Performance Instructions

Guitars. The guitar part switches between acoustic and electric guitars. The electric guitar will require a suitable amplifier (or pedals) capable of distortion or overdrive. Other effects such as delay and reverb may be added as deemed appropriate by the player. A capo will be required for the second movement, as well as the ability to change tuning. The piece requires improvisation in some sections.

Keyboard. The first two movements are scored for piano; an acoustic grand piano should be used if available. The third movement requires an electric keyboard capable of producing electric piano (Rhodes or similar), B3 organ, and synth sounds. Specific patches are left to the discretion of the player/conductor. Some chord comping is required in the third movement.

Trumpet. The third movement requires use of a Harmon mute.

Drums. The percussion part switches between drum kit and mallet percussion for the first movement, and uses solely drum kit for the second two movements. The drum kit can be used for snare drum and suspended cymbal parts (soft mallets on the ride cymbal) to facilitate easy transitions. Brushes are required for the third movement. The drum legend is as follows:
