Proctors Choose McCormick as Vice Chairman

by David Foster

In the latest gathering of the proctors, Steve McCormick was elected as next year's vice chairman, the matter of a de facto freshman dorm was considered. The meeting retrogressed into internal bickering.

Steve was chief aid to Sarah Emerson who will be the chairwoman. His position is one of extreme political importance in relation to student administration affiliations. He was elected from a field of three candidates and will replace Jim Anderson in that post.

A suggestion was made that special dorms or houses be set aside for the incoming freshmen, since the new lottery system is liable to produce an all freshman residence at any rate. After some discussion, the proposal was dismissed. The proctors felt that since the system has never been used before, a wait-and-see attitude should be adopted.

Ted Goble then addressed the Council on what he feels is a dangerously low campus morale. He suggested more student/faculty get togethers as a manner of improving the psychological state. A committee was formed to consider and initiate.

Another bomb at the meeting was Cliff White's request that some of the proctor fund be allocated to cover part of the damage at Smith. Each year the Council is given a large chunk of money that apparently doesn't seem to do much. Cliff's request was denied because it involves using school money to pay for dorm damage, obviously a bad precedent. The discussion continued, however, on the question "Exactly where does all that money go?" Bruce Tacy, the Council's treasurer, explained major costs such as dorm newspapers, bands, and sundry dorm improvements. Agreement was reached on the need for a more responsible allocation of these funds.

Finally, there was some discussion on the matter of student safety, in the wake of mysterious incidents in the town of Lewiston.

Burgess Finds Maine Yankee Is Cause For Alarm

by Gary Jones

Bob Burgess from Maine PIRG was the speaker last Monday as part of the lecture series sponsored by the OC Environmental Committee. The subject of the lecture was the evacuation plans drawn up by the Maine State Police to handle the event of a nuclear crisis. The plan was detailed with the plan made by the Maine Yankee nuclear power plant at Wiscasset. Burgess spent last summer studying the plans and evaluating their effectiveness.

These plans, he said, attempted to tell residents and house owners what to do in the event of an accident. Since the new lottery system was expected to produce a fully furnished residence at any rate, the plans were declared to be ineffective. Burgess, however, argued that while effectiveness was hard to measure, one should never attempt to measure effectiveness when there was a life threat involved.

The plans, he said, attempted to tell residents and house owners what to do in the event of an accident. Since the new lottery system was expected to produce a fully furnished residence at any rate, the plans were declared to be ineffective. Burgess, however, argued that while effectiveness was hard to measure, one should never attempt to measure effectiveness when there was a life threat involved.

On alert, the State Police would leap into action setting up roadblocks. The plan was to control traffic and handle the large traffic which would follow very soon after the accident. Burgess also pointed to the problem of the roads near the plant which were insufficient to handle the large traffic which would follow very soon after the accident. The only conclusion of all of this, according to Burgess, is that should there be a nuclear accident, it would be a major disaster. Maine PIRG has brought suit against Maine Yankee to have the plant closed.

Mr. Burgess mentioned that there have been several "almost accidents" which could have resulted in the type of accident described. Thus, he feels, there is definite cause for alarm. Lewiston is just outside the deadly radius and also downwind of the plant.

The next lecture in the environmental series will be next Monday by our own Dr. John Creasy who will speak on "What We've Got Left: Taking Geologic Inventory of Our Remaining Resources." The lecture will take place at 7:00 p.m. in 119 Dana.

Poussaint From Harvard To Speak At Bates

by Barb Geisler

Alvin F. Poussaint, M.D., the Director of Student Affairs at the Harvard Medical School, will speak on "Psychiatry and Social Politics" in the Chase Hall Lounge Monday March 15, at 8 p.m.

Alvin F. Poussaint is a black who speaks for Black America. This well-known psychiatrist is an associate professor of Psychiatry at Harvard Medical School and is also the Director of Student Affairs for that school.

Poussaint was motivated to enter psychiatry by the harsh social conditions of his native New York City. He grew up on 101st Street—a tough East Harlem neighborhood of Puerto Ricans and lower-income blacks.

His father was a printer and his mother a housewife. His undergraduate degree was received at Columbia College. He then attended Cornell Medical School. UCLA was the center for his internship and psychiatric training.

Unfortunately, as Burgess found out, these plans have many weaknesses. First, it was assumed that the atmosphere was relatively still, resulting in an equal distribution in all directions of radioactive material. Second, the plan envisaged the evacuation of the city. But, for a town on the coastal coast, this is an absurd assumption.

Bates varsity debaters continued their string of victorious tournament appearances with the twenty-first annual Dartmouth College Invitational held in Hanover, New Hampshire. Sophomore Dan Modes of Portland and Tom Connolly of Canton, Massachusetts, talked their way to a preliminary record of five wins and three losses in the three days of competition.

Fifty teams from twenty states met for the event. Bates claimed victories over Harvard, the University of Rhode Island, King's College, Suffolk University, and Seton Hall. Losses were suffered by the Bates men at the hands of the University of Massachusetts, Catholic University, and Washington State.

