BATES WINS STATE CHAMPIONSHIP IN HOCKEY BY 5-4 TRIUMPH OVER MAINE

DEFENDS COLBY-6 IN CLASH AT WATERTVILLE

SEASON A SUCCESS FOR GARNET STARS

Another Game With Maine Tomorrow

The Bates sextet garnered the championship laurels last Tuesday by defeating the Maine aggregations at Orono by a 5 to 1 score. The U of M were put up a hard scrap, and it was not until two overtime periods had been played that the Garnet boys were able to claim the long end of the score.

During the famed vacation Maine bested Bates, but it was one of the immortal posts of all that said revange event. As for the ordinal itself, there was plenty of action from start to finish. Maine resorted to the grandstand style of play, but it was the teamwork of the Bates outfit that resulted in the victory for the host little college in the week of the woods.

Dick Stanley, Cogan, and Capt. Edides were the stars. Joe and Dick each netted the counter for a pair and Edides got the MVP.

At the end of the third period the count was four each, and an agreement of two minute overtime periods was made between the two teams. Both squads fought hard for the winning point, but it took the Cogan—R. Stanley combination to show the Maine boys how it was done.

With but a minute to play in the second overtime period, Cogan gathered in a pass from Dick, and surged the center for the winning tally.

RATES 6-COLBY 1

The Summary:

Rates 6: Roberts, J. Stanley, l.c., Cogan, Leonard, c., Coggin, Corp., Scott, Edides, Baxter, B.

Colby 1: Roberts, J. Stanley, l.c., Cogan, Leonard, c., Cogan, Corp., Scott, Edides, Baxter, B.

RATES VS MAINE—Varsity hockey.

March 22. At the rink beginning at 7:30 P.M.

CARNIVAL PROGRAM CLOSES TOMORROW

Skating Events to Afford Carnival Promises to Furnish as Many Thrills as Possible

The senior program for the Carnival promises to furnish as many thrills as possible to the students. The original plans of the committee have been carried out in every respect and one feature has been added to the excellent card, namely the clash between the Garnet instructor and those from the Orono institution. Meetings of Bates and Maine in any sport always furnish some close competition and this year's hockey battles have proved especially keen matters.

High jump.

100 yard dash for men.

50 yard dash for women.

3000 meter relay for women.

Awards of prizes for all Carnival events.

Bates vs Maine—varsity hockey.

100 yard dash for men.

3000 meter relay for women.

Interclass relay for women.

Carnival promises to furnish as many thrills as possible.

CARNIVAL DANCE TONIGHT

The big Carnival dance is scheduled for tonight. Cheese Hall is the place. Favors and aids—All Out!

EXCITING TIME GETTING HOME

Three Madison young men and one Madison young woman who are students at Bates college took a ride that results in the story of the owl settlers. The young men were among those who have borne under quarantine at the college on account of the scurvy. Efforts were made by the parents of the young men to charter a car on the railroad, to make preparations for furnishing the home but this could not be done. A team was secured to take the party to Belgrade. Elsewhere secured a car on the train Madison and drove to Belgrade (Continued on Page Three)

ATTENTION: MAINE CAMPER

An article in the Maine Campus of Feb. 21 states that, "With Maine's victory over Bates, the State series is in a tangle." Evidently the Athletic Editor of the Campus did not understand that the Augusta Carnival game was only the first in a series. Bates now heads the league having played and won five games thus clinching its position, and is entirely exclusive of the State series. Bates now heads the league having played and won five games thus clinching its position.

Mid-years are off. Those that were allowed to leave the college on account of scarlet fever. After having been under quarantine at the college for more than three weeks, the young men were among those who were allowed to travel on the train or otherwise. Efforts were made by the parents of the young men to charter a car on the railroad. The health regulations did not allow them to travel on the train or otherwise.

He Reached the Top

The Vice-President of a great life insurance company who began his career as an agent has this to say to seniors who are about to graduate from college:

"If you love work and desire to pursue an honorable career then consider the life insurance business. It is one of the most promising vocations of our day. Life insurance is the oldest of all the insurance arts. It is the one which came closest to the man in the street and which brought to us the word 'insurance.'

