It's irritating and it means... jangled nerves

Yes, it's irritating to listen to that constant, tiresome humming — and more than that, the jangled nerves it is sign of jangled nerves. If you notice any of these little things, take some nerves habits in yourself — if you whistle through your teeth — jangle your keys — drum on the table — then it's time to start taking care of yourself.

Lucky's are always kind to your throat

We like to tell about the finer tobaccos in Luckies—the choicest Turkish and domestic, and only the mild, clean center leaves—they taste better—then "It's toasted"—the throat protection. But we're just as proud of the way Luckies are made. They're so round and firm, so fully packed—no loose ends that's why you'll find Luckies do not dry out.

Check out our selection of tobacco products and find that Luckies do not dry out—find that Luckies are always kind to your throat.

We solicit the business of Bates Students

— they age good grapes to make rare wines

— and they do something like that to mellow good tobaccos

WHERE THE RARE WINES come from they know that the two most important things in wine-making are the selection of the grapes and the long years of aging in the wine cellars.

IT'S VERY MUCH THE SAME in the making of a cigarette. You have to get the right tobaccos, then put them away to age and mellow in wooden cases.

You can't make a good cigarette like Chesterfield in a day. It takes over two years to age the tobaccos for your Chesterfields—but it adds something to the taste and makes them milder.

Everything that modern Science really means about is used to make Chesterfield the cigarette that's milder, the cigarette that tastes better.