The Bates varsity squad makes its last outing of the regular season as they travel to the University of Pennsylvania. Varsity competition then moves to post-season qualification for participation in the national championships. Bates novices have two outings left, as they finish the year at the University of Massachusetts and Suffolk.

NOTES AND COMMENTARY

"The journey, not the arrival matters." Montaigne

The incident at the Smith South keg party was, in our opinion, a terrible mistake. As the college guidelines read presently, the residents of Smith South are to be held accountable for the damage. All too often, no individuals were found at fault. A lot of money is going to be shelled out by the Smith residents, let's not forget, to say, "That's too bad." We can learn from our mistakes and improve on them.

While the rules of the college can't be changed retroactively for this incident, perhaps they can be changed for the future. The way things stand now, unexplained damage done in a dorm is to be paid for by that dorm. The damage is in the area of $1000, as it was in Smith, the burden on those who live there is quite heavy, 20-30 dollars a person. Most, if not all, of those charged have nothing to do with the damage. In the future the college should put aside money to pay for such unexplained flukos. I'm not talking about petty damage, but major, malicious destruction that goes unexplained. In this way the burden of payment can be reduced by spreading it out over the entire campus population. Unfortunate incidents would be paid by all of us, not just those who happen to live where damage occurs, and who, like the rest of us, are innocent victims.

Such a system can only work and be fair if the students and the administration of Bates start acting with responsibility and maturity. Bates residents don't have any reason to see the college as "the enemy". To the contrary, Bates residents are probably the best-students in the world. They should be held accountable for their actions. Responsibility works in many ways. If someone can't hold his or her breath while rowdy, then going rowdy is not their job, and they should find a position for which they are better suited.

We'd suggest that you at least show some of the many things the administration of Bates have no connection with. The gulf is only going to be widened, and Bates residents are miserable having nothing to do with the damage. In the future the college should put aside money to pay for such unexplained flukos. Women's Track

To the Editor,

Is Bates ready for women's track? Neither this has been a question, and it seems to me that it must be answered in the negative. First of all, in order to establish a team, you must have the dedicated core of women who would make up the club and the personnel who would make up the coaching staff. I think that, however, other women's sports already established at Bates which tend to greatly diffuse the dedication which would be channelled into track.

It's not as easy to be dedicated to a sport which depends totally on individual effort as it is to work with a team in a sport such as basketball. (That's probably why there is no intramural track program). There seem to be no immediately attainable results to be had in a track team with just dedication, besides personal satisfaction. It appears that this sport needs strength along with running ability and some glee, can be gotten from the already established women's sports at Bates.

I'm sure we will continue to assess the interest in women's track, and perhaps make some progress. Perhaps the hardest thing to do is to get the college to advertise. I'm not talking about Petty damage, but major, malicious destruction that goes unexplained. In this way the burden of payment can be reduced by spreading it out over the entire campus population. Unfortunate incidents would be paid by all of us, not just those who happen to live where damage occurs, and who, like the rest of us, are innocent victims.

Granfalloon Notebook
Maybe They Should Call Them Every-Other-Yearbooks
by David Brooks

A senior friend of mine was joking about aimlessly in my room the other day when he happened to come across my Freshman yearbook. He was dumbfounded and amazed when I told him that we get yearbooks every year without even having to pay for them, thanks to the wisdom of someone who figures the cost of everything in one lump sum.

"Wow, that's really neat," he said, "When do we get last year's yearbook?"

I admitted that this was a poser, and that apparently it was running a bit behind schedule. About five months behind schedule, in fact. I told him not to worry, however, and that he'd probably get it as a nice graduation present.

This little exchange sent me to wondering just how the yearbook is coming along, and as a result I found myself the next day talking to Marion Guggling, who was doing part of the work on it.

"Well," he said, "I'm glad to say that the yearbook is coming along splendidly, really quite splendidly."

"That's good to hear," I replied, "Do you have any of it here for me to look at?"

"I do indeed," he said, and proudly waved page ninety-four in front of me. "There! That ought to quiet those critics who say nothing's being done on the yearbook!"

I said it certainly should, and that it looked Reading the little page as nice and neat as page ninety-fours go. "Do you have the ninety-three pages that go before it?" I queried.

He gave me a condescending look. "It's obvious," he said, "that you don't know how a yearbook is put together." I admitted that this was so and asked for some illumination. "Certainly," he replied, "The key to yearbooks is that you have to divide up the work among various people — it's just too much for one person to do. I, for instance, am in charge of all the even-numbered pages that have anything to do with country-side scenes of Maine."

This explained why he had page ninety-four, at least, for it contained a breath-taking shot of a particularly attractive perch floating upside-down in the Androscoggin. I complimented him on it. "Thank you," he said, "I took it myself."

"As for the yearbook, well, various people have various other jobs. One fellow, for instance, is doing all the lettering for the lead-in pages to the various sections of the yearbook. Of course, we haven't decided yet just what the various sections will be, so he isn't doing much right now, but his time will come, I assure you. Another girl is busy designing lay-outs for the pictures on the various clubs in the school, and as soon as we get some pictures she'll be able to get right to work."

