The Bates Rydell club was held in Chase Hall last Monday evening at eight o'clock. Arthur H. Norton, curator of the Department of Natural History and Field Agent for the Maine Audubon Society, was in charge of the meeting.

He took as his subject "Birds of the Maine Fields and Woods". Mr. Norton's address was on the interesting matter. This comprehensive address was given by Mr. Norton, who is interested in the care of our native birds, a point of view with which he is familiar. Mr. Norton's brief remarks and the notes that we were able to make are given below:

The ladies of the hostess' committee decorated the hall with a number of lovely bouquets and flowers. Mr. Norton's lecture was of the utmost interest, and the audience was deeply interested. Mr. Norton introduced his subject by a brief presentation of the natural history of the area, and then proceeded to describe the various species of birds found in the region. He discussed the habits, songs, and nesting habits of these birds, and the audience was fascinated by his detailed account. Mr. Norton concluded his lecture by summarizing the points he had discussed and emphasizing the importance of protecting our native birds.

The audience gave a hearty round of applause, and many of the members of the audience expressed their appreciation for Mr. Norton's excellent lecture. The meeting was well attended, and a number of the members of the audience expressed their desire to attend future lectures on bird lore. The lecture was a great success, and the audience was thoroughly pleased with Mr. Norton's address.
WE THANK THE WOMEN

Since the announcement made before the Colby game that the women of the college were to be allowed to march with the men under the mother centennial banner, we have been awaiting some expression of the public toward this step. It is not yet too late for the administration to withdraw such an instruction.

The whole question stands now as the upper sut of the Freshmen in the ascendant. Whose move is next? We do not mean to make threats, but we will say that if the Freshmen take this as a hint to live up to regulations and act accordingly it will be better for them than their present attitude.

OUR GRADUATES

A. K. Finsen is practicing law in Fitchburg, Mass.

Vera C. Cowdrey is doing statistical work for the Art Institute of Chicago.

John Coats is with the West Coast Electric Co., San Francisco, Cal.

Frank A. Jones is with the New York Life Insurance Co., New York City.

Reubens, $2,500 per yr. in advance.

EDITORIALS

The announcement made before the Colby game that the women of the college were to be allowed to march with the men under the mother centennial banner, we have been awaiting some expression of the public toward this step. It is not yet too late for the administration to withdraw such an instruction.

The whole question stands now as the upper sut of the Freshmen in the ascendant. Whose move is next? We do not mean to make threats, but we will say that if the Freshmen take this as a hint to live up to regulations and act accordingly it will be better for them than their present attitude.

FRESHMAN RULE

There is a certain element in the Freshman Class which is taking everything coming its way this season, just as the same element did last year, and if we are any judge of the circumstances the results will be the same unless steps are taken soon to counteract the influences at work. What happened last year? The Freshman came here expecting a discipline which would keep them in the straight and narrow path and they were met with a breezy love campaign which was about as practicable as Moore's Utopia and which made them feel superior to the (in their estimation) simple mind which could conceive of such a mollycoddle plan. They grew bold and overbear-
