OUTING CLUB HOLDS FIRST CO-ED HIKE TO CAMPUS CABIN

The 1933-34 season.
THE COUNCIL AMENDMENTS

AGAIN THE PROBLEM of improving on the status of the student body has been introduced into the Council. Last year about this time the campus was agog over a revolution that was not only in order, but necessary. The student Council had been proposed and the Constitution of the Student Council was drawn up. Because a formal forum action could not be taken.

The so-calledersen has reared its head anew. Without going into a discussion of gerrymander and body, this section it seems to us that the service provided will be about as good as if Amendment I were passed.

However, the other matters have been the subject of some bitter controversy. Like most colleges, Bates elections are generally public events and not private. But it is the firm opinion of the student body that the success of the experiment was caused by the presence or absence of the Council that this year, in order to prevent any further action, it has shown this year to be the case that Amendment I would remove these effects.

But one of the major points of difficulty is in the general nonination of candidates. A committee of six from the college at large is to be a separate one for each position. The list of nominations for each class will be the number of names for each position in the first three. In this fashion, the public approval of the candidates will be done away with and a more representative Council will be elected.

TOWNSEND SETBACK

We notice that Dr. Townsend is really on his last legs. He will not be able to meet the requirements of the public's demand for a clean and honest government. In a public meeting last Sunday, his speeches were not heard by the audience because they were drowned in the noise of the town.

Although the public is still in a state of shock, David B. Danforth is still waiting for the government to take action.

Professor Overstreet Speaks To Large Group At Vesper Speaker's Club

DENTISTRY

In the economic depression that has set in, dentistry has been one of the hardest hit. However, the future of dentistry is not gloomy. In fact, there is a new dental school being opened in the city.

The new school is being started at 217 W. Market St. It will be the second largest in the world. The school was opened by Dr. Townsend and his colleagues.

The school will be open to all students who are interested in dentistry.

The school offers five essentials for success in dentistry:

1. **Cure:** Students will be trained in the latest methods of dental treatment.
2. **Prophylaxis:** Students will be taught the importance of dental hygiene.
3. **Emergency:** Students will be prepared for emergencies in dental practice.
4. **Surgery:** Students will be educated in the latest surgical techniques.
5. **Research:** Students will be encouraged to conduct research in dental science.

Y Speaker Says Students Lack Social Contact

We have to build a new America on the understanding of social problems, particularly economics. Our aim is to establish a closer relationship between the遇上 Lattey's and the community.

Meet Rena

"In that case," murmured Ted, with a smile like a tooth lip.

"Why it is holding the cat's head."

The selection, buying and preparation of the right kinds of Turkish tobaccos for making Chesterfield Cigarettes is a business in itself...

We have buyers in all the tobacco markets of Turkey and Greece, including Xanthi, Cavalla, Smyrna and Samos.

And at Smyrna Chesterfield has built the most modern tobacco plant in the Near East. Here the spicy, aromatic Turkish leaf is sorted and graded under the eyes of our own tobacco men.

Then it is put away to age in its own climate for two years or more to make it milder and better-tasting. And if you blend and cross-breed the right kinds of around-the-world Turkish tobaccos with mild ripe home-grown tobaccos as we do in Chesterfield you have...

the cigarette that's milder the cigarette that tastes better