"Well, I said, "this certainly sounds very organized. Tell me, do you know when the yearbook will be coming out?"

Well, of course, the actual date depends on how the other people are getting along, which I really don't know about, and how fast the printing gets done — you know how slow these local businesses are — and various other factors like that. But I'm really quite optimistic that the whole thing will be ready for distribution before we're done with the tricentennial events."

I have a feeling he might have been right the first time.

CA Elections

The CA will be holding elections for officers on March 17. The president must presently be a member of the sophomore class, but other positions are open to anybody. There will be a sign-up sheet in the CSA office.

Get to Lou's
Admission is free. Chapel. The public is invited to attend tonight, at 8:00 p.m. in the Bates College School of Music, will be presented about the bliss she feels with this man, liberated and totally unselfconscious but other than that she leads an entirely of the novel held up in the bottom of a post card which spends the duration be described as peevish. She quite has fame, wealth and four well- traditional roles and their abandonment they were together. It describes their implications are often broadly reaching. British particularly of women as well. It is in its own way, somehow manages to touch on what is satisfaction has caused business in the town, (except the madames' and the undertakers') to drop off considerably, and decent citizens are afraid to walk the streets under the mysterious stranger. He quickly sits up the situation and with a blend of cunning, strength, fines and style helps destroy the gang. He then leaves town.

If you think it has to be a Western, maybe you should consider being a producer, for it is exactly what the piece director Sergio Leone and superstar Clint Eastwood thought when they heard the story. Their film based on it. A Fistful of Dollars, spawned the spaghetti western and brought cultishness to Eastwood. Actually, however, this film is an immense rip-off of the earlier Japanese samurai epic Yojimbo, made by one of Japan's most successful director/actor teams: Akira Kurosawa and Toshiro Mifune. Here we'll examine both versions of the story.

Leone changed more than the language, costumes and setting. Unlike Yojimbo, his film is grimly and satirically. Eastwood plays the mysterious stranger like some Old Testament exorcist, his arm twisted over his head and some wild figure that brings black in drapes for no one, feels nothing but contempt and ruthlessly goes about the realistic enforcement of some cold law of the West. The bandits he kills are just as cold and satanic as he and the townsfolk he works for are contemptible. This is the movie that was the blueprint for Eastwood's subsequent macho masterpieces. Mifune's mysterious stranger, on the other hand, is a human being. While he broods about his next moves, he swats flies and scratches himself. He gets embarrassed by the townspeople's gratitude but obviously enjoys it. He gets sloppily drunk, he blusters and he loses his cool. Yet he is as methodical and efficient in riding the town of these gangs as Eastwood. In many ways Yojimbo satirizes western while Fistful turns them into a black mass. Leone offers an interesting twin bill in that it shows what different directors will do with identical material. And if you're not terribly interested in that sort of stuff, there's also plenty of fast guns, fast swords, fists, jugs and good character acting.

Switching subjects abruptly, next Wednesday night the focus changes from men cutting up men to the relations between men and women, as Ken Russell's Women in Love, based on D. H. Lawrence novel, will be shown. Unlike Russell's more recent flambant and visually overwhelming films (Tommy, for example) this film is well-controlled, carefully paced and evocative in its imagery. It is basically faithful to Lawrence's unflattering perceptions of women and mystical experiences of male life of late nineteenth-century Britain. If the thought of Ken Russell's best film and Glenda Jackson's best acting are not enough to get you to the film, try reading the first few pages of the novel. Therein you will find a description of the anatomy of a fig, which as delivered by Alan Bates in the opening scene of the film, well worth the price of admission.

Book Review:

Reals of Gold

Margaret Drabble's The Reals of Gold is a quickly paced love story that something or other is wrong with western society's treatment of women as well. It is in its own way, a personal story, but its implications are often broadly reaching.

Primarily though, it is a love story about two people who have separated and desire to return to each other. The book details their lives apart, and flashbacks to Eden time when they were together. It describes their attempts to do without each other, and signifies that their attempts at reunion.

Moreover, Margaret Drabble deals with some of the women's issues that face today. This is no feminist tract, but subtly through two of its main characters it shows up the guilt that traditional roles and their abandonment often causes. Frances Wingeate is a world famous archeologist, divorces, the mother of four children. She is guiltless about the wandering life that she lives. She has fame, wealth and four well-adjusted children. Her only problem seems to be that she left the only man she has ever loved for reasons that can only be described as perve. She quite frankly misses him, and she tells him so in a post card which spins the duration of the novel held up in the bottom of a French mail box waiting out a French mail strike. Frances feels some guilt about the bliss she feels with this man, but other than that she leads an entirely liberated and totally unselfconscious life.

