A Word Of Farewell

Because the college year has always had a dispassionating habit of speeding by at a breathless pace, the final page of the Student is not very far away. Although many ideas which at this moment may seem significant will be forgotten in a few years, the voices raised in our halls have not been in vain. The earnestness and dedication which have been so apparent will not be easily forgotten by the alumni of Bates College.

Student government has worked for a higher level of self-government and a more democratic rather than autocratic institution. W. A. A. has acquired the Parent and Parent which forces everyone to "play for the boat's sake" and to act as a significant entity in personal life. The W. C. C. is in addition to successfully fulfilling its established purposes, attempting to attract an informal gathering of the women after dinner in The Student. These after-dinner gatherings offer an opportunity to women, at least, of expressing themselves. We want to let you in on the fact that we have been accomplishing this through the encouragement of all our activities.

We sincerely hope that you, our successor, may enjoy the same advantages that we have had. We encourage you to visit us at your convenience and improve the status of your alma mater.

Words Of Passage

OUR EDITORIAL ON PEPSI last week was not intended to be a malicious attack. It was merely a protest against the attempt to commercialize college life. We are not concerned with the sale of cold drinks, but rather with the sale of our lives to the least possible advantage. We believe that a college education is far more valuable than the price of a bottle of Pepsi. The Student is not a newspaper, but a forum for the expression of the thoughts and feelings of its members.

OUR FRUCTIONS DO is the debating squad and its contretemps, which are often amusing. The Student is not a mouthpiece for the administration, but a reflex of the student body. We can express our grievances and our hopes without fear of retribution. Our voices are heard, and we can make a difference.

THE OUTING CLUB AND CHRISTIAN ASSOCIATIONS could be divided into two distinct groups, the one seeking to promote wholesome recreation, and the other fostering religious instruction. Both have their place in college life, and it is important to maintain a balance between the two.

SUMMARY

Pepperidge Farm, 1100 Main Street, New York, New York.

For the love of Mike, stop this nonsense. It is destroying the college community as we know it. The Student is not a vehicle for the administration to promote its pet projects, but a forum for the expression of the true college spirit. We believe that the college year should be one of learning, growth, and personal development, not one of commercialization. We urge the administration to consider the interests of its students before making decisions that affect our lives.

Sincerely yours,

Chairman of the Student Council
All World Honors Goethe, German Literary Genius

Died in March, 100 Years Ago—Begun to Write
When Young—Versatile Genius—Interested
In Botany and Optics

By William S. Morton

This year marks the one-hundredth anniversary of the death of Johann Wolfgang von Goethe. He was born on August 28, 1749, in Frankfurt, near the Taunus Hills, and was the only son of a wealthy merchant. He was the eldest of five children. He was a precocious and versatile boy, and it was evident from an early age that he would make a remarkable contribution to the world of letters.

Goethe was a prolific writer and was known for his contributions to poetry, drama, prose, and philosophy. He was a versatile genius and was interested in many fields, including science, philosophy, and art. He was also a diplomat and a statesman, and he played a significant role in the cultural life of his time.

The most significant friendships of Goethe were with his closest confidants, including his lifelong friend, Wolfgang von Kempelen, who was an accomplished mathematician and physicist. Goethe was also a member of the Iluminati, a secret society that was dedicated to the study of science and the advancement of knowledge.

Goethe was a proponent of the idea that all knowledge is interconnected and that the arts and sciences are not separate but are complementary. He was a utopian in his thinking, and he believed that a society that was based on reason and science would be a better place than one that was based on superstition and tradition.

Goethe was a great influence on the cultural life of his time, and his work continues to be studied and admired today. His contributions to literature, science, and philosophy have had a lasting impact on the world, and he is remembered as one of the greatest minds of the eighteenth century.
