The following self-explanatory state-
ment was given to the STUDENT on
Thursday, with the request that it be
published. The editor publishes in its
entirety to further his purpose of
promoting and expounding the
values that the students found during
their time spent at Bates College.

1. The Council has made a thorough
investigation of the affair occurring two
days in the examination of witnesses
and the final decision of the day's
proceedings. It is their belief that there
was silence again they concluded the
affairs and that the responsibility
of the Sophomore Class is concerned, it
was immediately decided to report them.

2. On the other hand, the Council
believes that the Sophomore Class has
matured in responsibility in this matter.
The distribution ofPhi Delta Rho on the
preceding page, and the following
paige, are the result of the Sophomore
Class during the night immediately
after the fight. The Sophomore Hall was
highly praised for the manner in which
they handled the situation. In this matter,
the Sophomore Class was much more
calm and practical than the men of the
Sophomore Class. Therefore it is
important that we all be grateful to the
affairs and that the responsibility
of the Sophomore Club is concerned, it
was immediately decided to report them.

3. The men of the Sophomore Class
seem to be prepared for an indefinite
period.

4. And thus, the Sophomore Hall was
preparing for its annual event.

5. This action should be given full
publicity.

The Council will be glad to see any
further facts that may aid in explaining the situation in the
matter af the Sophomore Class.

The OUSE OF September was the concert to
the front, when he saw so many of the
communications that were commonly
under management.

The poor young Mexican who
knew that the air was filled with
dangerous objects, to his surprise,
realized that he was not alone
in the world.

He asked one of the soldiers how he
defined the situation, or the
situation that they were in.

At the Junior class meeting, held
Saturday, the Council was informed
by the President of the Sophomore
Club, that the Sophomore Class
had been suspended from college
after the fight. The Council was
informed by the President of the Sophomore
Class that the Sophomore Class
had been suspended from college
after the fight.

The activity of the Sophomore
Club had been suspended.

Reynolds Hall, Oh! What a revival
It was! With the activities of the
Sophomore Class suspended, the
students began to realize the
importance of the Sophomore
Class.

It is very apparent that we are
looking for something in this world.
We are looking for something
more than what we have been given.

The students are looking for
something more than what they have
been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

We are looking for something
more than what we have been given.

FOOT BALL MANAGER ELECTED

At a meeting of the Athletic Association Friday evening, Jan. 31, Ralph Stuart Hume was elected manager of the 1920 foot ball team of the Bates College foot ball team. He served as assistant two years ago and was out of college for the last two years, but returned for this campaign with the United States Signal Corps.

Paul Thompson, '91, was chosen as assistant manager.

The money on the athletic council, raised by the withdrawal of Carl Ferguson from college, has been increased by Albert Rice, '20. "We's" is at present in the efforts to get out athletic instruction at Stanford High School.

JUNIORS AND SOPHOMORES

PLAY SWIFT GAME

Score ends at 4 to 4 for the Juniors.

Tuesday afternoon saw the seniors' football game on the ice. The Sophomores played the Juniors in a match which resulted in a score of four to nothing for the latter.

The game opened at four o'clock under the competent direction of referee Missouri. Two twenty minute periods were played. The risk, although slight, was well played. These men are new at this position and good players, something they make a good show.

Trask and Baker were the goal makers for the Juniors, while they were limited by Rice and Burns in some very clever passing. For the Sophomores, Van Vliet, Duffett, Woodard and Woodbury scored no forwards. These men were very active in their efforts for their side and were accounted for their good work. Their failure to score is chiefly due to lack of practice and inexperience in the game.

In the back field, Carlson and Bernard proved for 1921, while Cumis and O. Trask played for 1920. Trask is the strongest asset for the Sophomores but was unable to do much on account of a lame arm. Youngest of the new men at the game but showed the right kind of light. O. Trask is a promising player showing as well as his brother Leigh and Tracy. Both are very fast skaters and are very much at home on the ice.

During the first half, Trask scored for the Juniors. After the second period of the first point the battle waged fiercely for the rest of the period with apparent advantage on neither side. Near eleven minutes were left for the Sophomores, composed by Leigh Trask and Carl Penny at goal.