She is thoroughly contrasted by her cousin Janet Byrd. Janet is a typical housewife in a rather British sense. Her life is bounded by prams and the chemist and the green grocer. Janet strives for conformity, hoping she will find happiness in it. This is why she married, why she had a child, this is why she decorates her house as she does, this is why she takes night courses. However, her failure to conform, and this failure is constantly pointed out by her husband (a vicious, but nicely conformed man). Janet is not happy, she is insecure, self-conscious, and ridden with guilt. Drabble does not condemn this life. It is the nature of color that its experience is achieved only in interrelationships between colors, between harmonies and discord. Thus color means different things in different contexts; the same part in a different whole is a different thing. Arnhem's examples were drawn from the world of art, of the experience of art, and thus in a context of their own, having validity beyond being an example of analysis.

In the analysis of color, one can separate three qualities which define the experience of color: hue, brightness, and saturation. Comparing color to the experience of shape, Arnhem pointed out that red, yellow, and blue are more different from one another than are the shapes of a triangle and a circle. Indeed color interrelationships can be just as elegant as different shapes.

Professor Arnhem attempted to treat color as its own complete and vibrant experience in art. It is thus equal in importance to the experience of shape and motion, even though the complete experience of art goes beyond any constituent characteristics. It can be said on the basis of this that the blend of art and the psychology of perception is very satisfying, both aesthetically and intellectually. An eclectic approach to a discipline offers much more than can be achieved in the often rigid restrictions of highly specialized study.

Poetry Corner

CROSS-COUNTRY

Long, gliding strides. Reach out, far; forward and back. Tress and bushes slide by under the clear winter sky. My breath, clouds of steam, my face with motion. My body is fluid, stretching out on long narrow skis, loosely secured to me. Push, glide, pushglide; one never-ending movement. Up hills, down hills, racing across the flats effortlessly.

--Jack Barnett

Mr. McMahan, trumpet, studies in Baroque music is currently completing his master's degree. Mr. Roberts, organist, spent last summer in England on a Fulbright fellowship. Both musicians have performed in recitals throughout the New York-New Haven area.
Page Hall

Page is the only coed dorm on campus mixed by random room. It has thirteen singles, 40 doubles, and 13 triples. The rooms in Page are basically quite nice. Most rooms have two painted walls with a grove for hanging pictures, one paneled wall with windows and shelves, and one wall of closets. Windows on the eastern side command a breathtaking view of the Puddle, while those on the west overlook busy College Street. Not all is perfection, however, for rooms on the first floor feature painted concrete, water pipes, and metal closets. Doubles in the dorm are adequate, singles are larger than average, but triples are painfully cramped. Generally Page is well planned. Both the first and second floors feature lounges complete with fully equipped kitchens. A laundry with washers and dryers exists on the first floor, and all remaining floors have "laundry rooms" containing a sink and ironing board. The atmosphere can be rowdy (frisbee tournaments on third floor), but as a rule, the dorm is fairly quiet. All classes are equally represented. Page is not a bad place to live, but don't expect a close-knit, team-spirited, social residence.

Roger Bill

Roger Bill is a coed dorm housing 74 students in nine singles, sixteen doubles, and eleven triples. It is an old dorm, distinguished by its large and unusual rooms, and startling quaintness in comparison to newer editions. In addition, it has a good location, being a short walk from the Library, Chase, and the area around Pettigrew. The facilities in Roger Bill are scarce. There is a furnished lounge, but it houses a TV set only infrequently. Other than that there is a laundry room, which isn't much fun, but comes in handy. The dorm is not a quiet place to live. This year its dorm damage bills were the highest on campus, music is continually playing and the atmosphere in the building is fairly rowdy much of the time. More than that, the dorm is a very congenial and friendly place to live and socialize. However, Roger Bill has a reputation for housing some very large students in nine singles, sixteen doubles, and eleven triples. The rooms in front are big in comparison to most rooms, and startling quaintness in comparison to newer editions. In addition, it has a good location, being a short walk from the Library, Chase, and the area around Pettigrew. The facilities in Roger Bill are scarce. Rand Hall

Rand Hall is a coed dorm mixed by floors. Its rooms, especially the singles, are quite large by Bates standards. The first floor contains three men's singles which are probably the largest on campus. In addition, almost every room on the second floor is also men. These rooms all have very high ceilings, which makes them look even larger. Each triple is on this floor, two room suite with a bathroom. The third floor has all the women's rooms. Although they are quite small, on the whole they are larger than average. There is one single for women, and a double identical to the men's on the second floor. The top floor is occupied by men, and all 11 of its rooms are doubles. Each of the rooms has a bathroom, and all but two have two roofs that are slanted because of the eaves. The extent of the slant (and the space that this takes out of the room) varies considerably.

Rand is fairly quiet during the week, but, because Fiske Lounge is used for all campus wide parties, don't expect to get to sleep too soon on weekends. You can also count on a little inconveniences from all this socializing, especially on the second floor and have to use that floor's bathroom the night after a party. Rand also has a room with a ping pong table on the first floor, as well as a gym and locker facilities. The gym, however, is used by everyone from the dorm and other buildings. Modern dorms like Randies have the priority. The dorm has only been coed for two years, but during the football season, it has been inhabited by uppersclassmen and freshmen women.

Room summary: For men, there are five singles, fourteen doubles and one triple, for a total of 20 rooms. For women, there are one single, eleven doubles, and one triple, for a total of 12 rooms.

