**Professors Corner**

By Richard L. Manfield

One very short story that I have always enjoyed appearing in PIPER's "Apology". Stories had been called by the wisest man in all Greece. They were all the wisest men, but he was the wisest, as he knew all the others taking eight or nine weeks. The amount of time in Europe also varies depending on the type of ship, being as two weeks, while others are as long as three weeks. Opportunities for sight-seeing activities are also dependent on where the ship lands.

All applications or inquiries concerning the company are directed to Mr. Benjamin G. Bushong, Brethren Relief Center, New Windsor, Maryland. The company provides social security numbers, social security benefits, and medical benefits from 16 and 18 years of age must have affidavit of parent or guardian. If the individual is between 16 and 22 must have from draft board. Certillo.

The particular appeal of this story appears when it is transposed to our own life. It is a story our own time and place. Let us examine this little story in the light of present day experience and our own life.

The man who sits on a fence seldom achieves his most desired ambition. All too often he is aiming to do that which is in sight; he is content to stop at the point of his vision. He is impatient of the problems of the future. He is content with the limit of his own "wisdom." Stories appear to be personal, and only a study of the limitations of his understanding and his readiness to meet new problems will give him an effective philosophy. The length of the trip varies as two weeks' time, while others are as long as three weeks. Opportunities for sight-seeing activities are also dependent on where the ship lands.

**U. N. R. R. A. Offers Summer Trip To Europe - Free**

Do you want your summer vacation to include a free trip to Europe and back? You can do it at the same time by helping to relieve the acute transportation problems in Europe. This opportunity will be open to college men some time during the summer, and it is estimated that about 40,000 will be able to travel. The United Nations Relief and Rehabilitation Administration is now making plans to ship students to Europe. Once there, the United Nations will be in charge of the students. [Continued on page 2]

Just to give you an idea of how commuters travel around this campus one day I accompanied a fellow student, Bob Rochelle, who was in an airplain accident, while in his fifty joy's away from home he suddenly found himself in the lap of God.
