Use Of College Property
For Personal Profit Not Acceptable

by Thomas Vannah
Senior Reporter

Dean James Carignan suggested on March 21, 1979 that the college does not condone the selling of goods from college dormitories. Carignan also asserted that it is against the college’s regulations to hold parties on school property for students’ individual profit. Said Carignan: “As far as I know, this is not going on. It would be against our policy referring to parties for individual profit because it is illegal.” Carignan further stated that there exists a “regulation against selling goods from within the dormitory unless they are cleared through the Vice President for Business Affairs.”

On March 22, on the bulletin boards in the dinner line, four “for sale” signs hung advertising products, used anew, for sale by persons within the college. On the bulletin board outside the Bates College Bookstore hung advertisements for cars, stereo, records, and clothing. Also hanging on the bulletin was a sign advertising new stereo components, televisions, fuzz-busters, and assorted electrical equipment, with a note informing those interested to contact a student living in Adams. The student explained, when contacted, that he takes orders from students and sends them to a mail order house, adding his commission to the bill. The goods are sent to the post office on campus. The Office of Career Counseling, said the student, “helped me get one of my jobs.” When asked if the job in question was related to his selling of stereo equipment on campus, the student suggested that it was the case.

Mr. Bernard Carpenter, Vice President for Business Affairs, claimed, “The college would be overspending its authority to tell students that they could not sell their stereo within the college.” Carpenter suggested, however, that in cases where students use their rooms and the college bulletin boards for personal gain, “That is sort of a gray area. Students can not have ware parties in dorms for personal gain. Students cannot solicit on campus.” The Student learned of two instances in which students

Sex Attitude Survey
Reveals Interesting Attitudes And Opinions

by Mark Baer
Senior Reporter

What kinds of attitudes toward male-female relationships exist on the Bates campus? How do your fellow students feel about the subject of relations between the sexes in and around their lives as Bates students? Recently the Student ran a “Sex Attitude Survey” and from those students responding, some general patterns as well as some unexpected responses emerged.

The questions were of a general nature. Attention was centered not only on questions of sex and sexual matters, but more specifically as those subject matters related to the Bates community.

When questioned, “Do you find male-female relationships at Bates favorable?” about half responded in varying degrees of the affirmative. However, there were many strongly negative responses. Limited selection was a major criterion for complaint. A number of students cited dormitory restrictions such as isolation of Smith and the large number of single-sex housing arrangements as major stumbling blocks in the path of better male-female relations. Homogeneity of the student body was another major idea which many saw as obstructive to better circumstances.

Alternatively, most of those responding did not place the blame solely on Bates. Most agreed that these conditions are at least in part due to the structural set-up of a small liberal arts college and are not solely characteristics unique to the Bates community.

Nearly all of those who responded agreed that there are no administrative regulations that restrict male-female relationships. When asked if greater administrative initiative in this area might be beneficial to the overall picture, students almost invariably answered in the negative. There were, however, a few divergent from the norm, one student saying, “Maybe some other guidance personnel would be helpful” in assisting students.

One thrillers were commonly cited as an ominous problem in the Bates community. One typical response cited these one thrillers for causing “unnecessary animosity” between the two sexes, adding that “too many people are just in it for the sex.”

Closed mindsets toward differing attitudes concerning sex and sexual behavior was also cited as a large campus-wide problem.

New Student Newspaper
Editors Appointed
By Executive Board

The editor and assistant editor of The Bates Student for the 1979-80 school year were elected this week. Thomas Vannah, who plans to double major in English and History or Political Science, will be serving as editor-in-chief along with Jon Marcus, who intends also to fulfill a double major in English and Political Science, as assistant editor.

Both Vannah and Marcus have worked diligently for the Student this past year as Senior Reporters.

Vannah’s past journalistic experience includes: his work for The Bates Student; editor-in-chief of his high school newspaper (1977-78); features editor of that paper (1976-77); contributing editor (1976); and reporter (1974-76). He also worked sporadically as a headline writer and assisted with layout of The Milford Citizen (1977). Vannah’s high school paper, under his direction, was awarded a First Place Medal by the Columbia Scholastic Press Association and was nominated for “All-Columbia” honors in the areas of layout and editorials.

Marcus also has extensive experience in journalism. Besides working for The Bates Student, he served as: editor of the Webster Street Journal, an alternative newspaper which he and others created during his high school years, an intern at the Daily Transcript in Dedham, Mass., and later became a weekly columnist for that paper; director of the New England Student Press Co-Operative; and newspaper for the Needham Reporter.

