Research Worker for Westinghouse is Speaker Here

Bates Alumnus Talks on "Industrial Research"

Responding to an invitation extended by the Lawrence Chemical Society, Mr. Robert E. Manton, Research Engineer for Westinghouse Electric Manufacturing Company, spoke at the belated meeting of the Bates Scientific Association and the Lawrence Chemical Society, April 19th, and described some of the more important and interesting developments which have come from the laboratories of industrial research. Mr. Manton is the son of Mr. and Mrs. Robert E. Manton, Jr., of Hopedale, Mass., and is a graduate of Bates College, Class of 1926. He was graduated with the degree of Bachelor of Science in 1926, and with the degree of Master of Science in 1927. He has been with Westinghouse since 1927.

Mr. Manton said that the work of the industrial research laboratories is not only of the greatest practical importance to industry, but also of the greatest scientific value. He pointed out that the work of the industrial research laboratories has been responsible for many of the important advances that have taken place in the field of scientific knowledge. He also pointed out that the work of the industrial research laboratories has been responsible for many of the important advances that have taken place in the field of scientific knowledge. He also pointed out that the work of the industrial research laboratories has been responsible for many of the important advances that have taken place in the field of scientific knowledge.

Generating Brain Power

BRAIN power, not horsepower, is the chief operating requirement of the electrical industry.

This requirement must be continuously anticipated to provide leaders for the future. Accordingly, each year, more than 400 picked college graduates come to the General Electric Company for a post-graduate course in electrical science.

With a faculty including inventors and engineers of international distinction, something more than electrical knowledge — insight is imparted to these young men. Here they also find inspiration which prepares them for leadership in this electrical age.

KRESGE'S
Has an Opportunity for Executives with College Training

What other College Men have done with KRESGE'S

"In 1918 I graduated from Rives College, having majored in chemistry. After following my profession for several years I concluded that my personal advancement was limited. In 1920 I entered the employ of the S. S. Kresge Company, worked hard and many long hours, but was, as manager of a new store, an agent of my membership in the great Kresge Organization. My future is unlimited."

An Illinois Western University graduate, class of 1915, says: "My efforts with the Kresge Company have been simply a record and now, as store manager, I feel sure that men who give their best efforts to the Kresge Company will not be disappointed."

One of the many successful Kresge store managers in a graduate of the University of Illinois class of 1925. He advises to ambitious young college graduates to "Prepare yourself now for future success."

A graduate of the Ohio State University writes: "I am not boasting of my success as a manager of a Kresge Store, but I know that financially I am far ahead of most of my college pals. A man's ability is practically the only thing lacking his success."

Another successful store manager, a graduate of Indiana University says: "We're not alick of work but study for college."

Men have done with

WE WANT MEN to grow with Kresge. We are now operating 5,100 stores and are opening new stores at the rate of 75 to 80 a year; thus creating opportunities for men who join our organization. We offer to trade college graduates to be the kind of men we need so that they may reach the kind of positions they desire.

If you have a trained mind and a well-rounded personality and possess the first two requisites. If you are willing to work hard, to learn the details of every phase of store management and to start at the bottom on a small salary, we may very possibly do business together. For the reward is well worth the effort. To those who know how to run the Kresge training plan, we offer store managers' positions paying very attractive salaries.

It's like having a business of your own, plus the added opportunities in a corporation with $150,000,000 sales annually.

A Kresge representative, possibly a graduate from your own college, will be sent to tell you personally of the opportunities with Kresge if you write our Personnel Department.
