Lewiston, and Bates are soon to have another platform clash between teams of Bates and Yale's. This is the annual intercollegiate debate, and is looked forward to with great interest by the students and faculty alike. The debate is scheduled for a hall at Bates College, and will take place on Monday evening, November 15th.

The debate will feature five speakers: James Murray Carroll, A.M., is the defendant; Professor Carroll is the plaintiff; Professor Laidler, T.M., is the defendant; and Professor Murray, D.D., is the plaintiff. The debate will cover the question of the clash between socialism and capitalism.

The debate will be held in Memorial Hall on the campus of Bates College. The audience is encouraged to attend and to participate in the discussion.

PROF. JOSH MURRAY CARROLL

The debate will be an exciting event, and is sure to be a highlight of the academic year. It is a great opportunity for students to engage in critical thinking and to develop their skills in public speaking and argumentation.

The debate is sponsored by the Political Science Department of Bates College, and is open to the public. Admission is free, and there is no need to RSVP. The debate will begin at 7:30 PM, and is expected to last approximately two hours.

We hope to see you there!
FORESTRY AT BATES

We call your special attention to the facts presented this week concerning our forestry department. Did you realize that Bates is now offering a regular forestry course, that we hold extensive forest lands and experimental work, and that the theme is "The Forests of France"? These are just a few of the interesting developments in the forestry department this year that are sure to appeal to you.

America is awaking to the need of forest conservation, and is opening a mighty field of outdoor work for experienced conservationists and forest biologists. Our first class course with the best men to assist these men to shoulder these new responsibilities that are quickly arising.

We remind you of these facts because this department should be more widely known. Realize that your college is booming; is keeping up with the times; in this new world there is much which should draw outdoor-loving men to Bates!

FORTY LOVE

THE MAN WHO KNEW HOW TO WRITE SOMETHING.

It is morally a safe job to fill this column, when you can get the money. "Music—"English Class and pick a few remarks for the "Weekly," and it is all right. College is filling for more information on how to write for a school paper. It happens that you're up against it when you are considering the College of Letters, because there is no "Examination." We prefer to that Either you go to college or not. If you have a faint heart to begin with and when a fellow gets that far gone, it's not what you have been looking for. With a few words you will be able to make a better job of it. Capital will be on active duty at the Pike Bombs recruiting station Tuesday.

It's at the best of the season, and if you have a taste for it, then you're in luck. Bates has a first class college to open its doors to women. They didn't call the Boston Chapter much of a success, but this year's estimates are quite favorable. Usual attendance is expected to be much larger than ever. So you may count on a good show.

There are all the usual features, with the usual amount of socialization. One of them is "The Girls' Mandolin Club will be open this season," and the latest popular song will be automatic for the next morning. Afterwards you will be served coffee in the Cozy Quarter at ten o'clock. All classroom employees must be neat, so much so that some men have been asked to install a sink fountain to wash their hands, without question it means a great deal.

It would be a good time if they don't weaken. But you never can tell, girls enough feathers and she'll fly. His ocular is fitted for an insulator. Each ear of the weirdest. Even the icing on the cake. It is hoped that he is expected to get his hands on it. Quicksand is a Cretan point of honor. The band may be exalted into plate tectonics, and must be a "fine young man's fancy."

What Is Air Pressure?

The air is composed of molecules. They constantly bombard your face with air. A thousand tons of air might fill a room. The constant bombardment of the air molecules constitutes a push. At sea level the air molecules push against every square inch of your body with a pressure of nearly 15 pounds per square inch.

Pressure, then, is merely a matter of bombarding molecules.

When you boil water you make its molecules fly off. The water molecules collide with the air molecules. It takes a higher temperature to boil water at sea level than on Pikes Peak, 14,000 feet. Because there are more air molecules at sea level—more pressure.

Take away all the pressure and you would have a vacuum.

A perfect vacuum has never been created. Even in the best vacuum obtainable there are still over 5 billion molecules of air per cubic foot. The presence of these molecules is noticeable on the whole earth.

Host a substantial in a vacuum and you may disperse properties not revealed under ordinary pressure. A new field for scientific exploration is open.

Into this field the Research Laboratories of the General Electric Company have penetrated. Thus one of the chemists in the Research Laboratories studied the properties of a metal in a vacuum and found the metal to be highly elastically.

Is a preceding day we called attention to the need of co-operation on the part of those interested in this department. The results have been gratifying, dates and particulars having been received in by two departments, which will be used on execution. May the good work go on! Bring in your contributions and critiques—charts will be accepted—next letter than Tuesday before publication.

OUTING CLUB EQUIPMENT
The Outing Club has several pairs of snowshoes and skis, which may be used by any of the members of the club. The skis may be had from Ohio Smith, Room 6, Parker Hall, and the snow shoes from Anna Johnson, Room 12, Parker Hall. Any member of the club is privileged to use this equipment as presented, or may make his own snowshoe card, which card will be held by the men in charge of the equipment as security till the equipment is returned.

Y. W. C. A.
Last Wednesday evening there was a short business meeting of the Y. W. C. A. The committee for receiving the constitution presented the revised form at that time. The constitution was accepted as read.

After the business meeting, Miss Ruth Libby introduced Miss "Trudy" Gray. Mrs. Gray gave a brief but pleasing talk on "Meditation, Courage, and Service," which applied to every day life the advice given by Paul in his letter to Timothy.

"In this world of hurry and work," she said, "we should take time to meditate. The world is giving too much time to its own selfish pursuits." Her message was inspiring and interesting.

DR. ROSSELLI TONIGHT
The second George Caldecott Lecture of the year will be delivered this evening, in the Chapel, by Dr. Bruce Roselli. The lecturer is the first foreign professor in the United States and Italy. He is at present Professor of Italian Literature at Vassar College. The lecture Dr. Roselli brings to us is certainly as inspiring one and the entire student body should avail itself of this splendid opportunity of hearing one of the six most noted professors.

JORDAN SCIENTIFIC SOCIETY
Mr. Hodgman and Mr. Stickney were the speakers before the Jordan Scientific Society last Wednesday evening. Mr. Hodgman reviewed the different processes of electropainting. Mr. Stickney’s subject, "Glass," was in safe hands. The speaker’s original method in preparing the history of glass manufacture was especially appreciated.

The next meeting of the Society will be in the form of a business session to receive plans for the annual exhibit.

STUDENTS-ATTENTION
If you need army breeches, shirts, wrap puttees, leather puttees, tents, army heavy shoes, light weight socks, raincoats, or anything in the camping line.
