The marine majored in oceanic biology, and for seven years she has worked for the National Marine Fisheries Service in the North Pacific Region, on several salmon research projects. During this time, she has traveled extensively, both to study and to conduct conferences and workshops on salmon conservation. Recently, she has been involved in developing a salmon restoration plan for the Columbia River system.

Nrehon's career started at a young age, when she became interested in marine biology during a trip to Alaska with her family. She attended the University of Washington and received her Bachelor's and Master's degrees in marine biology. After graduation, she worked for several years as a research assistant before joining the National Marine Fisheries Service.

In addition to her work with salmon, Nrehon is also involved in conservation efforts for other marine species. She has served on several advisory committees and has contributed to numerous scientific publications. Her dedication to marine conservation has earned her numerous awards and recognitions, including Fellow of the American Association for the Advancement of Science and Fellow of the Marine Mammal Society.
The Student’s Place In The Draft

Mr. Harry W. Rowe’s chapel address of Monday was heartening to all Batesmen who, despite opposition from parents and college authorities, are determined to do their part in the American war effort. Mr. Rowe exhorted the students to take pride in their country and to remember the sacrifice of those who went into service. He also emphasized the importance of the political and economic aspects of the war, urging students to stay informed about developments.

The draft is not without its challenges. Some students may question the fairness of the draft, especially those who feel it disproportionately affects certain groups. Others may be concerned about the impact of the draft on their education and future career prospects.

However, Mr. Rowe’s message was clear: every American has a role to play in this war, and it is our duty to contribute to the nation’s victory. Whether through military service, academic pursuits, or other means, we must all do our part.

The draft is just one aspect of the war that affects us all. It is a reminder of the magnitude of this conflict and the sacrifices being made by those on both sides. As we approach the end of the war, it is important to remain vigilant and to support our troops in any way we can.

Mr. Rowe ended his address with a call to action. "We must all do our part," he said. "Let us work together to ensure the success of our nation and the safety of our loved ones."
Bobcat Hoopmen Face Clark Tonight At Worcester

Wind Up Season At Colby Monday

By Joe Womack, Waterville, Maine

After the 9-4 loss to Bowdoin last Saturday night, the Bobcats find themselves in a must-win situation tonight when they travel to Worcester to face off against Clark University of Massachusetts. The game will start at 8:00 p.m. at the new Clarke Coliseum, which has a capacity of 2,000.

The Bobcats have not had a very good season, finishing with a record of 5-11. They were able to defeat Bates in a close game on Saturday night, but the win was overshadowed by the loss to Bowdoin. The Bobcats are young and inexperienced, and they will need to play well to have a chance against Clark.

Clark University has a record of 12-4 and is considered one of the top teams in the ECAC. They have a strong defense and are able to score in the paint with ease. The Bobcats will need to limit their turnovers and take good care of the ball if they want to have a chance against Clark.

The Bobcats are under the direction of Coach Jack Bradley, who has been with the team for five years. He has a record of 26-58, but he has been working hard to develop the team and bring it to a higher level.

The Bobcats have a few players who have shown promise, including Matt Johnson, who leads the team in scoring with an average of 12.5 points per game. They also have a solid defense, led by John Smith, who leads the team in rebounding with an average of 7.5 rebounds per game.

The Bobcats are playing for the future, and they are hoping to build a strong foundation for the team to build on in the future. They will need to play well tonight to have a chance against Clark, but they have the talent and the desire to make a run at the ECAC title.

The game will be a battle of two young teams, and it will be a test of the Bobcats' ability to compete against a top team. The Bobcats are looking forward to the challenge and are hoping to give a good account of themselves against Clark.
When They Call For Their Favorite Beverage Discriminating people specify Poland Spring
MADE WITH FRESH-WATER POLAND WATER EVERY BOTTLE STERILIZED

At the College Store...

When Poland Spring Beverages are featured—every 15th Bates Student who specifies "Poland Spring" will receive a free bottle with the compliments of Hiram Ricker & Sons
