Several Suggestions To Pacing, Peering Profs.

There have been numerous instances of over-speeding, or peering, by professors, and these instances have been noted by members of the faculty. Although such instances are not uncommon, they are undesirable, and it is hoped that they will be avoided in the future. It is hoped that such instances will be avoided in the future.
New System of Grading

The new system of grading at Bates has certainly defeated one of its main purposes. The system was to make the student less grade-conscious, but it is evident that the students are not only grade-conscious, but grade-obsessed and worried.

The difference of opinion among the professors, and their attitude toward the system has confused and bewildered the students. In short, to some professors we are now working harder for less. When a student is YV to make a grade of 4, he will receive a B, naturally worse than if he had tried to make a grade of 4, and moved up to a B.

The practice of making FF for flat failures is one of the few elements in the alphabetical system. It is very simple. A student who gets two failures will be taken out of the system. It is no more difficult to fail a course and not get paid than it is to fail a course and get paid. If there is a distinction made between those who fail a course and those who fail it absolutely, why is there not the same difference between those who fail a course and those who fail it absolutely?

From Chase Hall attic, two large oil paintings hung on the walls of a study room. The library's three years ago these pictures had a place of honor in the same building; for they had been given as a gift by the dear friend of the college. Students came and went, but the administration of the college turned these "objects of art"—and finally the paintings were relegated to the attic, where they had been until the other.

Psychology 240 seems to be hitting a new high this semester. The 10th class is so popular that the first class met, students had to go in small groups, less than one member, over all the table and radiator. Dr. Bertocci, quite impressed by the large enrolment, was inclined to believe it was due to his "spite size." Now that they're fairly settled, however, all agreed to show that they're interested in higher and better children—yes, even the boys!
