Bates Wins Championship

GARNET DEFEATS CLARK AT LEWISTON

Lewiston, Maine, May 3, 1919

The annual debate season has finally closed with the outcome of the New England intercollegiate debates, which were concluded at Lewiston, May 1st, with the overwhelming victory of Bates over Clark. The final score was Bates 30, Clark 17. Bates, by this victory, have won the New England debates for the third consecutive year. It is a significant fact that Bates is the only college in the East which has not only won the New England debate championship, but has never been defeated. The victory over Clark was particularly sweet, as Clark had won the two previous years. The Bates team, under the able coaching of Mr. McCown, has been in fine form this year and has won all of its major debates. The Clark team, under the able coaching of Mr. McCall, has also been in fine form and has, in some respects, been the equal of Bates. The debate was a hard-fought one, and the final score of 30 to 17 is a measure of the skill and ability of both teams. The debate was held at the Lewiston Opera House, and was attended by a large and enthusiastic audience. The debate was well conducted and was a credit to both schools. The next debate will be held at Bates College, Lewiston, in the fall, and will be another exciting and memorable event in the history of the New England intercollegiate debates.
ROSS'S ICE CREAM

and other delicacies

may be termed the "educated" kind because the flavor is tastefully brot out when you partake of them.

YOUR PATRONEAGE IS APPRECIATED ALWAYS

The faculty of Bates College comprises 68 members, including 45 holders of the degree of B.A., and 23 holders of the degree of M.A. The faculty is divided into three divisions: the faculty of instruction, the faculty of government, and the faculty of extramural work. The faculty of instruction includes all the professors and instructors who are responsible for the instruction of the students in the various departments of the college. The faculty of government includes all the professors and instructors who are responsible for the administration of the college. The faculty of extramural work includes all the professors and instructors who are responsible for the work done outside the college, such as the work done in connection with the college's research laboratories, the college's museum, and the college's publishing house.

BATES COLLEGE

LEWISTON, MAINE

The college is situated on the banks of the Androscoggin River, in the center of a rich farming region, and is surrounded by beautiful scenery. The campus is adjacent to the town of Lewiston, which is a center of manufacturing and commerce. The college has a large library, a museum, a observatory, and a greenhouse. The faculty includes many distinguished scholars, and the college is noted for its high standards of instruction and its emphasis on the liberal arts. Bates College is a member of the New England Conference of Independent Colleges, which is an association of independent colleges in the New England region. The college has a strong tradition of academic excellence and a commitment to social responsibility. Bates College has a strong tradition of academic excellence and a commitment to social responsibility. THE SOCCEROUSERS

True to the traditions of the college, the debating teams have come home with two victories and the championship of the league. For the most of us, debating means a great deal of intellectual stimulation and a means of winning respect from both faculty and students. Bates wins the baseball victory from Harvard and immediately the college and town are apertr. With the glory that the players have gained themselves and the college, it is only natural that we should all be proud. But here is the trouble! Are we giving the credit and praise to the men of the debating teams that they deserve? Or are we to blame for tainting the good name of our college?

Debating has and will continue to attract many students to Bates College. Should we let the interest flag for a few years pass before the town is appraised of the fact through the kindness of the Student Council? The program of the future decade, that the first ten days of the college year be designated as an initiation period for the freshmen. The Council has worked out the following tentative program for the initiation period, but it is hoped that it will be looked upon as a first effort to interest students.

- Theodore Roosevelt wrote Interestingly of a trip to Italy where he visited Genoa, Rome, and Florence, and was directly concerned in the construction of the Panama Canal. He is teaching in Mexico City.

- G. E. Smith, 1913, 1913, of the Smith-Brown Hall, Roxbury, Mass., died recently. Mr. Smith was a retired army officer, and was directly concerned in the construction of the Panama Canal. He is teaching in Mexico City.

- Richard Stanley, '95, who had been in Y. M. C. A. work in Italy, recently landed in New York. He has been engaged in the study of hygiene and is teaching in Italy.

- Richard Kaiser W. Hobenzollern, of the army where he was in a special division dealing with tuberculosis, is teaching in Mexico City.

- The Student Council feels that the elimination of hazing is so imperative. The young men of the college yells and cheers, and given an opportunity to learn the college songs

- The Student Council has worked out the following tentative program for the initiation period, but it is hoped that the whole program will be strictly enforced by the Student Council.