New Houses

by Donna James

This past week The Student talked to Vice President Bernard Carpenter, to find out more about the new houses for next year. The plans have not been drawn up yet, but he was able to sketch a general idea of what the houses will contain.

Moulton House, located at 19 Frye Street, is the larger of the two. There are two bedrooms, one for each floor, and the room will include built-in closets for storage. Rooms on the front side of the building have a nice view of the woods. Rooms on the second floor will be furnished with single beds, dresser, shelf, and mirror. The rooms on the first floor will be furnished with twin beds, dresser, shelf, and mirror.

Stillman House, at 154 Wood Street, will have four rooms. The lounge will be on the first floor. The lounge will include a full kitchen, consisting of stove (but not oven) and sink. There is a full kitchen in the basement, along with a room which is good for large parties, and a sewing room for tailoring purposes. The single rooms will be equipped with a desk, dresser, mirror, and chair. The doubles will be equipped with a desk, dresser, and mirror. The lounge will have a ping pong table, a pool table, and a bar. The lounge will be the center of activity in the building, and will be used for parties and social events.

The dormitories in Stillman are built in a manner that is similar to a modern dormitory. The building is divided into three sections, each with its own lounge and kitchen. The lounges are equipped with a pool table, a ping pong table, and a bar. The kitchens are equipped with a stove, sink, and refrigerator. The bedrooms are equipped with a desk, dresser, mirror, and chair. The lounge is equipped with a pool table, a ping pong table, and a bar. The kitchens are equipped with a stove, sink, and refrigerator.
Aids Children in Brazil

by Frederick I.eong

We had an opportunity to interview several students about living off campus. The students interviewed were Roger Spingarn '78, Polly Howlett '76, and Dr. Richard Funk '76, who live in a turn-of-the-century farmhouse about 5 miles from Bates. Generally we wanted to know what made them decide to move off campus, what it is like living off campus and their opinions about the advantages and disadvantages.

As the interviews were conducted, three of them had lived on campus during their freshman year. The fourth student who was interviewed, who left at the beginning of his second year, said that he had decided to bring both a Maine and a Lewiston resident, bringing with it a different perspective on the Bates campus atmosphere and conditions which prompted them to move off campus. However, he also expressed the benefits of being both a Maine and a Lewiston resident, with the benefits of being closer to the city and closer to the campus.

The other advantages are greater choices off campus, both for food and entertainment. In addition to avoiding late night parties, they don't have to pay dorm damage. They viewed life on campus as being too restricted, limited in scope and the tendency for students to become too dependent, being constrained and finding strength only in their little groups. They saw this issue of independence, freedom and conformity as a crucial advantage to living off campus. In addition they had the opportunity to view Bates from the outside. This gives them a clearer view of the existing situation whereas on-campus students would be looking at Bates from the inside looking out, hence lacking objectivity.

Are there disadvantages of living off campus? The main problem which these students faced was the reduced social life. They had to make more of an effort to relate to and communicate with other students, sometimes to the extent of losing touch with what is actually going on at the college.

The other major problem they face is the attitude of the on-campus students towards them. They feel that with the help of the off-campus students, they are made outsiders to the college with little involvement with the campus. These students feel that they were unfairly left out of activities by other students, neglected because they live off campus.

The other disadvantages are having to prepare and to cook your own meals, to do your dishes, and long walks to classes (especially in winter). Being off campus, they are quite troubled with the problems of using the college facilities. They want to be more independent, to be granted the privacy which is due to them. They seem to desire to run their own lives, to be an adult, to be a part of Lewiston rather than what they described as an "intromoted" Bates community. Besides, they say the idea of being able to invite one's professor or Dean over to one's apartment for dinner is quite enterprising.
Ski Races End — All Americans Are Decided

by Nils Bonde-Henriksen

Dartmouth College, on the strength of a solid all around performance, tied defending champion Colorado in the final standings of the NCAA Ski Championships this past weekend. For Colorado it was the first time they had failed to win outright since 1972, for Dartmouth it was only their second win of any type. Mostly the tie was a tremendous victory for the Dartmouth team, which had not been considered one of the tourney favorites.

Dartmouth finished second or third in each competition, a level of consistency which was unmatched in the championships. The first event was the Giant Slalom, held on Wednesday amidst stormy, wet conditions. Dave Cleveland of Dartmouth used an excellent second run to win the G.S. by a mere 27 of a second. Wyoming’s Mike Mileski was on top and was followed by Bruce Gamble, Marc Milligan and Steve Henzschz all of Colorado. Points are awarded to the top 17 finishers, with the winners getting 17 points, second place 16 and so on down the line. Each of the schools top three finishers are eligible for points. Dartmouth also managed to get a seventh and twelfth place and managed to hang tough, trailing Colorado 42 to 33 after the G.S.

It was on Thursday that the race for the team title really started. As many had expected Vermont Olympian Stan Dunklee virtually ran away with the cross country title. Dunklee won the tough 15 kilometer race in 42:11.7 an impressive 62 seconds faster than Halvor Maartman of Northern Michigan. Tim Kelly finished a surprising third for Dartmouth, while Ola Koosken of Northern Michigan and Jan Bjorkin of Utah rounded out the top five. Poor finishes by Asle Soberg and Steiner Hybertsen (6th and 7th) and the wrong wax seriously hampered Wyoming’s shot at the team title. Hybertsen was a three time winner in the NCAA’s and better finishes were expected of both he and Soberg. After the two first events the surprising Dartmouth team was in the lead with 59 points. Another Eastern school, Vermont was next with 56 points and Colorado was an unexpected third with 55. Wyoming which could do no better than twelfth place overall in the Cross Country was a distant fourth in the team standings.

On the third day of the competition, it was Wyoming’s turn to move into the spotlight. Mike Mileski, Terry Kinnison and Bill Shaw finished one, three and eighth to give Wyoming 43 points. Hensch of Colorado finished second while two of his teammates took ninth and tenth. Dartmouth also placed three men in the top 17 with Cleveland leading the way in fourth place. The win for Mileski put him on top in the Alpine combined totals, edging out Cleveland by just over one second. With only the Jumping left, the team title was up in the air — Wyoming had slipped into the lead with 90 points, Colorado trailed with 88, and Dartmouth was hanging in there with 86.

So it was all coming down to the Jumping, an event that was to be dominated by the University of Utah. Form held true as Utah won the event despite the fact that favorite Ron Steele finished third to teammate Kip Sundgaard. Vermont’s Roger Holden got second place and also tied for the hill record of 59.5 meters with fourth place finisher T. Kristiansen of Colorado. C. Fuglesang of Wyoming rounded out the top five.

Colorado’s chances of winning the team title outright were badly hurt by the fact that they could only place two men in the top 17 point-getters. Wyoming managed to get three men in, but could muster only 17 points out of the three places. Dartmouth surprised everyone with their third place finish (26 points) in an event in which they were supposed to do all that well. Perhaps the man most responsible for this good showing was Bob Zinck, a native of Maine who was accepted at both Bates and Dartmouth, his unexpected

Track Team Ends Season

The Bates track team has completed its competition for the season, as individuals who qualified appeared in the Easterns, New Englands and IC4A’s since vacation began. After an 8-4 regular season, the Bobcats qualified people in every event except two at the Easterns.

Bob Cedrone placed third in the first event, the 35-1b, weight. Bruce Anderson and Clyde Lungeol both survived two trials to make it to the finals in the hurdles. Lungeol placed third and Anderson sixth. Peter Kipp placed fifth in the high jump, as he cleared 6’4”.

Although each member of the two mile relay team had qualified for an individual event, Coach Walt Slovenski decided to keep three members fresh for the two mile. Cedrone and Dave Scharn ran 7:54.5 to finish second. Chris Taylor’s 1:57.0, Rick DeBruin 1:57.3, Chris Taylor 1:56.8 and Dave Scharn 1:58.0. Things look good for the middle distances next year. Bates qualified Cedrone and Lungeol for the second fastest time of the season.

Marcus jumped 15.5 meters with 8th place. Providence was the winner with 31 points, all scored in just four events. Bowdoin placed second on the basis of some fine individual performances.

The next week the team thinned out even further, as ten members participated in the New England championships. On Friday, Cedrone started the Bates scoring with a 4th in the weight. Clyde Lungolow placed fifth in the hurdles, the first Bates man to place in a non-relay running event since John Emerson in 1973. Good performances were also turned in by Lungeolow and Marcus Bruce in the long jump. Clyde jumped 22’11”, the best by a Bates man since 1973. Marcus jumped 22’11” in the second best performance of the season.

Saturday’s running events provided some fine individual performances. Among other things, another school record performance by stellar distance man Bruce Merrill. He eclipsed his previous record by better than 2 seconds in posting a time of 9:07.6 and just lost victory in the unseeded section of the two mile when he was nipped at the wire. Paul Oparowski also ran well, as he did at the Easterns, showing no trepidation of going out fast. In both races he went through the first mile in 4:30 or faster.

The two mile relay team closed out the Bates scoring as they ran 7:50.5, the second fastest time ever posted by a Bates team in that event. The splits were quite even. Scott Bierman 1:57.8, Rick DeBruin 1:57.0, Chris Taylor 1:56.8, and Dave Scharn 1:58.0. Things look good for the middle distances next year since all of these men are returning.

The last meet of the indoor season was the IC4A’s held last week at Princeton. This meet annually brings the best trackmen from the east together, and is (next to the NCAA’s) the most important indoor meet of the year. Bates qualified Cedrone and Lungeolow, although neither placed merely qualifying in an accomplishment. As a final note, this marked the completion of Coach Walt Slovenski’s 25th year of coaching indoor track. Slovenski has at least 20 consecutive 25th year of coaching indoor track. Slovenski has at least 20 consecutive
The Bates College Hockey Club has elected its officers for the 1976-77 season. Whitaker, this year's captain, with Chris Callahan (due to his commitment as president, Fred Clark, working on next year's budget and schedule. Ten games were played in the fall, and were co-C.B.B. champions. Elected at last week's meeting were Tom Edwards, president, and Seth Holbrook, the vice president. Both the latter two officers were re-elected in double figures. Moreover, the Bobcats had a fine two games quite a severely injured knee, played all but 4 games. Edwards played some excellent basketball in the second half of the season. Marois had 20, but rushed a shot in the final seconds that could have tied the game. Edwards played the last seven seconds by Edwards and Jay Bright, who played well coming off the bench by hitting six straight, missed.

