Bates College
Bates Men Debate Swarthmore Girls
"Emergence of Women from Men's Dominance" in Open Forum Follows

A Bates debate team met a Swarthmore team on the floor of the "Ride" Sunday afternoon, March 5th. The question under debate was "Resolved that the entrance of women into our educational institutions is an actual benefit to society, as a whole." The affirmative was presented by Dr. J. W. G. Taylor, board member of the women's university; the negative was represented by Dr. E. C. Smith, dean of the city university. The affirmative team was won by 47 votes to 19. No one is invited to a dramatically exciting "Ride," so if you wish to see this debate, do not forget to be present Sunday afternoon, as an interesting and instructive afternoon's entertainment is promised.
Maiden Wieder

On a former occasion this year when the Athletic Manager, as a compliment to our men's tennis teams, presented trophies to the individuals who had achieved the highest averages, some of the boys who had competed against each other during the season, and who were conscious of the fact that not only had one or two of them been able to gain more than their opponents, but also those whose results were inferior to theirs, were very much upset by the Auditor's decision to present an award to one of their own. The purpose of the gift was to encourage the best tennis player, but a great number of the boys, who were more interested in the outcome of the matches, were not satisfied with the result. They felt that the Auditor's decision was unfair and that a better selection should have been made.

Preliminary Frays in School League

March 20 is Date of First Debates—Several Bates People Coach Teams

By SHELLEY GAY

The Preliminary Frays in School League, sponsored by the Bates Debating Association, is an exciting event that brings together students from various schools to compete in debates. The teams are divided into groups of two, with each group consisting of one team from Bates College and one from another school. The Bates College team is coached by the Debating Association, and the other team is coached by a professional coach. The debates are held in the Little Theatre, and the format includes an introduction, two speeches, a rebuttal, and a summary. The debates are judged by a panel of judges, and the winners advance to the quarterfinal round. The Bates College team is aiming to win the championship and bring home the trophy. The Debating Association is excited about the opportunity to represent Bates and hopes to continue their successful record of winning in these competitions.
What the NEW HUMIDOR PACK means to Camel Smokers*

COMPARE a package of Camels with any other cigarette and note the difference in the technique of packing.

Note that Camels are completely enclosed in an outer transparent cover which protects the moisture-proof cellulose and sealed air-tight at every point.

We call this outer shell the Humidor Pack. It differs from the ordinary cellulose pack and while it is egg-shell thin, it means a lot in terms of cigarette enjoyment.

It means, for instance, that evaporation is checked and that Salt Lake City can now have as good Camels as Winston-Salem.

While Camels are made of a blend of the choicest Turkish and mellowest domestic tobaccos, it is highly important, if you are to get full benefit of this quality, that these cigarettes come to you with their natural moisture content still intact.

The Humidor Pack insures that the fine tobacco of Camels from drying out and losing any of their delightful flavor.

Aside from cheap tobacco, two factors in a cigarette can mar the smoker's pleasure:

Fine particles of peppery dust if left in the tobacco by inefficient cleaning methods and irritate delicate throat membranes.

Dry tobacco, robbed of its natural moisture by smoking or by evaporation gives off a hot smoke that burns the throat with every inhalation. We take every precaution against these factors here at Winston-Salem.

A special vacuum cleaning apparatus removes dust and smoke and the new Humidor Pack prevents dryness.

Check the difference yourself.

It is a very simple matter to check the difference between Humidor Packed Camels and other ordinary dry cigarettes. First of all you can feel the difference as you roll the cigarettes between your fingers. Camels are full-bodied and pliable. A dry cigarette crumbles under pressure and sheds tobacco.

If you will hold a cigarette to each ear and roll them with your fingers you can actually hear the difference.

The real test of course is to smoke them. And here’s where the new Humidor Pack proves a real blessing to the smoker.

As you inhale the cool, fragrant smoke from a Camel you get all the mildness and magic of the fine tobaccos of which it is blended.

But when you draw in the hot smoke from a dried cigarette see how flat and brackish it is by comparison and how harsh it is to your throat.

If you are a regular Camel smoker you have already noticed what proper condition of the cigarette means.

But if you haven’t tried Camels in the new Humidor Pack you have a new adventure with Lady Nicotine in store.

Switch your affections for just one day, then go back to your old love tomorrow if you can.

S. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.
Compliments of the \textit{Chapman Special}. At the I. C. O.'s, made about two minutes after he arrived here from the West, and on the 13th of this month, New York. "Why, this could have been expected," Chapman said, and dropped half a second off the record. It looked to me more like an obstinate ruse than an attempt to give a man the proper setting in which world marks are long up," continued Thompson.

Chapman hid his keen disappointment under a veil of cheerfulness, and his coach refrained from any serious outburst of feeling, but it was apparent to all that his keenness was lessened, for the telephone, that he was exceedingly "but under the collar!" And those who knew Ray Thompson must realize that no mere ease of "sour grapes" would ever dull his sunny disposition, especially since the performance of his stellar athlete called for the highest possible praise.

However, everything seemed to go wrong just when matters would have functioned most smoothly. The first thing we noticed at the end of every lap was a serious handicap, but that he was hindered on the track was unquestionably worse. It ended of every lap was a serious haul in which Osie could not get his time at the line. The fact that no mere ease of "sour grapes" would ever dull his sunny disposition, especially since the performance of his stellar athlete called for the highest possible praise.

With the basketball tournament scheduled for the week-end, a lively attempt to give a man the proper setting in which world marks are long up," continued Thompson.

The criticism is that too much publicity is being given to Chapman! (May they read this issue and weep!!)

The Garnet Mercuryites will be waging their efforts to flirt with the 1.50 mark in the New England Meets. Among a few jealous sore-heads, who, happily, occupy but a very small per-
