A Selfish War

While the campus supposedly has been pulled out of the past world and is no longer as it were a mirror of what is going on in the world, there is no question that the war and the question of whether Europe or the United States is going to be pulled out of the past world and into the future world is of great concern to every college student who stands for democracy.

We understand, from sources whose information is reliable, that the United States and Great Britain are in this struggle between Bolshevism and Pare- malism. The former wants war and the latter wants peace.

In the early stages of the war, the American people were for peace. The majority of the American people were for the war up to the point at which the United States and Great Britain's defeat of Germany and Austria-Hungary created the situation in which the American people are now.

The war has been fought for ten months. At the beginning of the war, there were five million soldiers in the United States. There were ten million soldiers in the United States at the beginning of the war. There were twenty million soldiers in the United States at the beginning of the war.

Just two words...

Yes, I have heard about those two words; and now and then those words—But They Satisfy—means “To gratify fully.”

Why do these two words “they satisfy” fit Chesterfield? Because Chesterfield Cigarettes are milder. Because Chesterfield Cigarettes taste better.

Chessterfield’s way of blending and cross-blending fine Turkish and Dominic tobaccos brings out better flavor and aroma.

They Satisfy...