Thus the season drew to a rather disappointing close. I am convinced this team could have won 15 games, however it was not to be. The team loses Joyce, Bacheller, Edwards, Bruno, and Campbell. The returning nucleus should be a good one for coach Wighton to work with. Tom Goodwin returns along with Bright, and the vastly improved Burke. Marois should be the school's next thousand point scorer. It looks like next year's outlook will be as optimistic as this season's. One can only hope that some day a Bates team will live up to its advance billing.

REBOUNDS: Colby shared the C.B.B. with Bates by beating Bowdoin two times by two points . . . My All Maine team (Bates, Bowdoin, Colby, Maine) would have Marois and Paul Wholey at the guards, with Bob Warner, Gregg Fasulo, and Paul Harvey up front. Next year's biggest need would at this point appear to be a guard.

ALUMNI GYM
Any who miss this meeting please see Coach Hatch immediately.

Three intramural basketball champs were crowned this weekend. Smith Hall with their quickness and determination came back from an eleven point deficit to nip JB and the Houses in overtime, 67-66. Doug Evans led the scorers with 21 points and was joined in double figures by Jim Toney, Pat Durning, Kurt Gelland, and Steve Lancer. Kurt Carlson had 16 for the losers. Smith had come from behind to take Hedge-Roger Bill in the semi while JB et al. nipped a depleted Pierce-Page-Rand squad. In the B-League championship JB II prevailed over a poor shooting Smith Middle contingent 98-26 in a foul-marred contest. Woo Woo Ginsberg dominated the scoring with 18 points. Art Allaire kept Middle in the ball game and led the losers in scoring. Rand capped the C-League top spot with a strong second half. JB (appearing in all three finals) kept it close for a half. It's a Girl!

Congratulations to Russ and Jane Reilly on the birth of their second daughter, Elaine Elizabeth, this past weekend. The parents were delighted. Russ said, "She's a real briner," in talking of the 9 lb. 6 oz. addition to his family. The members of the Reilly's community with health and happiness to the Reillys on this special occasion.

The Bates Women's Varsity Basketball team faced two of Maine's Catholic colleges this week, and swept both games by more than thirty points.

On Thursday, March 14th, the Bates team travelled to Windham to face the St. Joseph Monettes. After a slow start, the Bobcats rapidly gained the advantage, and at the break, the score was 38-13, in favor of Coach Crosby's girls. The Monettes entered the second half with a fighting spirit, but the Bates' momentum could not be halted. The final score showed the Bobcats to be the victors, 77-37. High scorers for Bates were Priscilla Wilde (18 points), Cathy Favreau (15 points), and Sue Pierce (13 points). Fine offensive performances were also turned in by Benny Williams, with one of her best games this year, and by Vicki Tripp. Lee Bumsted, Val Paul, and Laura Browne also contributed.

Thus the season drew to a rather disappointing close. I am convinced this team could have won 15 games, however it was not to be. The team loses Joyce, Bacheller, Edwards, Bruno, and Campbell. The returning nucleus should be a good one for coach Wighton to work with. Tom Goodwin returns along with Bright, and the vastly improved Burke. Marois should be the school's next thousand point scorer. It looks like next year's outlook will be as optimistic as this season's. One can only hope that some day a Bates team will live up to its advance billing.

The Great Stink of 1941

Glenn Wallace

Do you think the Androsocuggin River is fragrant? You ain't smelled nothing like The Great Stink of '41, Sonny. Tales of the Great Stink of '41 were part of Dr. Lawrence's talk on Androsocuggin pollution, as part of the Environment Committee lecture series. According to Dr. Lawrence, a release of paper mill pollution runs down the river quickly until it hits the Gulf Island power dam, three miles north of the dam. The pollution travels the fourteen miles of the reservoir in 7 to 8 days. In July, 1941, temperatures were in the nineties. The Androsocuggin was down to a trickle, as there had been little rain. A slug of pollution traveled the length of Gulf Island reservoir in fourteen days. The paper mill waste sat in puddles, at ninety degrees and fermented. Lewiston was pretty much gassed out. Everyone who could leave did. White painted houses turned splotchy brown. Silverware turned gassy. Silverware stayed polished for forty minutes. Everyone who could smell did. White painted houses stayed polished for forty minutes. The Great Stink lasted about a week. Citizens demonstrated at City Hall. This incident, and another like it in 1947, led to a suit by the State of Maine against five Maine and New Hampshire paper companies. After thirty years of agonizingly slow progress, most mills have switched to a cleaner chemical process. There are partially realized plans to build waste processing plants. Perhaps in another thirty years, the Atlantic Salmon will come back to what was once its greatest North American breeding river.

