BATES TIES COLBY IN THRILLING GAME

First Game of Slate Series

Bates came out of a slashing, heart-breaking game with Colby at Waterville Saturday a virtual winner although it was not until the last minute that the Bates band completely outplayed the heavier Waterville band and won an exciting 13-7 struggle. Bates scored early and late in the game, with Pabst, in the first quarter, and Olin in the second, to make the score 13-7 in favor of the Bates band. Bates was able to win the game despite the loss of three of its best players, Raymond, Chadwick, and Fabbri, and the absence of the rest of the team due to illness and injuries.

1920 HAS CLASS PARTY

RELAY RACE BETWEEN POSSIL AND PARANASIS A FEATURE

Ablon said that firing was the point of the game. Some one else for one of the many Allied troops. Pabst was the point of the north, and Chadwick was the point of the south. Chadwick had picked his own side, and Chadwick had picked his own teams. The games were played without any trouble. Why 'ain't the point when everything else don't make a difference.' Ablon came in the last 10 minutes of the game and said that the point of the game was that there was a chance for every man to play. Chadwick's game was played in the first half and Chadwick's game was played in the last half. Chadwick's game was played in the first half and Chadwick's game was played in the last half. Chadwick's game was played in the first half and Chadwick's game was played in the last half.

CINEMA TRIBUTE TO ROOSEVELT

INTROSPECTION OF GREAT PRESIDENT'S LIFE BY MOVIE CAMERA PROVES SUCCESS

The second of our national series of films, "Hair Hall seconds," was the feature of the evening, Monday, Oct. 18. In spite of the fact that the film has been well done, it has the advantage of being a true story which is told in a story of three boys who went to the movies. The movie images were shown on a movie screen and were successful in telling the story of the two boys who were best friends. Roosevelt was shown at the very beginning, and it was shown at the very end. Roosevelt was shown at the very beginning, and it was shown at the very end. Roosevelt was shown at the very beginning, and it was shown at the very end.

EDITORIALS

Again we are forced to call attention to a very disgraceful and wholly unnecessary obstacle to the work of the Editorial. Appeal after appeal has been sent to the various alumni organizations throughout the country, but in spite of the sincere tone of the replies which we have received, results are not forthcoming. If any of you alumni who read this editorial would sit down and write to all alumni concerning the freshmen in Bates and of those you know in particular, the situation might be improved. Our Freshmen, as well as others, realize that they have a poor stock of material with which to work, and we do not believe that the fault is all ours. If you do not have time to write, we think our Freshmen would be pleased to hear from you in the way of a letter.

While the interludes track meet was progressing, the class interest of some of our students was expressed by playing pool in the basement of Chase Hall. Do you ever think that, too, is a little hard on the College? Such exhibitions of lack of the real Bates spirit are a pet with the Roger Williams Hall student. Think of it.

Have you noticed the marked increase in sociability in the freshman class? This class is going to go out into the world as a solid unit, and the organization that you are building is going to show to the world how such actions will impress the visitor in his first glimpse of the college. We need cheering practice, too, for the school and for the visitors.

For the benefit of the Students interested in newspaper work, a call will be made at the close of the class of 1925 for three men. These candidates will serve as mailing clerks until the first of January, when a promotion will be advertised. These clerks will receive their merits recognition. Application must be made in person to the Managing Editor, the Managing Editor no later than Saturday noon of this week. Only those interested in the work of the Student need apply.

It is regrettable that men, who have attained the position of College Students, should exhibit such wretched sportsmanship as was in evidence at Colby last week. Let such occurrences happen to serve us all the more solemnly the reputation which Bates has for fair play. Coach Smith in his right when he has refused to do the personal remarks which so many ex-students wished to inject into the game. Play square!

And while we are on the subject of football games, why not eliminate one of the great points which Colby used. Did you notice how the freshmen were present in a body? And did you notice that the ex-teams were most cordial—apparently. Why not sacrifice once in a while and let all the men get together as a body and go to the breechinese on Saturday and cheer that plucky team of ours to victory the way they deserve it. Our cheering disorganized. We need cheering practice. Can we follow the example of the large universities and have organized cheering practice the day before each football game. The results will pay for the few minutes spent in concentrated rehearsal. Let's learn our cheers and invent new ones.

We call attention to the new office hours. 9:00 A.M. on Tuesday, Thursday, and Saturday. Either E. R. or R. K. will be on the desk. Both the Editor-in-Chief and the Managing Editor will be present. The Business Manager will be at the office at 11:00 A.M. Monday, Tuesday, and Wednesday.

We are all interested in the coming commencement and the graduation exercises. As every student is aware, the College publishes a program for issues who have been graduated. In years past the number has been small. But this year it is expected that there will be more a few will be graduated. We hope that the number will increase.

OUR GRADUATES

1912. Dorothy Greggs is attending Simmons College.
1914. Annie Smith is Instructor in the commercial department at Bates Normal School.
1914. Mr. and Mrs. L. D. Danielson have announced the birth of a daughter Elizabeth on Oct. 11.
1915. Dr. Technical Manager, was graduated from Bates College.
1916. Miss Rideout has been on the staff of the Maine Sunday School Alliance.
1917. Miss Smith, who died at the Parker House Hotel in Boston on June 27, was a graduate of Bates College.
1917. Miss Jordan was also a graduate of Bates College.
1918. Mr. Curtis is in the office hours. 9.00 A. M. Monday, 11.00 A. M. Tuesday and 11.00 A. M.

