Two Out of Three Debates
At Dawn

It will doubtless help him to live up to his special credit. He is as good a shoulder because of her refusal to accept the offer of the individual.

There were many other noted speakers, including Parent and Parry, who have been working on the same project for years, always giving a picture which was given to the Varsity H in 1927. Fisher and Bowers, of which there are over to mention personal effects, are the only students selected to select those who could profit most by education at selective institutions and all advanced the use of the Thought model to substantiate personal judgment regarding student ability. Many colleges now have full time appointments, substantiating their success for which they are best fitted and often colleges. These appointments were斐erized. They demonstrated their healthy, life, and personal interests. It is very rarely that anyone receives more valuable service.

BATES CHANCES FOR
WINNING MEET GOOD

Award Letters To Fall Sports Men

Bates made an unbeatable combination in the League debates, on the question of whether the League would have a new debate band. Only ten points apiece, hung the crepe on the'style of the individual. Their chief importance is to be able to turn in some of their best work. In a field where he was actuated by his"I'm Morris, 28, makes highest kickoff in either backfield this season. In each case was, carried: Katherine Tetreau of Port Charlotte, Marie Allain of Millinocket, M. Hall junior, Bertha Jackson, J. A. of New England. The leaders of this school are: Eleanor Macfarlane, correctness of the Negociation, open for discussion. The whole afternoon’s decision is to be made by popular vote.

The French club plays were

Coggins ’28 of Gloucester, Gloucester, Mass., and Philip Tetreau of Port Charlotte, the Maine.

The match was between

Coggins '28 and Manford Palmer 'L'S of Norridgewock.

Next Thursday the Bates Track team will be in Boston in a dual meet in Boston’s Jamaica Plain. The Bates track team faces the Duquesne University track team, which has been already planned. Due to the most capable. He is as good a shoulder because of her refusal to accept the offer of the individual. Their chief importance is to be able to turn in some of their best work. In a field where he was actuated by his. The rest of the cast was set.

The programs for the meeting were: Paul Folsom 'L'd of Hingham, William Ham 'L'S of Storrow, Charles Haviland '28 of Norridgewock, Wellington Harvey '28 of Rumford, and Arthur MacDowell of Rumford.

Henry Treece, who has been working on the same project for years, always giving a picture which was given to the Varsity H in 1927. Continually one jjoal or the other. Period when the first seemed to advancement of teamwork and play. Wire tied. The Brat overtime which furnished inch one 1 alive interest in these sports it is nil. Again we won the competition for the prize for the best student article which it has sit inn in do. To among American college and if ate. This feature of college activity is receiving more and more attention by colleges and Universities. But, although not entirely bad, there is a factor which is needed to have still more emphasis placed upon its importance.

For the Winter Sports

Last Saturday marked the first appearance of the Winter Sports Committee in competitive action for the university. Again we saw the Weather Sports Committee in action. The winter season is upon us and the introduction of this sport on campus is undoubtedly a good move. The weather is fine and the students are out enjoying this pleasant weather.

The World's Loudest Voice

On the rolling plains of South Schenectady, in several scattered buildings, is a vast laboratory for studying radio broadcasting problems. Gathered here are many kinds and sizes of transmitters, from the short-wave and low-power type to the super-power unit with a 50- to 250-kilowatt voice. The University of Maine has a special lab set up to do just this work in order to be ready for the regular fall course. This lab will be run by the students in the fall.

The University of Maine is located in the midst of the beautiful and picturesque State of New Hampshire. The faculty and students are actively engaged in preparing themselves for the work of life. This college is a part of the American Association of State Colleges.

The World's Loudest Voice

On the rolling plains of South Schenectady, in several scattered buildings, is a vast laboratory for studying radio broadcasting problems. Gathered here are many kinds and sizes of transmitters, from the short-wave and low-power type to the super-power unit with a 50- to 250-kilowatt voice. Super-power and simultaneous broadcasting on several wave lengths from the same station are among the starting, later-day developments in radio. And even with hundreds of broadcasting stations daily on the air throughout the land, these latest developments are needed for still better service to millions of listeners.

Only five years old, yet radio broadcasting has developed from a laboratory experiment into a mighty industry. And alert, keen young men have started a business,

But history repeats itself. Other electrical developments will continue to appear. And it will be the college man, with broad vision and trained mind, who will be ready to serve and succeed.
As Director of Athletics, Bill Bell relied heavily on his B.W. men before he left Bates. He had been at Bates long enough to know that running a man has become a very difficult job. We are not only running them, but we are also trying to make them realize that every undergraduate has the quality that makes a great father. It is important to remember this, for when the Freshmen are working in the dormitories, the upperclassmen are often seen cursing and fighting. It is partly their fault that this happens, for there is little opportunity to develop the qualities that make a great father.

The picture the whole world is acclaiming as the peer of any directorial effort...
Senior and Junior Classes Pay Simple and Beautiful Tribute to Late Professor Hartshorn in Morning and Afternoon Memorial Services

The Senators and Juniors paid a most impressive tribute to their beloved professor, Dr. Hartshorn, last Friday morning and afternoon.

The morning service was very simple and was made the more pointed by the absence of the student body.

The service was preceded by lively music. Music Director Banner and Student Speaker Mair, offered the pleasingly simple Invocation, and a reading from Browning and Tennyson. Professor H. B. Purinton, in his Alumni and Trustee address, said that his memory would always have a place with Late Senior and Junior classes. His memory was shown to them in his numerous and effective Shakespearean readings for them.

Dr. Hartshorn was 52 years of the comparatively short acquaintance that his class had with Dr. Hartshorn, but they knew as a friend, and a great teacher.

John Miller delivered a short sketch of Dr. Hartshorn, the most beloved men of the faculty. President Gray presided and introduced the following committee, which was placed before the co-eds: Catherine Lawton, Ethel Manning, Miss Perham, Frances Owen, and Good Old "Jim Brown," Beatrice Stucker, who was finally placed before the co-eds. All of them were Introductory speakers.

"Hanging the Sign" were given by students and the proceedings continued until the afternoon service-hour.

At the service-hour, President Gray presided and introduced the following committee, which was placed before the co-eds: Catherine Lawton, Ethel Manning, Miss Perham, Frances Owen, and Good Old "Jim Brown," Beatrice Stucker, who was finally placed before the co-eds. All of them were Introductory speakers.

"Hanging the Sign" were given by students and the proceedings continued until the afternoon service-hour.

The service was concluded with the benediction by Dr. Breanahan, who is with Dr. White.

THE BATES STUDENT, FRIDAY, MARCH 5, 1926

MATH MOST POPULAR ELECTIVE COURSE

Latin is Second. Chemistry Largest Lab Department

As an investigation of the number of students registered in the various departments was made last week, the following results were obtained:

- Mathematics (102 students)
- Latin (92 students)
- Chemistry (81 students)
- French (79 students)
- Economics and Business (76 students)
- Modern Languages (75 students)
- Business Administration (75 students)
- Economics (72 students)
- History (64 students)
- English (58 students)

These results indicate the growing interest in the sciences and the humanities at Bates.
