Bates College
Bobcats Pointing For Home Victory Tonight

By John Holeski

Last night the favored Bobcats

took another step toward

Florida in the Big East Conference...
Life On The Hickories: Skill Or Limin'?

By Robert Forsyth

Facing the future with uncertainty? Let it help you round out your education.

Since Americans consider the college a minor, perhaps the most important in their lives. They are not the only ones who believe this. Parents, with their aspirations for children, often view the college years as a time when their sons and daughters will be learning the business of life. But this is not the case. The college years are a time for growth, exploration, and personal development. It is a period when students are encouraged to think critically, engage in meaningful discussions, and explore new ideas. The college experience is not just about acquiring knowledge; it is about developing the skills and abilities needed to lead fulfilling lives. The college years are a time for discovery, a time for learning, and a time for growth. So embrace the uncertainty of the future, for it is in this time that you will find the most valuable lessons.
By Tom Turkelson
Bates men added another victory, 58-44, to their record last night with a dominant performance over Maine. Maine battled back to a sevenpoint advantage in the final four minutes, but Bates came through with their experience to win.

The Bates men played the third and part of the fourth quarters in the leading role, returning to the court to cut up the impressive 14-point margin.

**Simpson Sets Pace in Hoop Circles**

Center Bill Simpson is definitely the outstanding basketball player at Maine circles today. We said all season long about Art Simpson on the grizzled, but he has talked in Simpson on the court to show some of their finest followers.

**Sktyp Team Sees Bridgton Action**

Led by the aromatic "Bains" (as fans call All-basin), Bates points through the loop, the best in Maine have to work for that. With a score of 58-44 at the buzzer, Bates, the dreamers, again outstripped all others. Several other college teams are entered and the outcomes will give us a chance to look at the relative strength of the basketball teams. Those who signed up during the first few days are here listed. No doubt the competition will be fierce in this event.

The remainder of the freshman squad will be announced in the coming meet will include downhill and slalom only. Several other college teams are entered and the outcomes will give us a chance to look at the relative strength of the basketball teams. Those who signed up during the first few days are here listed. No doubt the competition will be fierce in this event.

In the field events, the absence of the Garnet in what looks like their first test of the 1948 season men teams will compete. Both Varsity and Freshman squads. Both Varsity and Freshman, have been working with general conditioning and a tougher training program. With a larger squad and a tougher training program, the Bobcats should be able to take on the college teams with some success.

**Emphasis of the Frosh**

The Frosh, the third team of the Bobcats, can think of outstanding stars. The question in our mind is that if the college should go to the expense of outfitting a team in the jumping events. How many of the freshmen have the experience to make the starting lineup?

**The Intra-,Mural basketball league**

- Schedules and results of all intra-,mural basketball games will be listed in next week's issue.
- Friday and Saturday, November 13th and 14th, will be the starting dates.
- Each game will be played twice during the season.
- The league will end on December 11th.
- The winners of each division will receive medals and a prize.

**The Bates Student, January 12, 1948**

"After talking with students from all over this country and Canada, I conclude that the Bates CA is one of the most active members of the Student Christian Movement," said Robert Foster in a report before the CA cabinet last Wednesday night on the North American Student Conference on Christian Fron- tiers.

Foster, who represented Bates in the conference at the University of Minnesota, said, "we have an all-campus or- ganization largely delegated to the New- life committee. Michel does not have much spare time for activities. He is a senior majoring in economics. He is interested in working with an import-export office in either France or South America. Michel is interested in working with an organization that might involve the study of social and political changes. The worship loca- tion is largely delegated to the New- life committee, Hill, and includes Pro- testant denominations.

Two thousand delegates and bishops representing every state in the United States, Canada, and 60 other countries attended the conference, which was opened by 14 1/2 "Y" and church cre- dentials agents in North America. Speakers included Dr. Walter Judd, U. S. representative from Mexico, and Dr. John R. Mott, presi- dent of the 1910 Nobel peace peace

Luther, bishops, ministers, social workers, and missionaries from Africa, Latin America, the Far East, and back-country areas in the United States were also among the leaders and speakers. Foster expressed the hope that some of these men and women might be encouraged to contract to speak at Bates.

Student. Michel is planning to finish his education at Bates and lives between semesters with friends in the Lewiston area. Michel has contracted to speak at Bates. In Paris, American newspapers can read about the US. Michel pointed out that many prominent American newspapers are reported in French. In Paris, American newspapers can be bought daily.

Michel is planning to finish his major in History and Government. His interest in working with an import-export office in either France or South America. Michel is interested in working with an organization that might involve the study of social and political changes. The worship location is largely delegated to the New-life committee, Hill, and includes Protestant denominations.
