Prof. Berzunza Advises Students To Do Research

Speaker Before Clubs Discusses Alexander The Great

Professor Jules Eisenstaedt of the English Department, University of New York, has suggested to students at Bates this week that they read his book, "Alexander the Great," for the information it gives about the Macedonian leader, the man who became famous as King of Kings and as a conqueror of three continents. Professor Eisenstaedt is a specialist in ancient history and is well known for his works on the eastern Mediterranean region. He has written extensively on Alexander the Great and his campaigns, and his book is considered a valuable resource for students interested in the subject. The professor is currently teaching a course on ancient Greece at the University of New York, and he has been invited to speak at several conferences on the topic. Professor Eisenstaedt's book, which is widely available, is a comprehensive work that covers the life and times of Alexander the Great. It is highly recommended for anyone interested in the subject.

DOPESTERS PICK FRESHMEN TO WIN INTER-CLASS TRACK MEET

Yearlings Favorites With Kishon, Johnson, And Gore As Point Gainers—Seniors' Chances Considered Poor

SPORTS COMMENTS

By NATE MILBURN

It looks as though the dopesters might be wrong, as it seems that there is a new star in the making among the freshmen. Last year, the younger men were considered poor and were not expected to turn in any fine performances. However, this year, the freshmen have shown great promise and are expected to do well in the various events.

The freshmen are considered by many to be the future stars of the Bates track team. They have shown a great deal of talent and are expected to do well in the upcoming meets. The seniors, on the other hand, are considered to be the weak link in the team. However, they are expected to do their best and give their all in the upcoming meets.

The meet will be held on Saturday, January 10, and will feature a variety of events, including the 100-yard dash, the 220-yard dash, the 440-yard dash, and the 880-yard run. The meet will also feature a few exhibition events, including the long jump and the high jump.

The freshmen are expected to do well in the meet, and are considered to be the favorites for many of the events. The seniors, on the other hand, are expected to do their best and give their all, but are not expected to win any of the events.

The meet will be held on the Bates track, and will be attended by a large crowd of fans. The meet will be a great opportunity to see some fine track performances and to support the Bates track team.
Summer who had "pussed" all his student days. I met a Harvard professor last week who gave it A-plus, and then planned a vacation.

It is not the editor's job to interrupt the author in mid-sentence. Mr. Staples refers to "The New Deal in Garnets." It is difficult to maintain a balance of evidence and the editors are not in the habit of "whipping" students.

Mr. Staples writes epigrammatically "Dr. Longsword, the first paragraph of the preface, Mr. Staples says: "One is supposed to do one's duty, as a student, and to be "good," sometimes, he knows." But we are not too antique to appreciate the style of the author, and there is no reason why he should not use his own words.

The book is a 24-page direct sale piece. It is not a true review, but it is a critical analysis of the work of the Bates Musical Society. This year Pirates have replaced the annual Pop Concert and Dance. Much interest is being shown in the event, and tickets are sold as soon as they are made available. The committee, that has planned it, is not too antique to appreciate the style of the author.

The committee, that has planned the annual Pop Concert and dance, is the only one of the Clubs that is being given by the Bates Musical Society. This year the Pirates have replaced the annual Pop Concert and Dance. Much interest is being shown in the event, and tickets are sold as soon as they are made available. The committee, that has planned it, is not too antique to appreciate the style of the author.

**EDITORIAL**

A few weeks ago we were flattered to receive a letter of commendation from the community on our "Bomboar..." issue. It was a frank discussion and commendation of Bomboar... by a few students and members of the faculty. Several of the suggestions were taken, and a decision was made to print further articles on the subject of education. A few of the suggestions were incorporated in this issue. We feel that our efforts have been worthwhile and that our readers will find the articles of value to them.

**FEATURES**

**Tea Versus "Pop"**

Donald H. Smith

Good old English customs have their point even now, and those who don't like "Pop" on a hot day may try tea. The old side motto has been "tea or coffee," whereas the new slogan is "tea or pop." This is a natural progression, as the old adage went "tea and pop."

Up to 1893 there was no problem. College graduates werelicensed to pass the boil and were allowed to play cards, but they were not allowed to smoke. The Bohemian, however, was allowed to smoke, and this led to the formation of the "Bohemian Club," which met at the same time, representing the more con- stituents based on the upkeep of M.I.T.

**The Student Looks at the World**

In the picture above, an artist's conception of two happy masqueraders as they shave off snow from their foreheads. The droll expression on their faces, the split-second timing, and the comical gesture make this a hopeful sign. There is no telling what our ancestors are trying to do to, and which may be used as the basis for some future publications. The pictures in this season's series of radio plays are hut three weeks away.

**INTERCOLLEGIATE NEWS**

Patterson, N. Y., March 11. (AP) - Two young people were killed in a car crash here today. The car careered into a ditch after colliding with a tree. The driver and passenger were pronounced dead at the scene of the accident.

**Personalities**

**Bates Student**

February Ninth

**Masquerade**

Some interesting developments have occurred in recent weeks. The demand for "Pop" has increased since vacation, and if they get through the season, they are likely to be a disorder or a social factor. (As it is too late for Common Food, and that doesn't take place, they will have to give an invite if she can't tell the difference, and the rest of those who are "in the know," are likely to be.)

The dolly Catterers receive an invitation to dance, the basis of the order, and the students are to be seen partying with their parents. There is a useful table which shows the names and addresses of officers of the Intercollegiate Press in the United States.

The opening of the freshman class at the New York Stock Exchange is a pleasant event for any of the students who are likely to be there.

**Ice Storm**

The chrysalid stubbed its head on the ice, its wings became crystalline. They had been arrested. They had been caught, they were frozen, their color was bluish, they were unable to move. They were not moving on their ice, they were trying to move, but they were unable to do so. The ice had become their prison, their prison.

**PROFEET. R. X. BLACKETT**

Professor R. X. Blackett, reader in physics, and be it known that he is in London, will speak on Wednesday evening at 8:00 p.m. at the London University, in the lecture room of the physics department.

**PROF. L. T. HANCOCK**

Professor L. T. Hancock, of the department of physics, will speak on Thursday evening at 8:00 p.m. at the University of Manchester, in the lecture room of the physics department.

**PROF. A. C. CURTIS**

Professor A. C. Curtis, of the department of chemistry, will speak on Friday evening at 8:00 p.m. at the University of Liverpool, in the lecture room of the science department.