Both Vannah and Marcus will be sophomores next year; however, they do not foresee their class status as a detriment. Said Vannah, “I think that Jon and I will have to be judged by our own merits and not by our age.”

Vannah, as editor-in-chief-elect, commented that he hopes the student body “although they sometimes disagree with what we may choose to print, will support the newspaper in a constructive manner.”

Carpenter suggested, however, that in cases where students use their rooms and the college bulletin boards for personal gain, “that is sort of a gray area. Students cannot have ware parties in dorms for personal gain. Students cannot solicit on campus.” The Student learned of two instances in which students

$4.2 Million Gymnasium Complex
Taking Shape

No longer battling the winter elements, construction crews on the new gymnasium complex are now moving into more advanced stages of construction. The construction is ahead of its original schedule.
To the Editor:

Two hundred have taken us up on and transfer students have had talented people. And to suggest some ways in students less than a week to delayed at the printers giving recommendations will be held on April 19, for the first reading of distribution requirements. A March 19, for the first reading of the EPC proposal on general education. This proposal offers programs to fulfill the requirements. A final vote on the EPC recommendations will be held on April 2.

---

BATES BRIEFS

The administration agreed to an extension of the deadline for fall registration from Friday, March 23, to Monday, March 26, at 4:30 after a request from RA president, Jack Meade. The course listing booklets were delayed at the printers giving students less than a week to complete registration under the old deadline.

* There was a special meeting of the EPC on Monday, March 19, for the first reading of the EPC proposal on general education. This proposal offers programs to fulfill the requirements. A final vote on the EPC recommendations will be held on April 2.

---

WORLD NEWS CAPSULES

The formation of a new Italian government was brought about by Christian Democrat Giulio Andreotti industry in two small moderate parties. Reform by the third ranking Socialist party to support this arrangement could push Italy toward an early general election two years ahead of schedule. This move aims to break the current impasse in Italy.

* Hassan has rejected a Chinese proposal to picture talks March 28 which they dismiss as a trick. Vietnamese newspapers charged that the talks are still in Vietnam. The Hassan government rules out any talks until Chinese troops withdraw from disputed border areas.

* The government has announced the approval of additional oil aid for the unemployed in Idaho, Maine, Pennsylvania, and Rhode Island because of high unemployment rates in these states. This measure increases the normal 26 weeks of jobless payments by an additional 13 weeks.

---

EGYPTIAN PEACE TREATY

The Egyptian peace treaty in Washington is expected on Monday, “if all goes well” says President Jimmy Carter. The U.S. pledges to follow up the signing of the treaty by providing Egypt with $2 billion in planes, tanks and anti-aircraft weapons and Israel with $3 billion to defend itself from the Sinai Peninsula. These pledges will come in the form of grants and long-term credits.

---

FIRE

March 19 marked the annual return of the snowbirds to the islands. Every student who would be allowed to throw one dart to determine what his room would be for the beginning of each school year. Of course there would have to be separate boards for all, male, all female, and coed. Personally, I know many students who have had great success at using a similar concept, the famed “course selection dart board.”

CORRECTION

Representative to the Maine House of Representatives, Joyce Lewis of Auburn was incorrectly referred to as a Democrat in an article last week concerning the Stanton Municipal Election. Ms. Lewis is a Republican.
Dean Emeritus Harry Rowe:  
After 91 Years A Personification Of Bates College  
by Jan Marcus  
Senior Reporter  
The elderly gentlemen, not quite looking his 91 years, opened the door to the small house overlooking College Avenue. Outside, Bates students jogged as the relatively warm day waned. "Have a seat," he said. "You have to sit there, that's the chair that says Bates on it..."

Dean Emeritus of the Faculty  
Harry Willison Rowe, who was born in Maine in 1888, was a student at Bates College in 1907. He later became a professor of English and later became the Dean of Students. He was the first Dean of Students at Bates College. He has been involved in the school for more than 90 years. He was a member of the Bates College Board of Trustees and served as Chairman of the Board of Visitors from 1952 to 1958.

Harry Rowe was a member of the Bates College Board of Trustees and served as Chairman of the Board of Visitors from 1952 to 1958. He was also the first Dean of Students at Bates College. He has been involved in the school for more than 90 years.