The Representative Assembly made a recommendation to the Student Conduct Committee at its Monday night meeting. The recommendation was inspired after a Student Conduct Program was held at Bates, in which Dean of Students Judith Isaacson explained Student Conduct procedure. The proposal, which follows: "The Representative Assembly recommends to the Student Conduct Committee that in the future, the charges and verdicts of the conduct cases brought to it be made public. This should be with the stipulation that the student in question have the right to request secrecy with the understanding that he or she, too, will respect this confidence." Submitted by the Representative Assembly.

Internships In Historic Preservation Offered

Fifty college students will be chosen to participate in the National Trust for Historic Preservation's 12-week summer internship program this year. Deadline for applications is March 5. The Trust provides the summer internship, which pays students a salary of $3.66 per hour, to assure that students interested in preservation can gain practical working and learning experience through training in the various fields of historic preservation.

A broad range of opportunities is available in such fields as architectural history, art history, economics, history, horticulture, the humanities, journalism, landscape architecture, law, library sciences and planning.

Interns are placed with Trust member organizations or the Trust's historic properties, or at the National Trust headquarters in Washington, D.C. The program began in 1976. According to Patricia E. Williams, the Trust's community education coordinator, "There will be at least 75 internships for the summer, and expect to research and writing to make films concerning preservation in the future."

Studying the feasibility of establishing a center for historic landscape preservation was the project of Kristy Hentz, of Clinton, N.Y. "My internship was highly worthwhile," she said at summer's end. "It heightened, in addition to confirming, my interest in historic preservation. It was an excellent combination of American studies and landscape architecture."

Stephanie Faub, of Washington, D.C., was a laboratory assistant at Belle Grove, a National Trust historic property in the Shenandoah Valley of Virginia. The archaeological program at this 18th and 19th century working plantation provides experience in a strenuous archaeological excavation. Excavations are undertaken to uncover more information about the property. Future plans may include excavations at other Trust properties. "I believe that my internship was productive," Stephanie says, "both in the sense of accomplishing useful work on the site and in giving me valuable experience in working on the excavation. I feel that I learned a great deal and was able to leave a number of exhibitible objects at Belle Grove that would enrich the property." Summer internships are responsible for their own room and board and transportation costs, according to Ms. Williams.

Inquiries about this program should be addressed to Community Education Coordinator, Division of Education Services, National Trust for Historic Preservation, 740-748 Jackson Place, N.W., Washington, D.C. 20006.

The summer internship program has enrolled 75 interns over its nine-year history. This is only one of the activities undertaken by the Trust, which is the only national, private, nonprofit organization chartered by Congress to guide and further the preservation movement.

National policy calls for preserving for public use America's heritage in historic districts, buildings and structures and objects, and facilitating public participation in the historic preservation movement.

To carry out that policy, the National Trust provides technical advice, limited funding, publications, conferences, public information and tours, and maintains and operates several historic properties and house museums.

Now students who want to work in Great Britain, France, Germany or Ireland don't have to worry about all the red tape usually involved in finding a job abroad. CIEE, the largest non-profit student travel organization in the U.S., will make all the arrangements so that students can work in any of these four countries.

Participants in CIEE's "Work in Britain" program get official permission to find a job anywhere in the British Isles for up to six months at any time of the year. Last year students on the program did everything from serving ale in a pub in a Yorkshire village to type-setting scripts in a London television studio.

In Ireland, Germany and France students work at summer jobs — usually in stores, hotels, restaurants or factories.

The program in Germany is free and includes a job placement by the ZAY (the German national employment service). For the program in Great Britain, the fee is $10; in Great Britain, $25; in France, $25 or $85 if a job is prearranged by the Paris office of CIEE. All past participants agree: there's no better way to get to know a country than to work and live there in a CIEE work program, that's easy to do. Just write for details and application forms to: CIEE, Dept. J, 1077 77th United Nations Plaza, New York, New York, 10017 or 236 North Santa Cruz, #314, Los Gatos, California 95030.

Bates Students Tutor

by Kristen Anderson

The student tutoring program, a division of the Campus Association's Community Service Commission, is in need of more students to volunteer to assist Lewiston High School students with their academic problems. Currently there are many high school students on the waiting list for biology and science tutoring in particular. The subject tutors are generally needed for all subjects: Algebra I and II, Geometry, Survey Math, Calculus, Microbiology, Biology, Chemistry and Physics.

Currently, there are 75 students on campus who are regularly (Tutoring involves meeting the students for one or two hours per week, at some prearranged place on campus (such as Chase Hall or in the tutor's room.) The tutor does not have to be proficient in the subject in which he or she has been tutored for, for example, Survey Math is only about ninth grade level basic mathematics. Mrs. Marge Murphy, the guidance counselor at Lewiston, has been given reports from teachers that the tutoring program has helped their students very much. If you want to be one of these tutors, get a signature from your homeroom teacher and present it to the present head of the program, or Martha Brown. Tutors are especially needed now as some tutors are leaving during short term, and replacements for them will have to be found.