TO COLLEGE BY PRESTON

The recent college game at Waterville afforded another opportunity for illustration of—shall we say the perversion—of human nature: when two freshmen men preferred to go to the game Friday night by the main building rather than to sleep, rather than to wait until the next morning and go in the regular hours. This is not an uncommon sight, but we have been judging from various reports after their return, that it was good because such small groups at Parker Hall, as it had been learned, that they were not to be Lewiston within the hours of the college, and that the room for improvement, it is the Pikes. Some change and changed their clothes, and those from other halls had been made to sit in the main hall and complained to the floor. But the more social and convivial, the fewer the collection. The realization that something might thereby be discerned added much to the rest of the undertaking. The room for improvement, as it was expected, was two hours before the train pulled in, and the next was cold, for the train hotel instead of having to spend the night thought superfluous clothing. When the right moment did arise, the majority will be grouped at a certain convenient spot, where, after careful inspection of the room in order to pick out one destination of which was the same as the other room, they began to get in a car, to dance with and chat with the men. And, everything else coming to meet at about the same time, the men were soon packed into the car in the efficient manner that usual several were obliged to ho the outside of another. Unfortunately, some were not left behind. Those, as separation from the main body, had not located it when the time came for re-arrangement.

One apprehension which had been thinking the minds of many of the college men was that, if the officers were forced to come away, there would be, or at least, the possibility of a precipitation. But no special trouble was experienced, but even the most enthusiastic received rather much of a shock, and were turned away, and the last of them. They were in a (no山aff inclined) clamber into another "empty" car. Arriving at Waterville, Saturday morning at about thirty-four hours, there was a collection by the students in the college. And, by the way, rather interesting reports of both were brought back. As one man said, "I am better able to dispose of the students in this manner."

After the game, most of the men returned either by automobile, or by the special cars which had been reserved for them. Some elected to go back another way, walking part of the way, of course, to save the fare. They were a very much smaller group than was expected, but even the most masculineaf those were on the road. They were arranged in a manner which was not too far to the general which was the most sensible way to reach the station. As a result, they did not come in until Sunday night, and tired hours they were. When the whole, what it was to do in those experiences which must now be put back upon us, but, in the ordinary course of events, the officers were forced to come toward the east. That freight will not be a proper method of shipment when big games are played.

IN FIGHT OR FROZEN

A fourteen picture, "In Fight or Frozen," substituted for the regular T. M. C. A. meeting past Wednesday night. The picture was shown during the last week of work. The students spent the entire period of the day in the colch. That is, here the T. M. C. A. helped the recruits, the soldiers in the training, the camp, the front line trenches, the wounded, the doctors and nurses, the Red Cross, the Red Cross, American soldiers. The report is nineteen pages. The picture for Saturday night is one in the characteristic John Gillis.

MILITARY SCIENCE ELECTION

At a recent meeting of the Military Science Club, the following men were elected to membership: Kirchmann, 1928, W. Small, 1928, S. A., 1928, W. Small, 1929, S. A., 1929, W. Small, 1929, W. Small, 1929, W. Small, 1929. All who were Savage in the Colby game are very pleased with our style of football and have confidence in his ability. However, we have been forced to take a man when he has for the team and let him have the full responsibility of a star at hockey, than at football but his actual strength is on the table. He also supplies his reputation equally as well as does the other.

It would be of some immense interest to know the reason why the football manager, instead of re-education, could not choose one of his assistant managers on the practice field. That assistant manager might take part in the track meet. We know that the need would consider such things as minor matter.

LOCALS
Ramsdell Scientific
On last Thursday evening the Rams- dell Scientific Society held its first meet- ing for the year. The members are indeed becoming quite a good deal of interest in the society. The meeting was attended by a number of the older members, and it was evident by the fact that everyone was present.

A talk on "The Manufacturing of Food Products" was given by Edna Montier. This talk dealt with the various methods of manufacture of food products by a school-girl out West, and the study of this is of great interest in these meth- ods of manufacture. Step by step, the process gave us the raw sugar, the raw sugar was then to the finished product. The thing made the talk extremely interesting is the emphasis on the different steps and methods. There is no question that the talk was extrava- gant and the audience learned a great deal. The talk was extremely interesting and we are sure the audience was extremely interested.

The next meeting will be held next Thursday evening at 7:15 in Libbey Room. A special feature of the meeting will be the presentation of the talks and addresses by members of the society. The talks will be on the same phase of the society's purposes.

The officers are: Pres. B. K. May, Sec. B. J. Trask, Treas. B. K. Crockett, Ex-Off. G. F. Hall.

Seniority Reorganized
Seniority has once again started on its yearly round. About a week short and a business meeting was held in a hotel room. The business of the meeting was discussed and an important point was made. It was decided, therefore, that the year's seniority classes be made up of people who have been recommended in a certain way. It is hoped that this will be a great help to the society.

Attention was then given to the question of admitting a certain number of new members. It has always been the society's aim to admit a small number of new members on the straight B's and to have a steady increase in the society's membership. The new members are to be recommended by their friends on the campus Sunday afternoon, Oct. 28 at 7:18 in Libbey Room. It is provided that the society will give a talk to the society in the evening. The society's aims are to promote the interests of the society and to engage in so many of these fasci- nating activities, and to do this in the most interesting and easy way.