Dean Emeritus Harry Rowe  
By Jon Marcus  
Senior Reporter  
Dean Emeritus Harry Rowe, to ascertain just what Campus Security for Bowdoin was devised what was called the Executive Committee of the Association. This committee was composed of the Executive Committee of the Association of Deans and Ad- visors of Men - the list goes on and on. Dean Rowe received a Doctor of Letters degree from the University of Maine, an honorary master's degree from Bates College in 1933, and an honorary Doctor of Humane Letters degree from Western New England College in 1953. At his retirement in March of 1958, the Executive Committee of the Association of Deans and Advisors of Men - the list goes on and on - devised what was called deferred tuition. A student could get $50 or $75 deferred until after he graduated.

Dean Emeritus Harry Rowe  
by Brian M. McDowell  
Junior Reporter  
The question of whether or not college security, maintenance, or planning could ever be done within the new limits of space and target area for students in what they had thought about Bates College, was a student's room on campus and removed what they consider to be little financial resources as they had then, why they couldn't dream of going to a college like Bates. Our friends down the river referred to us as the college of women and blacks, although they referred to blacks in a more demeaning way, because Bates was founded by abolitionists. It was almost a maxim of his - 'quality education at a fair price.'

Security Within Rights To Remove Contraband From Students' Rooms  
by Melissa Weiaatuch  
Senior Reporter  
A question of whether or not college security, maintenance, or planning could ever be done within the new limits of space and target area for students in what they had thought about Bates College, was a student's room on campus and removed what they consider to be little financial resources as they had then, why they couldn't dream of going to a college like Bates. Our friends down the river referred to us as the college of women and blacks, although they referred to blacks in a more demeaning way, because Bates was founded by abolitionists. It was almost a maxim of his - 'quality education at a fair price.'

While the issue may be quiet now at Bowdoin, it has by no means been resolved. Newspaper articles and editorials on the incident have appeared in college papers across the nation as well as national news media outlets. For a definitive legal answer The Bates Student contacted the Androscoggin County District Attorney, Mr. Thomas E. Chase. (Continued on Page 12)  

Interdepartmental Cooperation Not Widespread  
by John Leamon  
The Student recently spoke with two professors of differing academic specialties in order to get some ideas concerning interdepartmental curricular cooperation from the scientific and non-scientific points of view. History professor James Leamon expressed an interest in more team-taught courses. He feels there is currently "no general encouragement toward this," citing the "compilation in what courses you can release from your teaching to par- ticipate." He "would like to see a system by which faculty members are credited with time spent in team teaching."

Chemistry department chairman James Boyles also said that very few courses are taught jointly by two departments "mostly because of time factors," adding that "most departments are tied up with courses in the department." Interdepartmental majors are another area of cooperation between departments. According to Dean Straub, there have never been more than three or 4 interdisciplinary majors per year. Professor Boyles explained that his department "is open to the idea of inter- disciplinary majors," although there have been none that could recall in the last five years. There have been quite a few double majors, with the most common ones being chemistry - biology and biology - chemistry. One student recently majored in both chemistry and art. As long as the major requirements are satisfied for both departments, such an agreement is acceptable.

All science departments retain the bulk of their printed material in the Science Library, located below the art gallery at the student union. The Bates Student (Continued on Page 12)
Clamshell Alliance Active
Bates' Chapter Lacks Support

by Laura Radke

Seabrook, New Hampshire has, for many, become a symbol of nuclear energy. At least in the Clamshell Alliance's eyes, the association between this small coastal town and the alternative energy source is not a happy one. The Clamshell Alliance is an anti-nuclear energy organization which was organized in July of 1976 because of the decision by the Nuclear Regulatory Commission (NRC) to allow the Public Service Company (PSC) of New Hampshire to build a nuclear plant in Seabrook. Since then, the Clamshell Alliance has been the center of numerous anti-nuclear plant protests. The Seabrook plant has been the focal point of the Clamshell Alliance's existence.

Why does the Clamshell oppose nuclear energy? The group feels that nuclear energy and its investors are exploiting the environment and endangering the people by making inefficient, and uneconomic decisions without allowing the people to voice their opinion in such an important matter. Their major reason is that nuclear waste material presents a danger to the environment and its inhabitants. They believe that radiation-poisoning is very real. It may cause cancer and genetic abnormalities, and will do irreparable damage to the environment. Already five nuclear power plants in the country, including the Maine Atomic Yankee Nuclear Power Plant in Wiscasset, Maine, has been closed temporarily because of unsafe operations in their emergency cooling systems.

Clamshell's demands are simply stated:

- No money spent on the development of nuclear power, except to dismantle already existing plants.
- Find an energy source which presents no threat to its environment and works in unison with the environment.
- People working in the nuclear energy field be retained and hired, the alternative energy source held.
- The people not monopolistic utilities should control energy sources.