"To the student who wants to use his college training and yet be his own master, life insurance presents a most desirable career. It is a business that requires some knowledge of science and an understanding of the minds of men. It offers an opportunity to combine business with science, to combine knowledge with common sense, to combine reasoning with reasoning.

"The work of the life insurance salesman is distinguished from college. Before deciding your career make an investigation. The advantages are with you who graduate from college."

THE BATES STUDENT, FRIDAY, MARCH 2, 1923

The Bates Carnival coming on as near the time for the repairing of college bonds many of the students back and enjoying the out of door sports. The carnival ball was held Friday evening likewise found many of our students. Our "backer's stew" were enjoyed with the "old silver spoon" in their hands. A "hockey star" was potentially silver, "principles." Copper is being reconstituted. Other compounds can be reconstituted.

EXCITING TIME

In the Bates University women's basketball teams. Cornell has also roosted a series of meetings, discussions, interviews, etc., with men who are interested in mission work, the ministry, and allied subjects.

The first meeting of the "Y" following the compulsory "vacation" will be that of March 7 and the speaker will be a man who has served for four years in Turkey with the Near East Relief. Previous to his connection with the Near East Relief, Mr. William E. Hawkes acted as a Y. M. C. A. secretary during the war. He is at present a senior in Hartford Theological Seminary.

The "PRACTICAL" Alchemist and "THEORETICAL" Robert Boyle

Robert Boyle was the first to define an "ideal gas". He was the first to use the term "roentgenology." Boyle also established the connection between the boiling point of water and atmospheric pressure, a very "theoretical" discovery in his day but one which every steam engine manufacturer appreciates.

He was the first to use the term "analysis" in the modern chemical sense, the first to define an element as a body which cannot be subdivided and from which compounds can be reconstituted.

The "practical" alchemist and the "theoretical" alchemist.

The alchemists wrote vaguely of "fluids" and "principles," Copper was potentially silver, Rid of its red color and the "principle" of silver would assert itself, so that silver would remain.

With a certain amount of philosopher's stone (itself a mysterious "principle") a base metal could be converted into a quantity of gold a million times as great.

This all sounded so "practical" that Kings listened credulously, but the only tangible result was that they were enriched with much bogus gold.

Scientific theorists like Robert Boyle (1627-1691) proved more to the practical matter, discovering its composition and then drawing scientific conclusions that could be used for the good of mankind. Alchemists concocted and died; he experimented and lived.

The air pump Boyle undertook a "theoretical" but scientific experimental study of the atmosphere and discovered that it had a "spring" in it, or in other words that it could be expanded. He also established the connection between the boiling point of water and atmospheric pressure, a very "theoretical" discovery in his day but one which every steam engine manufacturer appreciates.

He was the first to use the term "analysis" in the modern chemical sense, the first to define an element as a body which cannot be subdivided and from which compounds can be reconstituted.

The "practical" alchemist and the "theoretical" alchemist.

BATES DEFEATS

BOWDOIN 3-1

Second Win From Brunswick Rivals

On February 22 Bates again defeated Bowdoin. The game which was played in the Auburn goal was fast and rough. Because of scoring hooking there were several injuries. In the first peri-
ded Bates showed lack of team work while Bowdoin succeeded in slipping the ball past Bates. The good work of the Brunwick goalie checked the Brunswick men from scoring more than one goal in the first period. In the latter part of the second period Cowey, the fast Denton wing man, snared a fifty foot shot and made the score one up in favor of Bowdoin. Cowey's goal was a heart breaker for Bowdoin and their play in the remain-
der of the periods showed this. Len-

nard and junior Stanley talked in the seal period. This was the same as three for Bates and one for Bowdoin. The record expressed their dissatisfaction with this.

Of decisions of referees Messes when they would not count. Great Bates tallies which slipped by the Bow-
doin goal tender.
