DR. HAROLD STORM TO BE SPEAKER AT FIRST JOINT MEETING OF Y. M. - Y. W.

RALLY FRIDAY IN LITTLE THEATRE

FROSH WOMEN ENTERTAIN ON STUNT NIGHT Stu. G. Beatons Class Insignias

The bridge was built by the Bates Men on Friday night, October 15, at the Little Theatre, and attracted a great many people. The bridge was a replica of the bridge that Dr. Townsend has organized for the New England Geologists to use in their study.
Reconstructions?

The recent Arctic weather seems to have precipitated something else besides snow. One could hardly describe the present situation in academic circles as normal. But certainly a large part of these winter blues is due to the students who have a well defined attitude towards the proposed action of the Athletic Council. Naturally, just what is the attitude of the Athletic Council? Have they been practically, if not theoretically, dropped by failing to bring to the notice of the students. And how is the sentiment of the campus be anything other than gloomy.

Certainly the majority opinion is that the failure of a college to produce a bowl to play in Los Angeles is a case for emergency measures. The sports program is something of a paradox. Attempting to find a mean between the mild winters that are necessary to maintain our native animals and the terrible weeks that are undergone by out-state reporters we feel that native students are educated and entertained at the expense of other sportsmen. Mr. Oakey has rather picturesquely depicted the phase of their condition. But fundamentally the question is whether or not the Council that Winter Sports was practically a part of the physical education program has to be dependent upon the A. A. and the student body.

We have confidence enough in the Council to feel that their decisions will be made according to their best judgments, as fair as possible. But, in our estimation, it seems that the matter is being misrepresented to them. More careful examination of the sports will, perhaps, convince them that the support which Winter Sports has had plus some attempt on the Council's part to prepare an adequate program would justify the continuance of the activity on the sports calendar.

Fall

I would be something of an insult to the college student's sense of humor to mention the usual fall activities. The view of our Mt. Washington from Mt. David was all that we needed to have seen. The majestic scene, with early snow in the blue basin of the distance, impressed one with the immensity and grandeur of our earth. Unfortunately the "young lads" were not permitted to view this majestic view. It does seem that the campus picnics could include this most beautiful spot on campus in its schedule. As a spot for rest and recreation Mt. David is an advantage few colleges have.

The Broadening Scene

Recent years have seen a shifting of the factors on campus. The growth of the college and the expansion of its activities has been a shift in the importance and influence of old and new organizations. The influence of the college on both students and town is substantial. The activities of the students are of a significant nature, and an increased interest in social problems. The college Y. M. C. A. has been a part of this movement and has tried to adapt itself to the "changing scene.

On our own campus the Y. M. C. A. has undergone a good deal of criticism. But it is adapting itself to the situation. The program for the Y. M. C. A. this year is notable in that it has been revised to include the interests of the students.

The Y. M. C. A. should be more than a social organization. It should be an institution that prepares the students for their future careers. The activities of the Y. M. C. A. should aim at broadening the students' minds and developing their abilities. The Y. M. C. A. should be a place where the students can learn to think for themselves and to take an active part in the affairs of the college.

The Y. M. C. A. should be a place where the students can learn to think for themselves and to take an active part in the affairs of the college. The Y. M. C. A. should be a place where the students can learn to think for themselves and to take an active part in the affairs of the college.
New England Geologists Hold Annual Meeting

DR. FISHER PLAYS HOST

PARTY LUNCHEES AT THORNCRAG CABIN

Group Visits One Of Largest Kettle Holes in United States at Gony

Dr. Fisher

Despite the bad weather, over sixty English demonstrators and geologists successfully concluded their annual meeting here at Hedges House by Sunday afternoon. The weather on Saturday was not favorable for a tour of campus and the students were kept inside listening to speeches. The group visited various places of geological interest on the campus and took time out to visit the Union, where they were entertained by the members of the Bates Student Association. The students also enjoyed the company of the geologists and made many new friends.

Weather Spills Trip

Because of the weather conditions, the group was forced to abandon the plan for a tour of the geological features of the area. The meeting was held in the geology room of the College of Engineering, where a large attendance was present.

Study Geologic Features

On Friday afternoon, the group visited the nearby quarry and examined the geologic features of the area. The students were able to see the various types of rock formations and to learn about the geologic history of the area.

Weather Conditions

The weather was not favorable for a tour of the geological features of the area, but the group was able to enjoy the company of the geologists and make many new friends.

Bates Ties N. H. 7-7
In Hard Fought Duel

By Bob Saunders

The 1933 football schedule has been more than
enjoyable for Bates football fans. And the past four
weeks have seen Bates in action against some of the
strongest competition in the country. Despite the
forced resignation of Coach John W. Fenn, the
Bates football team has shown itself to be a very
proficient and evenly balanced squad.

Bates Vs. Colby

The northernmost meeting of the 1933 schedule
finished on Saturday with Bates and Colby locked
in a scoreless tie. Other figures of the contest
showed Bates making 13 first downs to 8 for
Colby, 111 total yards gained by Bates to 100 by
Colby. Bates also gained 11 first downs through
the air and 2 through the ground. Bates
intercepted 4 passes and Colby 2.

The first half was most of the game and
the tide of battle seemed to be against Bates
for the first three quarters. But the fourth
quarter saw Bates gain a 7-7 tie and a
most impressive performance. Bates
scored two touchdowns in the
final quarter, while Colby
had no scores in the final
15 minutes.

Bates' Joe Judkins

Joe Judkins is a most
exciting performer. One of
the best punters on the
eastern collegiate stage,
Joe judkins had given
Bates nothing short of
perfect service in the
quarterbacking position
before he was injured in
the end of the season in
Pond's Canteen. Joe's
effectiveness as a
sweetwater passer is
well-known, and his
ability to place the
punts is even greater.

V X-COUNTRY
Trials Held Friday

Northeastern—Colby To Run
In Fast Meet On New Course

In anticipation of the Northeastern-
Colby varsity meet next week at
Newburyport, Mass., a trial contest
between members of the Bates and
Colby varsity teams was held in
Franklin on Saturday afternoon.

Bates won the trial meet with a
score of 27, Colby 34. Bates
intercepted 3 passes and Colby 1.

Through the first half of the
contest, both teams were
playing a steady, defensive
football. With the
diagonal passing winds,
both teams had a
steady, defensive
football. With the

Fair enough

FROM time to time we tell you facts
about Chesterfield Cigarettes.

We say that Chesterfield Cigarettes
are different from other cigarettes—that
the tobaccos are different, the paper is
different, and the way they are made is
different. Everything that modern Science knows
about or that money can buy is used in
making Chesterfield a milder, better-tast-
ing cigarette—a cigarette that satisfies.

You can prove what we tell you about Chesterfield.

May we ask you to try them
— that would seem to be fair enough.