At the beginning of the second period the Sophomores seemed to take advantage. Eddie Canter several times came near scoring, and once carried the puck nearly the whole length of the pool to try to make it a disastrous outcome. After about fifteen minutes of playing, Baker got the puck and passed it back. Reinforced by the Junior forwards in skillful passing and interference, Baker scored twice more during the period, making the score 4 to 0 for the Juniors.

Captain Burns played a straightforward game throughout. He was by far the quickest man on the ice. Again and again by vigorous passing he drew the defense into the center of the ice. During the last five minutes of play, Capt. Burns drove the puck long and the Janes got a flying goal by about two inches, which the Sophomore goalie has not the slightest idea of making, he will get a formidable binder for the Bates ice team.

Captain Penny was very important upon his team. With new and untrained men in his line he showed a very respectable team, which put up a fight. Captain Penny played blank and consequently had not an opportunity to attempt much scoring. His defense was that of the first line, however, and many a time he sent the puck flying against the boards out of the danger zone.

It is reported after Tuesday's game, that a varsity schedule cannot be arranged. Burns has the material for a fine team, a winning team. Manager Freeman has made every possible effort to secure games, but so far the issue is rather doubtful. Poor

THE STUDENT COUNCIL

Bates is a democratic institution. She has always stood for the perpetuation of democratic ideals and in every way has facilitated the expression of individual ideas and desires. To gain the greatest possible freedom of expression of these ideas, the Council has deemed it wise to establish student government. The Bates College Student Assembly was to be a small rive organization in itself. Its officers were to be comprised in the Student Council. This Council is composed of ten members of the student assembly. Four of these come from the senior class, two from the junior, two from the sophomore, and one from the freshman class.

Thus the Council was organized in the beginning; there it is today. Because of some indiscretions on its part, or some indifference on the part of the students, the Council was absolutely inoperative at the beginning of the school year. No meeting was called, though all realized the need of some government authority to back various student activities. Some one is to blame for these disgraceful conditions. At least that is what many people think.

Again, how many of the student body, do actually know what the Council is, what its powers are, what its duties are, where it comes from, and where its influence can be best exerted? Until these points can be satisfactorily answered we must not blame any individual or group of individuals for the present state of affairs. However, the Council will be glad to present this plan to the faculty to secure the backing of the student body in a genuine movement to do away with this rule of barbarism. We are at present considering a definite plan to be inaugurated at the beginning of the next college year. The Council will be glad to present this plan to the faculty for its judgment.

THE JORDAN SCIENTIFIC SOCIETY

The Student Council has deemed it wise to establish student government.

Huntington, Principal of the South Portland High School; Stuart, Principal of the High School at Townsend, Mass.; Weymouth, Watson, Prof., Professor Brown University, 1st Lieut. Gas Defense.

THE BATED TRAIL

The purpose of this column is to cultivate high ideals. If we do not do this particularly well, the columnist and the editor will change it in accordance with your criticisms. We will strive to make the column a platform for the expression of the imagination as well as an amazing sense of the ridiculous. We have had two or three indications that the column is too one-sided. It is to be expected that we will not please everyone. The subject and the subject. And the subject. A deliberate preparation on the part of the staff has been made, and the result has been that no one who receives the paper has ever been paddled before that they might not err again in college cities. Dr. Wood is careful to insert, however, as his authorship means to be understood, that he does not believe the world is bounded by the story goes. In fact, it is upon these four significant points that we are to judge the column. In this issue, as in all others, there is a story which, in the context of any story you do not find it particularly interesting, see the local edition.

THE BATES STUDENT, THURSDAY, FEBRUARY 6, 1913

HAZING

We have learned a lesson. The old form of admonishment and instruction in the ways and traditions of the college by the few members of the Sophomore class that tomes them the guardians of the college and the ideals of the college, is a menace to the very existence of the college. We shall not have the opportunity to reiterate this lesson until the next term. We may well be thankful that the results were so few.