The Clamshell Alliance has been full of activity. After its establishment in the summer of 1976, the first occupation was held on August 1, 1976. Six hundred people attended. Eighteen New Hampshire residents entered the site and were arrested for trespassing. Less than a month later, the Clamshell organized another protest, in which 1280 people gathered. One hundred and eighty people occupied the site and were arrested. Later in the fall, the Clamshell held an Alternative Energy Fair near the plant where 2300 people were present. In April of 1977 was the key turning point in the Clamshell's history. 2500 people gathered at the site, representing 31 states. Non-violent training was first emphasized at this peaceful protest. Mass arrest, ordered by then Governor Meldrin Thomson, caused 1490 protestors to be rounded up on the charge of criminal trespass. June 22, 1978 saw another peaceful protest. "To block the transport and installation of the reactor core and vessel to and from the New Hampshire rate hike." Not only were 295 New Hampshire residents Graham the threat of the nuclear power plant, they were also being charged a Construction-Work-In Progress (CWP) extra charge on their electric bill, which was raised to $2.92 per month, by order of Governor Thomson. Although there is still distance between the Alliance and the New Hampshire government because of their difference on nuclear power, relations have relaxed since Thomson left office.

Non-violence has been a technique used by many; the black civil rights movement, the women's rights movement, and the anti-war marches. The Alliance's purpose in using non-violence is to contrast their philosophy with the threat of the Seabrook, or any other nuclear power plant. The Alliance has held non-violent training programs to teach members the technique of non-violence.

The latest activity of the Clamshell Alliance occurred just within the last two weeks. On March 7, 1979, it was discovered that one of the nuclear reactors would be arriving at any minute. A telephone network system had been established so as to alert members to sudden developments. Early the next morning, reactor would be coming from Fall River, Massachusetts, and would arrive via the Cape Cod Canal. The Alliance was deceived. Instead, the reactor ended up in Fall River, Tennessee. A sea and land blockade had been planned, but only the land blockade came through. The blockade occurred on March 9 at the Seabrook dock, seven miles from the power plant site. Thirty Clamshell members lay on the road to block the reactor's transport. It has been estimated that 150-200 people were arrested in this blockade. The reactor did make it through. The next day, a rally was held to show solidarity for those who were arrested, and to give those others, but not as many groups can be seen here, as there is no one left.

* Find an energy source which presents no threat to its environment and works in unison with the environment.
* The people not monopolistic utilities should control energy sources.
* The people not monopolistic utilities should control energy sources.

The Clamshell Alliance's yearbook will continue in the same manner as it did this year. Joe Bibbo, Sue Collins, Kathy Doey, Leanne Gulden, Walter Hoerman, Yvette Johnson, Scott Keenan, Mike Lugli, Minoo Malek, Steve Maroieick, Mike Morrison, and Beatiria Muller will be Junior Advisors in Smith Hall next year. Chris McAllister, Steve Barrett, and Nancie WincheU will be Junior Advisors for the third floor of Page Hall.

With the approaching final examination week, the library is studying data, in an effort to determine if lengthening library hours during the week before finals is justifiable. Currently the Science Library operates under extended hours, while the "late night" study area continues to remain open around the clock...
Alumni Office Capable Of Providing Variety Of Services To Bates Community

by Jon Marcus
Senior Reporter

The Alumni Office is a pretty hectic place when spring arrives, and this year is no exception. The reunion weekend, alumni college, senior officer elections, and other programs are all in full swing. Meanwhile, the office itself is in transition as the retirement of Alumni Secretary Randy Webber nears.

Senior activities sponsored by the Alumni Office this year will include what is being termed a "Real World Seminar." The seminar will probably be held during the second week of short term and will discuss, according to Associate Alumni Secretary David Welbourne, "things that college graduates must know but are seldom told before they graduate. They'll talk about some of the intangible things like the personal business of leaving college." Other things such as budgetary decisions, insurance, apartment leases, and employment contracts will be reviewed.

Meanwhile, though a date has not yet been set, seniors will soon be electing class officers. These officers will serve for the five years until the first class itself is in transition as the Alumni College this year will become a private college, senior officer elections, and this year is no exception.

Those people who are already alumni will return to Bates the weekend after commencement (June 7-10) for reunions. Eight or nine hundred alumni and their families from all over the country will be treated to faculty seminars, golf and tennis tournaments, and admissions counseling.

