We Wonder

Why your students don’t realize that extra-curricular work is often valuable in connection with placement work or entrance to graduate study. It is true that many students are not aware of extra-curricular possibilities; but many others, who know about them, are not sufficiently motivated to take advantage of them. We, the student body, believe that the College should play a greater role in promoting extra-curricular activities.

We think that the College should provide opportunities for students to engage in meaningful extra-curricular activities. These activities should be tailored to meet the diverse interests and needs of students, and should be designed to foster personal growth, enhance academic performance, and promote social interaction.

We also believe that the College should provide resources and support to help students succeed in extra-curricular activities. This includes providing funding, facilities, and guidance to ensure that students have access to the resources they need to succeed.

We hope that the College will take action to improve extra-curricular opportunities and support for students. By doing so, we believe that the College will help students to achieve their full potential and contribute to a vibrant and dynamic campus community.
