Staging Of Shakespearean Play Reveals Vitality, Says Glazier

BY ELIZABETH LAWRENCE

If you are a junior in college, I would urge you to make a trip to see one of the many student productions of "Macbeth" that have been presented in recent years. The play was first performed in 1606, and its dramatic force and vitality are a testament to its enduring appeal.

The play is set in a world of black and white, with the characters divided into two camps: the Macbeths and their followers, and the supernaturals, who represent the forces of evil. The play is a study of power and ambition, and its themes are relevant to our own times.

One of the strengths of the production was its use of minimalism. The set was simple and uncluttered, allowing the actors to focus on their performances. The costumes were also effective, with the Macbeths dressed in black and white, while their followers wore shades of gray.

The acting was strong, with the two main actors giving powerful performances. The portrayal of Macbeth was particularly impressive, with the actor capturing the character's complexity and depth.

In conclusion, the production of "Macbeth" was a success, and it is a reminder of the power of live theatre. It is a play that everyone should see, and I urge you to make a trip to see it.