Alumni College this year will be held aboard a windjammer sailing down the Maine coast. On board will be Professors Chute and Leamon to lecture on the features and history of the coastal area near The Bates Student this issue.

When Alumni Secretary Welbourne resigns at the end of the year, Associate Alumni Secretary Webbourne will be taking over. Mr. Welbourne plans many enthusiastic programs for next year. "None of this implies that the program is weak now." he cautions. "The percentage of alumni that give to Bates is among the highest in the country. We're starting with a good strong base."

Most of the new projects call for having the college provide more services for the alumni. "We ask people to do things for us all the time," Dean of Admissions Hoss plans to provide counseling services for alumni children. Younger alumni will be provided with contacts with other Bates grades in new towns or in large corporations.

Alumni College will become a strong, annual event and, hopefully, will be brought back on the campus.

"Responsible Journalism Is Accurate Reporting"

THE FOURTH ESTATE:
Experts Comment On Journalism

by Thomas Vannah
Senior Reporter

The recent controversy surrounding The Bates Student, and the controversy associated with actions of certain metropolitan newspapers in the past decade, raise a question. What is the role and purpose of The Fourth Estate? The Student spoke with two professional journalists concerning the question.

Mr. Richard Harwood, Deputy Managing Editor of The Washington Post, and ex-Editor of The Trenton Times, is a newspaper owned by The Washington Post Company) was contacted on March 20, 1979. When asked for his views on what the primary purpose of the press is, Harwood replied, "When the First Amendment was written, those men at the constitutional meeting felt that the press was vital to democracy as a source of information, as an institution which can be, in theory, a check of governmental power and governmental actions, and as an exposure of various points of view," Harwood continued by suggesting that "we still have these functions." Harwood noted that the newspaper business has become an important economic enterprise and suggested the importance of newspaper coverage of service information and its role as an entertainment entity. Harwood was asked to comment on the opinion that there was a distinction between the "free press" and the "responsible press." Harwood again cited the First Amendment to insure that the press is responsible. What one person views as being responsible, another may view as being irresponsible. There is no restriction outlined in the First Amendment. Harwood was asked if he felt that the press should be unrestricted, even though some papers exercise questionable practices. Harwood replied "Yes!"

Harwood gave his opinion of what was the greatest change or trend in the press of the United States in the last decade. "Newspapers have gotten pretty aggressive and have done a better job in investigative reporting. Harwood noted the increased interest in the field of journalism cited the large enrollments in journalism schools as an example of the phenomenon. When asked if he felt that the great publicity that The Washington Post had received because of its direct role in the uncovering of the Watergate Affair had any effect in journalism, Harwood suggested that that there was no way to accurately determine the extent of the Post's effect, but, he said, "I think it's had a major influence on newspaper actions, and as an institution which can be, in theory, a check of governmental power and governmental actions, and as an exposure of various points of view," Harwood continued by suggesting that "we still have these functions." Harwood noted that the newspaper business has become an important economic enterprise and suggested the importance of newspaper}

Weather Only Aspect Of Short Term Planned Thus Far

by Ted Baker
Senior Reporter

Short Term looms closer and closer each day. What does it hold in store? To long hours of classes and endless nights in the library? First, according to The Old Farmer's Almanac, My should be a beautiful month. It will be warmer than usual, and rainfall will be below average. The average for the month will be 61 degrees, 2.5 degrees above average. An increase of 1.3 inches of rain is predicted. It should be good beach weather, especially the last week of Short Term, which will be a real scorcher.

The Bates Student will be published once each two days during Short Term, but no definite decision has yet been reached by the editors.

**Three Hearts:**

*Good Album Overall*

by Jim Fitzgerald

The article begins with a mention of the successful "Three Hearts," a group that has turned out a lot the same as the first. It is a good album overall, filled with the classic guity vocal harmony hooks that made French Kiss so successful. The album features Mick Fleetwood on drums on one song, and on various percussion instruments throughout the album. Stevie Nicks and Christine McVie add some luminous harmonies to the overall sound of the band. The album features Mick Fleetwood echoplexed on almost every cut. One must come to a few of the songs, and the album is "One of the Best of the Year." It is a very listenable pop-rock album. To make it possible to organize people to make a difference." He cited the characteristic idealism of an institution such as Bates and said that in dealing with many problems there are "troubles with a rich presono college."

