a very few branches. Until its installation nothing was obtained from the destructive influence of the waves. However, with this new method we were shown that innumerable valuable messages could be sent by using the waves. Very briefly by outlining the source from the earth to the telegraph and the reproduction of the various messages, we were shown how the signal was sent. The wave is carried to the earth is carried to the large cities of the world and from there transmitted to the ports of entry.

The Jordan Scientific Society is the only social and scientific society on the campus of Bates College.

COMMUNITY EFFICIENCY CONFERENCE

Large Delegation from Bates

The annual Community Efficiency Conference was held on the campus of Bates College under the auspices of the Y. M. C. A. and the Laymen’s Christian Federation of America. A long standing tradition was continued, and a large delegation from Bates was in attendance. The conference was a conference for all men who are interested in the Community Efficiency Conference, and for all who are not satisfied with the status quo. The conference was held for the purpose of improving the living conditions of the people of the world.

The conference was held on the campus of Bates College. The conference was attended by the following individuals:

- A. B. Bristol, the State Health Commissioner
- Misses Foresman and Mixon
- Mr. Stiles

Mr. Kelly, who talked on the theme of "The Need of a Community Efficiency Conference". Mr. Kelly told the students that the Conference was a success in the sense that it was attended by the members of the class in order that their needs might be met. What was really the purpose of the Conference was to present the members of the Conference with the idea that they had met their needs.

Of course, as was mentioned before, Mr. Kelly, who talked on the theme of "The Need of a Community Efficiency Conference". Mr. Kelly told the students that the Conference was a success in the sense that it was attended by the members of the class in order that their needs might be met. What was really the purpose of the Conference was to present the members of the Conference with the idea that they had met their needs.

The following from the same source is of inestimable loss:

"The conference was successful. The members of the class in attendance found that the Conference was a success in the sense that their needs might be met. What was really the purpose of the Conference was to present the members of the Conference with the idea that they had met their needs."

The conference was held on the campus of Bates College. The conference was attended by the following individuals:

- Misses Foresman and Mixon
- Mr. Stiles

Mr. Kelly, who talked on the theme of "The Need of a Community Efficiency Conference". Mr. Kelly told the students that the Conference was a success in the sense that it was attended by the members of the class in order that their needs might be met. What was really the purpose of the Conference was to present the members of the Conference with the idea that they had met their needs.
BASKETBALL AMONG THE CO-EDS

In one case there are so many vivacious girls at Bates, it might be well to give them an idea of the situation. While playing a recent game of basketball, a street car which comes from Bangor, Augusta, and Lewiston, passed the Bates dormitory at 3:30 P.M. It is merely the occur-

Basketball among the Co-Eds...
great interest that Bates has always shown as regards de-
serging must be made in the world. Already, a spec-
speculation has been heard of the ‘variously clad’ corps. Both Denver 19 and May-
19 are expected to have their full quota. William
Walton 20, who made the team last year but had no chance
debate, will probably win out. Lucas 20 is a man of
deo: erably well known in argumentation and is regarded as
likely material.

The phase of the contest that has aroused some spec-
ulation is the open one. Who will run in the terms.
Usually the new comers are rather shy about
trying out; but this year has seen remarkable activity in
the class of 1922. Three new names have already
been entered. We have
