NEW TRACK COACH IN TOWN WORK

STAR HIGH-SCHOOL COACHES TURNED PRO

J. G. Johnson, Harvard '14, started a week as coach of track athletes in fall at the close of the Easter recess. He appeared as an available member of the track team last spring, but was not a regular member of the track team gained not only during the season, but as a prep for the last. The work of the quarter was also very remarkable. The course was started in the course was started with a steady increase of.

In 1913 Johnson was sent to Boston, where he compiled the best team in the city at the close of the 1913 season. He is to return to the city in the near future and will be a member of the track team at Boston College next year.

Johnson is a native of Lewiston and graduated at the Lewiston Academy.

EASTER RECESS

Easter recess, about 40 men have been busily at work preparing for the spring season of the track team. The team is in great shape and ready for any competition that may come their way. The track team is in the hands of Coach Johnson and is in the capable hands of Coach Johnstone for the spring season.

GLEY AND AMATEURS IN THE COMING JORDAN SCIENTIFIC EXHIBITION

THIRD ANNUAL EVENT TO BE HELD APRIL 21 AND 22

Following the custom of the past two years, the Jordan Scientific Exhibition will be held its Third Annual Exhibition on Thursday, April 21, and on Friday, April 22, in the great halls of the Jordan Scientific Exhibition Building.

The exhibition is to be held in the same building as last year, and the rooms are being prepared for the exhibition in the same manner as last year. The exhibition is to be open to the public on April 21 and 22, and will be free to all visitors.

BASEBALL PROSPECTS

The prospects for baseball this year look very promising, according to the opinion of a few old graduates who have factors in our college life from lack of perspective. Last year's varsity men are in good form, and some of the new material looks promising. The team will probably be elected by popular vote next week. We feel that we believe that our team will compare favorably with any in Maine. The illness of the coach and the poor condition of the field have delayed the pre-season practice, but we feel confident that the preliminary games will show that Bates has a team which they may be proud of, and which will make a success of the Massachusetts trip next week. We look forward to seeing our boys make a good showing in the tournament. The Baseball Club will hold meetings for the purpose of getting the team together and planning the season. We hope that all our friends will support the team.

GEORGE AND MARGUERITE HILL

LAWRENCE D. KIMBALL

A very interesting meeting of the Hall Association was held Tuesday night. We feel very sorry for John Mosher for his accident of last week. Jim Stonier has recently been appointed 3rd Assistant Engineer to the Board of Managers. Mr. Dyer has recently returned from the aviation trip which he made last summer. Miss Helen Robinson, our College nurse, has been elected to the Board of Managers. We are all happy to have her as a member of our organization. Mr. Dyer will attend the meeting of the Board of Managers on April 24. We believe that he will be able to attend our next meeting on April 21. We shall be glad to have him with us.

JORDAN SCIENTIFIC SOCIETY EXHIBITION

We of Bates College are apt to overlook some of the prime factors in our college life from lack of perspective. In our estimation, one of the most interesting and important features of Bates College is the annual exhibition given by the Jordan Scientific Society. The development of the results of applied science yearly attracts more people to the college than any other one department, with the exception of athletics and the music department. Not only does the work of the society prove helpful in bringing new students to the college, but it has attracted the attention of outside interests. After the armistice with Germany a communication was received from a prominent German university inquiring into the work of the Jordan Scientific Society, showing how far-reaching are the results of this department and how interest is considered to be in this country. The Journal of Chemical and Metallurgical Engineering in an article on The Jordan Scientific Society of Bates College, has this to say: "The most interesting feature of the society: "An interesting example of the manner in which student organization can aid in arousing public interest in chemical engineering is a distinctive feature of this student organization. The work of the society is, indeed, a model for the work of the Jordan Scientific Society of Bates College." When a magazine of the type of the Chemical and Metallurgical Journal takes note of what is being done here at Bates, we can readily see the importance of the work. An institution which so furthers the interests of Bates most certainly receives

EDWIN H. BUSH

A very interesting meeting of the Hall Association was held Tuesday night. It was there explained that the drinking fountain which was installed on the second floor of the dormitory would have to be removed, as it has been discovered that the water from the fountain would go into the ceiling of the dormitory and would cause damage. Therefore, it was decided that the fountain should be removed. It was also decided that the fountain should be replaced on the first floor of the dormitory.

Our regards to all our friends.

NEW TYPE OF PROGRAM PROVEN SUCCESSFUL—FAUX-thumb AUDES WOULD HAVE WELL FOR INNOVATION

That it was one of the last lost meetings, but no one else was present. As the program was adjourned for the season, the audience expressed its appreciation of the work of the season.

The new program, having gained a foothold, will continue to be published in the future.

For the second speaker, Mr. B. Langley Pratt, is a member of Westfield University, and is at present president of the University. Mr. Pratt gave a very interesting talk on the "Moral Education of the Nation." He took up the subject of the necessity of educating the nation to be moral, and of the importance of the moral education. He said that the moral education of the nation would be the most important thing that we could do to prevent crime and vice.
ROSS'S ICE CREAM
and other delicacies

May be termed the "educated" kind because the flavor is tastefully brought out when you partake of them.
