It is often the complaint of teachers in institutions that their courses are aimless. Most of our students are aimless. Until recently this complaint has been justified. Notions seem to be flowing from the students—do we want them to come and learn what? It seems that we are teaching the wrong things to the wrong people. Is it not the case that a course is thoughtless, that aims show by tendency leading to something other.

The economic effort being conducted on campus this week has been an eye-opener. Unlike most discussions and "drives" held on college campuses—most of which never reach an objective—this bit of discussion involving no objective and it will probably accomplish more than a "definite purpose" project.

The value of bell-sections to develop thought has been overestimated by students including the bell-sections—but also, it has been neglected by professors who believe that the first three minutes of a lecture, unbridled, is an almost fruitless thing; controlled, it might produce something. It is here that the student may have an opportunity to think the logical course of an argument for himself. The impulse to think is there, but the direction is provided by the professor through several tentative questions and pressing to some argument. The work begins from the advanced section until the work of the lower section is being treated. It may be too early to speak too much about a "definite purpose" of this kind of thing. Perhaps the time will come when we should be held responsible for the things we say.

Lois Dool, Dorothy Cady, Betty Black, Barbara Kendall, Barbara Buker, Patricia Hall, Annetta Barrus, and Jean Blanchard '42.

The 1938-39 issue of the Bates Bulletin is one which deserves commendation. One of the most interesting things about this year's publication is the increase in tariffs and other trade barriers, the extension of public ownership, and the growth of bureaucracy. The editors of the Bulletin have been successful in presenting the requests for money. Sub-freshmen (many of whom are members of the greatest class) have been a sore point to undergraduates. The editors of the Bulletin have been successful in presenting the requests for money. Sub-freshmen (many of whom are members of the greatest class) have been a sore point to undergraduates.

Interviews Miss Hayden On "College" Program

Miss Louise Hayden, better known as "Froby," was interviewed by Chris MacDonald, Jr., on "The Bates Colleger" program Friday afternoon. The number of calls at the college infirmary concerned by Miss Hayden must have surpassed last semester, but they were mastered by her statement that college students as a faculty let—never allow being the chief source of trouble.

Just as an aid, the general consensus of opinion on campus was that if the local station was looking for an announcer, Miss Hayden would certainly fill the bill. But naturally satisfactory personality just bubbled out over the "mike."

Next Friday, "Froby" Crosby (not the cruelty) will be the object of injunctive Court proceedings. Crosby fans please note!

SCHOOL of DENTISTRY
THE UNIVERSITY OF BUFFALO

A four year curriculum completed in three calendar years, by means of the quarter plan. (Four quarters of eleven weeks each, to the school year."

The dental and medical schools are closely affiliated, instruction in the basic medical sciences being under the supervision of the medical faculty. Clinical practice of dentistry, in all its aspects, is supervised by the dental division and there is an intimate association with the clinics of several hospitals. Periods of intern-ship in two general and one children's hospital during the senior year offer unusual experience in clinical observation, diagnosis and treatment of dental conditions.

Next regular session will start the first week in July, 1939.

You Can Depend On This Combination

Chesterfield... the blend that can't be copied

... the sensation of the world's best cigarette tobacco

And for the things you want in a cigarette you can depend on the happy combination of mild ripe tobaccos in Chesterfield.

Each type of Chesterfield tobacco is outstanding for some fine quality that makes smoking more enjoyable.

Combined... blended together the Chesterfield way... they give you more pleasure than any cigarette you ever smoked.

On land and sea and in the air... wherever smoking is enjoyed... Chesterfield's mildness and better taste satisfy millions.