On Sunday, March 26, 1978 an exhibition of sculptures by Maine sculptress Harriet Matthews opened at the TREAT Gallery. The exhibition will run through April 20th. It includes 15 sculptures done over the last 15 years. Harriet Matthews has been a Professor of Art at Colby for 15 years now, she is responsible for the Sculpture Program at that school, and is currently teaching courses in both drawing and sculpture. She was educated at the University of Georgia, where she studied primarily under Leonard DeLounge. She taught for a year at Oklahoma, and worked in a library for a year before coming to Colby.  

Matthews' medium is steel, which is a very difficult medium to work with. Most sculptors who use steel cast it, but Ms. Matthews shapes and welds it, building her pieces from the foundation up by cutting out and individually welding on each component of the sculpture one at a time. It is both physically and mentally exhausting, and the steel medium is not used by many artists. It is painstaking work, sometimes taking up to six weeks to complete an individual sculpture. When she is through all, save one, Matthews’ view of some famous classical architecture which she has observed and photographed on trips to Greece and Yugoslavia. According to friends of hers present at the opening, these trips made a “strong impression on her life and work.” Ms. Matthews, who comes from a strong background in Art History, describes her sculptures as “a response to space - the classical architecture and sites are an outward vehicle for this.” She is not interested in sculpting a site “verbatim” but in providing “a distillation which is interested more in visual ideas.” Ms. Matthews stressed that her technique comes first and the ideas follow, although the ideas are not necessarily bound by the limitations of the technique.  

Sculpture In Steel  
Currently On Exhibit In TREAT Gallery  

On Thursday, Friday, and Saturday, March 28, 30, and 31, the Bates College Modern Dance Company, along with the Bates College Community Orchestra, will present “Appalachian Spring and New Works.” Marcy Plavin is artistic director of the company which includes its own choreography and fifteen student pieces. The orchestra, conducted by William Mathews, will play Aaron Copland’s “Appalachian Spring” and Pachelbel’s Canon.  

Tuesday night’s concert includes choreography by Tory Brotherhood, Judy Dolan, Debbie Furlong, Sandie Martin Kerr, Betty Kalperis, and Susan Smith. On Friday, student choreographers in the first half are: Melissa Bonney, Tory Brotherhood, Wayne Gardiner, Michelle Leonard, Betty Kalperis, and Nancy Biessel. Saturday night’s program consists of choreography by Sharon Bomer, Lesly Carrell, Judy Doran, Debbie Furlong, Steve Machosich, and Adam Sharaf. Reservations for “Appalachian Spring” can be made beginning March 26 by calling 783-6772 between 7:00-9:30 p.m.  

Senior Joe Biden Scheduled For Lecture And Debate  

Senator Joseph R. Biden ID-Delaware), potential future aspirant to the office of the Presidency, will return to the Bates College campus for the second time in just over a year, this Monday, March 26. The 36-year-old senator is scheduled for a Chase Lounge lecture and debate session Monday evening on U.S.-Soviet relations and the recent SALT II negotiations.  

Elected as the youngest senator in history at age 29, Biden recently won re-election to the senatorial seat polling a decisive 57% of the constituency. As senator for six-plus years, Biden has risen quickly within the senatorial hierarchy. He is currently fourth ranking Democrat on the powerful Senate Judiciary Committee, third ranking Democrat on the Judiciary Committee as well as serving as chairman of the Judiciary subcommittees on crime and criminal justice. Senator Biden is also a member of the Steering, Campaign, African, Budget, and Intelligence Oversight Com-
In Intramural Basketball

by Dave Trull

As some teams watched their playoff hopes vanish, others were clinching playoff spots, all in the Men's Intramural Basketball Leagues. Although a majority of the players and teams have been clinched, the final order of finish in both A and B Leagues are yet to be determined.

In A League, Howard, Millett-Hedge, Adams 1, 2, and Page have all clinched playoff spots. Howard, although beaten for second place by Adams 1, 71-64, is still in second place. Beat Howard, second place Millett-Hedge also whalloped W-H 82-65, allowing Howard to finish second. Adams, 71-46. Roger Bill was able to clinch by winning two games over Adams, 64-50 over Adams. W-H 8-8 slings to fourth place, with fifth place JB having a strong mathematical chance to catch them.

In B League, the four slots in the playoffs have all been clinched. Smith South, the only unbeaten team in all three leagues, has already romped over Adams 4, 64-29. Adams 3 still holds second by virtue of the win over Moulton, 45-37. Third place Rand Hedge could move into second place with two big victories, while Adams 4 has locked up fourth place.

