FIVE NEW MEMBERS TO BATES FACULTY

Miss Pope Dean of Women

Miss Pope announced the admission of the following five new members of the faculty, marking the beginning of the school year 1926-27. The first of these is Miss Beatrice V. Pope, who will direct the Women's Work, to be known henceforth as the Dean of Women. Miss Pope also announces the promotion of Mrs. Lenas M. Niles, Miss Pope of the Social Science Department of the University of Washington, and received graduate degrees from that institution, to be assisted in her work with students. Miss Niles was active in the war as a Surgeon of the Administration in the office of the Surgeon General. Besides these positions she has been Dean of Women at Johns Hopkins University and later the Educational Secretary of the District of Columbia.

Miss Onoaka Bass

Miss Onoaka Bass, is named as Assistant Director of Hygiene for Women. After graduating from Toronto, Miss Bass is engaged in graduate work at Wellesley in the department of educational hygiene. Miss Bass has taken in a very creditable way the position of physical education at Wellesley and Alpha Kappa Alpha, and at Tennessee College for Women.

Mr. Andres Myhrman

Mr. Andres Myhrman, is named as the new visiting instructor in Norwegian. Mr. Myhrman attended the University of Wisconsin, and has had extensive research work in Norwegian, and at the University of Chicago and the University of Pennsylvania, from which he received his Master's degree. During the summer of 1925 he has been studying at the University of Minnesota, besides being a member of Phi Beta Kappa. Mr. Myhrman will take his degree from the University of Wisconsin, chapter of Alpha Lambda Phi, the Research Society, of the American Sociological Association, and the American Psychological Association.

Mr. Ward Browning

Mr. Ward Browning is named as the Assistant Professor of Rhetoric and Argumentation at Bates. Mr. Browning is a graduate of both A. and B. M. at Colgate University, and a recent graduate at the University of Wisconsin. Besides being a member of Phi Beta Kappa, he has taught at the C. F. Social Academy at Annapolis, Texas A. and M. College, and Mentmore Academy, which is one of the best secondary schools in the country.

Mr. Selden T. Crafts

This year also marks the creation of a new position in the music department, that of Professor of Organ, and Bandmaster. Mr. Selden Crafts has been fitted to take charge of all the musical organizations—choir, club,orchestra, and glee club. He is expected to bring into the students, as so often happens in new places, a new interest in music, especially to the entering class of '29.

FROST WELCOMED AT JOINT RECEPTION

The annual reception to the members in the class of 1891 was held Saturday evening in the lobby of the Empire Theatre. A planning innovation was the two reel comedy portraying the careers of "Our Miss Dahl," which was shown for the evening. Mr. McManis, took charge of the new scenes, which are humorous to hearing.

The Addresses of the evening were given by Miss Minnie Wright, welcoming the class of '91 in a white in behalf of the new Dean of Women, Miss Beatrice V. Pope who brought in the International significance and working conditions of the day. The addresses showed the result of the careful marking that they have been given by a splendid record of welcome, their receptions were given by a splendid record of welcome, their addresses were given by Miss Minnie Wright, welcoming the class of '91 in a white in behalf of the new Dean of Women, Miss Beatrice V. The Farm Electrical

Of the six and a half million farm homes in this country, only half a million have electricity.

Still, the advantages of electricity are widely known. But there is more to farm electrification than the installation of motors, lights and heaters. Current must be brought to the farm, and that means many miles of transmission lines supporting poles, transformers, and adequate generating equipment.

Slowly but surely the electrification of American farms is taking place. As farmers learn how to use electricity, rural service lines reach out farther and farther into open country.

Six million farms to be electrified! Here is a vast and virgin field for the application of electrical energy, with countless opportunities for college-trained men in the technical and commercial phases of this undertaking. And for the agricultural college student and others planning a future life in rural sections, it means a bigger, happier life-time now in the making.
