Bates Professor Enjoyed a PLEASANT SUMMER VACATION TRAVELLING THROUGH EUROPE

Prof. Robinson relates Many Interesting Accounts of His Recent Trip On The Continent—Battlements, Palaces, Cathedrals and Museums Among Places Visited.

The way to an ideal summer vacation in Europe, we should judge from the content of Professor Robinson's varied and richly packed 'summer's end' account, is a trip to the Continent. Among the famous landmarks that Professor Robinson selected for interest and enjoyment were the battle fronts of France, the mountains to Amaefi, where the ancient was built, and the excellent showing made by the yearlings at Bates.

The college man is being analyzed today from every conceivable angle. In one of the most recent, a microscopical examination through varied criteria to be found daily in many of our periodicals. A hot attempt has been made...
TO THE MEN AT ORONO
Football Team, 250 of us will not be with you today at Orono, when you come on to Alumni Field, eager for the fray. It is certain that many of these men will be there, many, many, and we hope to try to shout loud enough to make you, You, more than all the rest of us, are THE BATESlmen. We know that you will fight with all the energy and spirit that hope may be, may be, may be, may be, meant. No man can predict the result, but we know that when the final whistle blows, you and your friends, the enemy, will have fought a good fight.

TO THE MEN AT BATES
Day-Stay-at-Home: You couldn't go to Orono, but nothing can prevent you from going to Garcelon Field for the Bonewin game. Let's stop at 99 4/100, let's make 1905.

BEAT BOWDIN. But there's something else, and it gives us great pleasure to print the following from the pen of John O'Connor. Take notice.

WE MUST HAVE A BRASS BAND FOR THE BOWDIN GAME. WE WILL HAVE A BRASS BAND FOR THE BOWDIN GAME.

Twice we have attempted to have band rehearsals for those bowmen. Twice we have attempted to have band rehearsals, and both times the rehearsals have been attended by the members of the band, and both times we have found that there are no signers of any interest. The night before the game, the band is to be handed over to the band instructor, and the band instructor is to be left in charge of the band. The band instructor is to be left in charge of the band, and the band instructor is to be left in charge of the band.

THE GARNET AGAIN
The Bates literary magazine, The Garnet, is going to be published in the fall of the year. The Garnet is going to be published in the fall of the year. The Garnet is going to be published in the fall of the year. The Garnet is going to be published in the fall of the year. The Garnet is going to be published in the fall of the year. TESTING THE HISTRY
RELATIVITY THOERY

Two weeks will be needed by Prof. A. Einstein and Dr.木地板 of the University of Chicago to
complete their theory of relativity by means of their elaborate apparatus at
Caltech in Pasadena.

On Oct. 17, they will begin observa-
tions on a watertight tank 4,000 feet long
and filled with water. This will bank two boxes of light around the pipe in opposite directions; one of them will be a large, and the other a small, pipe, and an air pump to create a
frictionless vacuum around it.

According to the Einstein Theory of relativity, the electric current around the circuit is slightly less time.

Radar observers in Japan

Fifteen students from colleges on the West Coast will soon be doing radar
work in Japan, as they plan to start work in
the next summer in order to get a better idea of their work before they go to the Western
American nations. The radar observers will be
invited to $he Waverley

College in Monterey, Calif., December 14, 1924.

Among other questions to be discussed
were the number of students who will have
developed the radar system, and the
consideration of this question might be

Looking for opening span

The game will be a test of long-distance
in the English style.

If you have any problems with the survey or if you have data to add, please let me know. Thank you!
GARNET COMES OUT SMALL END OF SCORE

Tufts defeated Bates at Sandwich Field Saturday afternoon 12:45. This defeat at Tufts hands of Tufts was similar to that endured by the distat of the request at MeMall last year and the same ans was responsible for the winning touching. Captain Van French, Tufts's star back, equalized his long run of last year with a 40 yard run around round and to score the first touchdown of the game.

Early in the first quarter after an exchange of punts, Tufts recovered a Bates fumble and a few line plunges moved the ball to their 40 yard line from where Captain French executed his long run over the goal line and added by excellent interference. The try for goal failed.

In the second period the aid of a long forward pass Tufts took the ball to the Bates 40 yard line from where McFarland took it over after a few yards gain by Winter and French. This try also failed.

Up to this time Bates had been un impressive and kept Tufts off their territory only by the poor passing of Fellow, but the Street had opened the Jammers points enough for the game and after the second Tufts touchdown completed completed Captain Casey's team. By Woodward, Bates star back, was in the way of all practices all work favoring a brace received in the Mass. college line, then entered the game for Fellow and celebrated his return by a 90 yard dash and carried the ball to the Brown and Blue 20 yard line from where he took it over after Charlie Ray had gained a 5 yards from the line. Finally then replaced Hubbard and did the gaining for the Garret, and held his cry with Captain Finch, the ball with the ball in Tufts territory and with the Cortez going strong.

The second half saw Sinel's at quarter back and Baker of last sea- son's Freshman team playing a half back position. Bates appeared more aggressive after the intermission and started a march from the field that brought them almost within snapping distance of the goal, but the Tufts eleven took advantage of the few minutes' rest between periods and scored two tries to hold the Cortez margin for down, and an incomplete forward gave the ball to the Moford team. Tufts turned the tables and in the second half forced the Street into the Bates territory on a series of runs and rushes. Within the Garrett 20 yard line, K. Fuller (Bates) failed and it was Bates' ball on the 80 yard line. Woodward gave the ball a goal for a gain of 15 yards, and the next play took play 15 yards for Moulton and added another 15 yards. Tufts was penalized 15 yards for piling up and 15 more was added for illegal play to the referee. This put Bates in an advantage, moving position on the Tufts 30 yard line. Ray setted a few yards for the Garrett, but a fumble on the next play kept the Garrett from scoring. After the Garrett through Woodman recovered. Bates re- moved to the normal game at this stage, and there were but a few seconds to play but on neither of the two passes was completed Tufts regained the ball as the game ended.

Bates showed a fighting football spirit, but the fact that injuries during the week had prevented the best combination to practiced together hampered the Five. Tufts never showed their best form. Charlie Ray played a great game in the line for the local team, and assigned a forward pass in the second period though he did meet the Lebarn boy spot his punt until after the game was over. Peterson and Captains Price also shone in the line for Bates, while Woodman, Hay, Baker and Moulton excelled in the back- field.

Captains Finch and Perry of Tufts started on the free kicks. While the game was not over, the Jumbo center featured in the line by his outwitting defensive play.
