THE SPRING OF THE YEAR

The spring is the morning of the year. It is then old Mother Earth wakes up and sits herself from the long sleep of winter. New life in Nature expresses itself in the graceful awakening of Nature.

The student, looking down from his window, sees all and feels the urge to make friends. zest for the out-of-doors follows swiftly upon the heels of the仗. A primary motive for the drizzly routine of the past months.

Spring has its dangers for the student. The last lap of a course is always perilous, for it is then the runner feels that it is useless anyway and the goal never seems to be within reach.

Yet the new season is a blessing, it is the antidote for the lethargy of winter. New energy in Nature expresses itself to the freshly-changed student.

LITERARY SEDATIVES

This is the day of the best seller and the popular if it be not permanent. New books are coming out that are considered favorites than ever before notwithstan the overwhelming power of advertising. The books are caught publisher's announcements of this and that starting literary activity.

And the books are largely of the type that flourish and fade in a day. The magazines that have upheld a high standard of literature seem to be the minority. The all fiction members are becoming prominent.

The satirical among these best sellers and cheap fiction mug shots are in that they have a certain power to hold the interest, they do not contribute anything to the thought of the reader. They act as a dope to the mind of him who reads. They dull the incentive to seek what is good and is a stimulus to thought.

The interest in real literature has waned so rapidly that now we have to be coerced to read such advertisements as that one we see have in be coaxed to read by such conviction.

When H₂O Isn't Water

"GENTLEMEN" said the Chem. Prof., at the end of the term, "You'll probably remember only one thing of all I've tried to teach you. And that is that Water is H₂O— and then you'll be wrong.

Even shaving soap isn't always shaving soap. A correct shaving preparation like Williams' Shaving Cream must do a lot more than simply make a lather.

- It must be generous with its lather. It must be thick and creamy in cold water or hot.
- It must hold its moisture. Williams' will not "freeze" dry on your face.
- It must soften your skin. It must keep a thing to themselves!
- It must prepare your face for quick, gentle shaving. Williams' is so pure and wholesome that it helps the most tender skin.

25 Minutes in Boiling Water Didn't Leak a Drop

Took the same washing machine, wringer, and, only nearly half so much water as with Moses Non-Leafless Pen-wiper. We didn't lose a drop of soap or take in a drop of suds. In order to report that after 7 years of use of it, it still works perfectly.

You can Reach on Moses' Non-Leakless Pen-wiper at all dealers.
