The recent appointment of Harold Cloutman, Bates ’16, to the position of Assistant to the Transit Commission of New York City came as a real surprise to the students of Bates. The reason was of great interest to Bates people. People who are competent to judge declare that the awarding of this office to Mr. Cloutman is a most flattering expression of esteem on the part of the student body.

Mr. Cloutman has kindly sent in a description of the work of his office, and has given an account of his experiences in the field of New York politics.

WILLIAM O. BAILEY, ’20
President of Jordan Scientific Society

The volume of this task may be hinted at, were it not for the fact that the task is an enormous one. The enormous ten car trains, each representing a city, and the men who are responsible for their safe and efficient operation, are a great source of pride to the students of Bates. The men who have been responsible for the safe operation of these trains have contributed to the splendid display of the society's activities. At the request of the editors, Mr. Bailey has kindly sent in a description of the work of his office, and has given an account of his experiences in the field of New York politics.

ROBINSON HEADS PHIL-HELLENIC

Tuesday evening Phi Hellenic Club met in City Hall. President Charles J. Robinson conducted the business meeting which was attended by a large number of students.

INTERCOLLEGIATE ATHLETICS AND THE PUBLIC

President Lowell commented some weeks ago upon the seemingly undue prominence college games are finding today in the public eye. His conservative view of the place of college athletes in the scheme of education was the incentive of much verbal ridicule. As just the newspaper notoriety was about to subside, his football scandal at the Universities of Illinois and Notre Dame occurred just in time to renew the whole dispute.

Newspapers, in the press which the President denounced as "the propulsive public relations of the scheme of education," was the incentive of much verbal ridicule.

It cannot be denied that an extreme amount of public interest is being centered upon intercollegiate athletics. Otherwise it would be to the great credit of the able and far-sighted athletic directors of our institutions who have been able to make football games so appealing to a wide public.

Greetings to the right kind of people, they say. There is no question but what the intercollegiate athletic contests are an essential part of the college life. There is no reason why they should not be open to the public. On the other hand, they should not be made a business. Let us have sport for the sake of sport.
