Discourse Upholds Intrinsic Worth of Classic Poetry

The fourth and last speaker on the George Colby Chapel Lecture Series, Mr. Alfred Noyes, could have had little idea of the result when he stepped into the chapel Monday evening, May 4, to deliver his address. Mr. Noyes has been an extended lecturer since the turn of the United States and is a great tour de force in the public mind. He has been the subject of great numbers of articles by his admirers as being most宽容 generous, and his style of work is robust and comes out with a convincing precision. To his keenest followers, Mr. Noyes, in his second wedding, is the "savior of art and literature," and he is well known everywhere as the "Glory of America." He is well known among the public of America and has written many important novels. His novels have been praised with great enthusiasm by his admirers as being most vividly expressed.

Mr. Noyes was born at Wollaston, Massachusetts, in 1880. He attended Exeter College, Oxford, and graduated with a degree. He began his career as a writer when he was 21. He has written many books and has been the subject of great praise by his admirers. He has written many important novels and has been the subject of great praise by his admirers. He has been the subject of great praise by his admirers. He has been the subject of great praise by his admirers. He has been the subject of great praise by his admirers. He has been the subject of great praise by his admirers.

For the record, Mr. Noyes' most famous works are "The Making of a Man," "The Woman in the Moon," and "The Lord of the Rings." His novels have been praised with great enthusiasm by his admirers as being most vividly expressed.

Accounting Week Which Started Monday Morning Laid Emphasis on Science and Engineering

Beginning of practice examinations for the annual Accounting Week at Bates College today, President W. F. H. Kohler, in his review address, said that the week would be an opportunity to emphasize the importance of science and engineering in accounting.

"The emphasis on science and engineering in accounting," said President Kohler, "is more than just a matter of teaching the students how to do the job. It is also about teaching them how to think.

Science and engineering are the tools that accountants use to solve problems. They are the tools that accountants use to understand the world around them. They are the tools that accountants use to improve the world around them.

By emphasizing science and engineering, we are teaching our students how to think. We are teaching them how to use the tools of science and engineering to solve problems. We are teaching them how to use the tools of science and engineering to understand the world.

This is an important message to our students. It is an important message to our society.

We need people who can think. We need people who can understand the world. We need people who can improve the world.

That is why we are emphasizing science and engineering in accounting. That is why we are teaching our students how to think.

I hope that you will join me in supporting this emphasis. I hope that you will support our efforts to make our students better thinkers.

Thank you.

W. F. H. Kohler

C A Heads Ponder New Inspirations At Retreat

by Virginia E. Kowalewski

"Look out, the heart of your lover is breaking." These were the words that appeared on the dance card of a young man in the Banyan Room of the Hotel Bates during the weekend of the last week of April. The room was filled with guests who were attending the annual retreat of the Bates Student Council. This event was held at the Hotel Bates, a popular destination for events such as this.

The retreat was organized by the Bates Student Council with the objective of encouraging students to participate in campus activities and build a sense of community. Various activities were planned throughout the weekend, including dances, workshops, and discussion sessions. The participants were encouraged to engage in meaningful conversations and share their ideas and experiences.

The retreat began on Friday evening with a reception and welcome address delivered by the President of the Student Council. The evening was followed by a dance, which provided an opportunity for students to connect and relax in a social setting.

On Saturday, the day was filled with workshops and discussions led by guest speakers. These sessions focused on a variety of topics, such as leadership, communication, and teamwork. The participants were also given the chance to share their own views and experiences during open discussions.

The weekend concluded with a closing ceremony on Sunday morning. The President of the Student Council delivered a keynote speech, reflecting on the week's activities and the importance of continued participation in campus life. The retreat ended with a final dance, allowing the guests to celebrate their time together and the bonds they had formed.

Overall, the retreat was a successful event that brought together students from different parts of the Bates campus and facilitated meaningful discussions and connections. It served as a platform for students to explore their interests, develop new skills, and strengthen their sense of belonging to the Bates community.

You can serve your country best by acting on this new Navy Plan now!

You are eighteen, and you have an avocation in the arts, or in business, or in your chosen profession. How can you best serve your country? Can you serve your country better in the Navy? Is there something else you can do? If you are a student, you can enlist in the Navy and become a commissioned officer in the United States Navy. You can serve your country best by acting on this new Navy Plan now!

Don't Quit College if you are 17 and want to become a Naval Officer!