In the Eastern-Division, things are more confusing. Only first place Adams 1, which beat Page 2 by forfeit, has clinched a playoff spot. Page 1 moved into a tie with Adams 5 for fourth place with Roger Bill by beating Adams 2, 38-28. JB took sole possession of fourth place by beating Page 2. But these three, along with Howard, could all finish anywhere in the standings from second to fifth.

In C League, Smith South kept rolling along with a pair of wins over Roger Bill. Coming from behind to win the first en-counter, 27-19, and scoring 18 unanswered points to again beat the Bill, 38-20.

Here are the standings as of March 20:

The defense will be constructed from Craig Cotinis, Ernie Shields, Russ Swapp, and Pete Shakesen. These four veterans will provide a solid foundation to complement Bates' good offense. In addition, Captain Colin Pyne, Frank Desool, and Brian Dawson will bolster the defensive corps. Peter Shakesen, the major question mark on the team will be the goalie position. There are no returning players here although Dick Brooks, Matt Page, and Sam Aykanian have looked sharp in practices and scrimmages. Brooks is an experienced hockey netminder and Page was a lacrosse goalie in high school, but none of the trio has any college experience yet.

Coach Web Harrison and coaches Geltter and Burch should be optimistic about this young team. The next five games are a bright horizon for the Bates lacrosse program.

Tennis Squad Ready For Action

by Eddie Walsh

With the approach of spring and warmer temperatures, the men's tennis team, now in its second year, is looking forward to moving to the outdoor courts. The team has only two players, including Central Murray Holmes playing some strong tennis at this early date. Mark is anxious to get back in action as he is presently recovering from a leg injury. As for the remaining positions on the team, the competition is close with a large number of good players competing for the team this spring, most likely to be selected to the EAIAW.

The popularity of short term was affirmed among a variety of faculty members polled during the week of February 26. Each faculty member polled was asked whether or not he thought short term was useful and why he held this particular view. They were then asked to further comment on whether short term was what they would like it to be and if it could be changed in any way how would they go about doing it. They were also asked to assess the amount of work actually done by students during the short term period and the amount of work usually assigned during a short term course. It was hoped that department chairs would be able to answer the questions, but in cases where they were not available, a faculty member from the same department was substituted. The questions were conducted over the telephone. In a few cases department phones were unanswered during polling time for two and even three days in a row. A total of fourteen departments we consulted for polling.

There was an overwhelming positive sentiment toward the use of short term, especially in departments which offered off campus or arts related programs. Geology professor Roy Farnsworth exclaimed that his department was one of the first early advocates of the program since its origination in 1967. Farnsworth feels that the short term offers geology students "first hand experiences" instead of the sole use of textbooks and pictures. Students are able to visit "classical locali ties," often spending a full day at these sites. Theater professor Martin Andrucki described short term as "very useful, particularly for departments such as mine in which particular kinds of projects require total time commitments." He further commented that the program offered "unusually valuable to the theatre department" and is a "very valuable alternative to the structure" in which more departments can benefit than others.

Donald Lentin, art department chairman, said that short term can consist of "primarily in novative programs." For example, it is useful for French courses in Paris and for painting students who need to spend a long time on their work. Math professor Richard Sampson commented that he thinks short term gives students a chance to study things other than the routine academic courses and provides a chance for outside reading and off campus courses even though the math department does not offer any off campus courses.

George Waterman, music professor, described short term as "very useful for a student to concentrate full time on a piece of subject matter." In reference to eliminating short term, Waterman said "I sure hope that doesn't come to pass." Chemistry department chairman James Boyles said that while the short term period is useful for some departments, "We don't see any unique advantages as far as chemistry is concerned at the moment."

Among the various plans offered to make changes in the short term, one, regarding the rearrangement of the 4-4-1 calendar appeared most often. Most of the suggestions in this area advocated moving the program to the fall. Psychology department chairman Richard Wagner feels that by the time spring comes most students are tired and that it would be "less disastrous for a set of regular courses to have tired students." In addition to the type of vacation that would take care of the long haul between Thanksgiving break. Richard McDonough, a philosophy professor, suggests perhaps making short term a week shorter. He notes that attendance during short term is "much weaker." Professor Parnsworth believes having it in the fall once in a while could be beneficial, especially in regards to outdoor work when the weather is more desirable.

English professor Eric Brunnerger feels that a 4-1-4 system could be more advantageous, and described students' attitudes during springtime with words such as "laid back, mellow, spacy" and "relaxed." He noted students some short terms "feeling very tacky about myself as a teacher and them as students." He adds that some good work is done during this time, but at the lower levels of the class the work becomes poorer. He does see short term as a "chance to experiment and follow up special interests."

Economist department chairman Ralph Chanes wishes that short term could be "more of an intellectual exercise more of the time."

George Feiter, sociology anthropology chairman sees short term as a useful experience. It enables students to "concentrate heavily on one subject" and they "can go off campus without missing other classes." He elaborates, "some don't take advantage of many opportunities to do things they could do during the regular semester."

Physics Astronomy chairman George Ruff said "basically I like it the way it is." The idea of changing short term at the beginning of the year "attracts me a little bit" mainly because getting freshmen involved in a short term when they first arrive on campus could prove to be a good introduction to college study.

Short term courses usually offer as much, if not more work than regular semester courses. For example, Professor McDonough's standard philosophy course involves about 300 pages of reading per week. Critical thinking and learning to write papers are a major part of the course.

Professor Andrucki's course, "The Living Stage" (620), involves two weeks on campus, followed by three weeks in New York and then another week on campus. In New York, 12-14 hours per week are spent in the theaters and five are spent in discussions. During the last week of the course the students must write a long essay based on their experiences.

Students taking geography short terms may often spend an entire day at the sites. Professor Ruff teaches an electronics course that uses a textbook with about the same amount of reading. Four hours a day are spent in the lab and one hour spent in class. Short quizzes are given daily.

The athletic department offers three types of programs during short term (including basic physical education). S21, "Sports and American Culture" was given a year ago and will be offered again in 1980. S20 involves individual research for which students must apply in advance. Robert Hatch, Athletic Director, was unable to comment extensively on the value of short term because of its nature, his department has been "minimally involved." He does feel "mixed emotion," particularly because the placement of the short term puts Bates "out of step with everyone else we're competing against." At this time, the opponents are beginning final exams while Bates is starting short term.

In spite of a few minor problems, short term appears to be popular with the faculty sampled. In the words of Donald Lent, "I regard the short term as one of the most unique and innovative policies of the college, but not always used that way. When following the pattern of the rest of the year it is a failure."

### Greyhound Rx: The cure for college blues.

It's a feeling that slowly descends upon you. The exams, the pop tests, the required reading, the hours at the library, the thesis — they won't go away.

But you can. This weekend, take off, say hello to your friends, see the sights, have a pocket because your Greyhound trip doesn't have to mean a round trip. Greyhound offers the cheapest way to go. And you'll be back with a lot more fun and a lot less money in your pocket.

protest, resembling the April Fly by Night Schysters that occurred in April. May, or June. Mass arrest will be expected since civil disobedience will be the major method employed.

Bates College, and on a larger scale, the Lewiston-Auburn community have participated in Clamshell activities. Jane Guernsey and Sue Cahoon, two seniors, have tried to organize a protest committee to hold the Clamshell for a day. Bates students were asked to bring black arm bands and picket signs to the rally. Jack Bartlett, a Bates graduate who currently works in Lane Hall, has also been active in the local movement against Seabrook. Sue and Jane said that with a sufficient amount of interest, another non-violent training program would be held this spring or fall. The last session was held during the vacation period.

The Lewiston-Auburn affinity group is much more active than Bates'. The climate now is in the process of developing a street-theatre in an attempt to educate people to the dangers of nuclear energy.

Two nuclear energy films will be shown on March 27 in Chase Lounge at 6:30 p.m., entitled "Hindenburg" and "Which Way the Wind." Both films discuss the dangers of radiation and the connection between nuclear energy and nuclear weaponry.

The Clamshell Alliance has been very successful in many aspects: New Hampshire residents not only pay more income tax because of the drill and do not want the next state to have nuclear power, through both the protests and occupations and the education of the public.

of the new library, departmental libraries did exist on campus. For example, the contents of the Bickford Biology Library were transferred to the new facilities.

The physics department has what Professor George Buff described as a "reading room" next to the lab, consisting of books relating specifically to laboratory work.

The Clamshell Alliance has been very active on campus. The overwhelming majority pointed simply toward good sense. In response to the problem that the alternatives are "restrictive marriage or nothing." As a final note, the survey asked for possible actions that could ultimately improve sexual relations around the Bates campus. The overwhelming majority pointed simply toward good sense. In response to the problem that the alternatives are "restrictive marriage or nothing." As a final note, the survey asked for possible actions that could ultimately improve sexual chances for a winning season seem good. The general team atmosphere at Bates is one of few innovative style. But I asked, "What is wrong with that? As you allow yourselves to be more open-minded, we'll all be a lot better off.
